Gas Company's Services Associated with) DOCKET NO. 08-057-21
Natural Gas Vehicles)
) NOTICE OF TECHNICAL
) CONFERENCE AND PROCEDURAL
) ORDER
)

ISSUED: July 27, 2009

By The Commission:

Notice is hereby given that a **Technical Conference** will be held in the above-entitled matter on **Wednesday, September 2, 2009, at 1:30 p.m.**, with the Commission in Room 401 on the Fourth Floor of the Heber M. Wells Building, 160 East 300 South, Salt Lake City, Utah. The purpose of this technical conference will be to address the State of Utah's long-term vision for natural gas vehicles, including a discussion of infrastructure requirements, and the planning for and cost, operation, maintenance and safety requirements of this infrastructure. The agenda for this technical conference is attached as Appendix A. A real time broadcast of the audio portion of this technical conference will be available through the Commission's web site at the following link: <http://www.psc.utah.gov/utilities/gas/gasindx/0805721indx.html>. Audio files will also be available at the website after the technical conference is completed.

The Commission created this docket in 2008 for Questar Gas Company ("Questar" or "Company") to present information in a technical conference regarding Questar services for natural gas fueled vehicles. In resolving issues associated with NGV rates in Docket No. 07-057-13, we augmented the purpose of this docket to include a broader analysis of the use of natural gas for NGVs, including the costs and benefits of such use. Subsequently, in March

DOCKET NO. 08-057-21

-2-

2009, the state legislature passed a statute allowing the Commission to set regulated rates for NGV natural gas service below its cost.

Pursuant to notice, on April 23, 2009, we held a technical conference in this docket to, in part, commence discussion of regulatory and public policy associated with natural gas vehicles (“NGV”) and discuss the scope of issues to be considered in this docket. Based on the input from these discussions, we have identified the need for at least three more technical conferences. The first, noted above, will address the State of Utah’s long-term vision for natural gas vehicles, including a discussion of infrastructure requirements, and the planning for and cost, operation, maintenance and safety requirements of this infrastructure. The second will identify the public and private costs and benefits of NGV’s. The third will discuss the role of, and interplay between, regulated and competitive market mechanisms to support the State’s vision.

Individuals wishing to participate by telephone should contact the Public Service Commission two days in advance at (801) 530-6716 or 1-866-PSC-UTAH (1-866-772-8824). Individuals participating by telephone should call the Public Service Commission five minutes prior to the beginning of the hearing to ensure participation.

In compliance with the Americans with Disabilities Act, individuals needing special accommodations (including auxiliary communicative aids and services) during the Conference should notify the Commission, at 160 East 300 South, Salt Lake City, Utah, 84111, (801) 530-6716, at least three working days prior to the Conference.

DOCKET NO. 08-057-21

-3-

DATED at Salt Lake City, Utah, this 27th day of July, 2009.

/s/ Julie Orchard
Commission Secretary
