BEFORE THE PUBLIC SERVICE COMMISSION OF UTAH

In the Matter of the Application of Questar Gas Company to Increase Distribution Non-Gas Rates and Charges and Make Tariff Modifications) Docket No:) 09-057-16)
Tariff Modifications)

TRANSCRIPT OF HEARING PROCEEDINGS

TAKEN AT:	Public Service Commission 160 East 300 South Salt Lake City, Utah
DATE:	April 8, 2010
TIME:	10:03 a.m.

REPORTED BY: Kelly L. Wilburn, CSR, RPR

1	APPEARANCES
2	For Questar Gas:
3 4 5 6	COLLEEN LARKIN BELL, ESQ. JENNIFFER R. NELSON, ESQ. QUESTAR GAS COMPANY 180 East 100 South P.O. Box 45360 Salt Lake City, Utah 84145-0360 (801) 324-5556 (801) 324-5935 (fax)
7	For the Division of Public Utilities:
8 9 10 11	MICHAEL L. GINSBERG, ESQ. OFFICE OF THE ATTORNEY GENERAL 160 East 300 South, Fifth Floor Post Office Box 140857 Salt Lake City, Utah 84114-0857 (801) 366-0353 (801) 366-0352 (fax)
12 13	For the Utah Office of Consumer Services:
14 15 16	PAUL H. PROCTOR, ESQ. OFFICE OF THE ATTORNEY GENERAL 160 East 300 South, Fifth Floor Post Office Box 140857 Salt Lake City, Utah 84114-0857 (801) 366-0353 (801) 366-0352 (fax)
17 19	For the UAE Intervention Group:
18 19 20 21	GARY A. DODGE, ESQ. HATCH, JAMES & DODGE, PC 10 West Broadway, Suite 400 Salt Lake City, Utah 84101 (801) 363-6363 (801) 363-6666 (fax)
22	For AARP and the Salt Lake Community Action Program:
23 24 25	BRUCE PLENK, ESQ. THE LAW OFFICE OF BRUCE PLENK 2958 North St. Augustine Place Tucson, Arizona 85712 (520) 795-8611 (520) 207-2327 (fax) 2

1 APRIL 8, 2010 10: 03 A. M. 2 PROCEEDINGS 3 CHAIRMAN BOYER: May the record reflect that this is the time and place duly noticed for the 4 5 hearing on the Motion to Approve Settlement Stipulation in Docket No. 09-057-16, In the Matter of 6 7 the Application of Questar Gas Company to Increase 8 Distribution Non-Gas Rates and Charges and to Make 9 Tariff Modifications. 10 What I was thinking, unless someone has a 11 better idea, is that we'll hear from all of the 12 proponents of the stipulation. We'll hear cross examination, if any. We'll see if the Commissioners 13 14 have questions. 15 And then we'll go to those opposed, if any. 16 And redirect if you need to do redirect. And then 17 we'll recess until 12:00, which is the time we've 18 scheduled for public witnesses. Does that sound okay? 19 Okay. With that, let's take appearances, 20 starting with Questar, please. 21 Colleen Larkin Bell and Jenniffer MS. BELL: 22 R. Nelson on behalf of Questar Gas Company. 23 MR. GI NSBERG: Michael Ginsberg for the 24 Division of Public Utilities. 25 CHAI RMAN BOYER: Thank you.

1	MR. PROCTOR: Paul Proctor on behalf the
2	Office of Consumer Services.
3	CHAIRMAN BOYER: Thank you Mr. Proctor.
4	MR. DODGE: Gary Dodge on behalf of UAE.
5	MR. PLENK: Bruce Plenk appearing on behalf
6	of AARP and the Salt Lake Community Action Program.
7	CHAIRMAN BOYER: Welcome Mr. Plenk.
8	MR. PLENK: Thank you.
9	MS. HAYES: Sophie Hayes with Utah Clean
10	Energy, with Kevin Emerson also from Utah Clean
11	Energy.
12	CHAIRMAN BOYER: Very well, thank you.
13	Welcome.
14	Are there any participating by telephone this
15	morning? Apparently not. Okay. I think the first
16	item we should deal with is admission of the prefiled
17	testimony. There was a request that that be done in
18	the application, as I recall, or in the motion to
19	approve the stipulation.
20	MS. BELL: Yes. And I would like to move for
21	the admission of the Company's Verified Application,
22	including Appendix 1, and all of the attached
23	exhibits. I have handed out an exhibit list to all of
24	the parties and to the Commissioners. And I can
25	briefly go through that.

1	We would move for the admission of QGC
2	Exhibit 1.0, which is the direct testimony of Barrie
3	L. McKay, with the accompanying exhibits, Exhibit 1.1
4	through 1.12.
5	The direct testimony of David M. Curtis,
6	which has been marked as QGC Exhibit 2.0, with its
7	accompanying exhibits, Exhibit 2.1 through 2.10.
8	The direct testimony of Kelly B. Mendenhall,
9	which has been marked as Exhibit 3.0, with its
10	accompanying Exhibits 3.1 through 3.38.
11	The direct testimony of Steven R. Bateson,
12	marked as QGC Exhibit 4.0, with its accompanying
13	Exhibits 4.1 through 4.11.
14	And the direct testimony of Judd E. Cook,
15	marked as QGC Exhibit 5.0, with its accompanying
16	Exhibits 5.1 through 5.7.
17	CHAIRMAN BOYER: Thank you Ms. Bell.
18	Are there objections to the admission of the
19	direct testimony and exhibits described by Ms. Bell?
20	MR. GINSBERG: No.
21	CHAIRMAN BOYER: Very well, they are
22	admi tted.
23	(Questar's Verified Application and Exhibit
24	Nos. QGC-1.0 through 1.12, 2.0 through 2.10,
25	3.0 through 3.38, 4.0 through 4.11, and 5.0
	7

1	through 5.7 were admitted.)
2	CHAIRMAN BOYER: Is there other written
3	evidence that we need to put on the record? No?
4	MR. PLENK: Commissioner Boyer? There is
5	testimony that has been prefiled by Dr. Charles E.
6	Johnson on behalf of AARP and Salt Lake Community
7	Action Program that's been marked as AARP/Salt Lake
8	CAP Exhibit No. 1.
9	And I would like to have Dr. Johnson present
10	a brief summary of his testimony. And would either
11	move the admission of that testimony now or at the
12	conclusion of his summary, as you prefer.
13	CHAIRMAN BOYER: I don't really have a
14	preference, but I guess I do have a preference.
15	Let's wait until we hear from Mr. Johnson, and then we
16	can present the evidence at that moment.
17	MR. PLENK: That would be fine. Thank you.
18	CHAIRMAN BOYER: And that would that be
19	all of the written testimony then?
20	MS. BELL: (Moves head up and down.)
21	CHAIRMAN BOYER: Okay, very well. With that
22	let's, let's begin with the Company witness.
23	MS. BELL: The Company would like to call
24	Mr. Barrie L. McKay and have him sworn.
25	CHAIRMAN BOYER: Mr. McKay, you're most
	8

1	welcome to stay down there by Counsel if you like.
2	(Mr. McKay was sworn.)
3	CHAIRMAN BOYER: Thank you. Please be
4	seated.
5	You may proceed, Ms. Bell.
6	BARRIE L. MCKAY,
7	called as a witness, having been duly sworn,
8	was examined and testified as follows:
9	DI RECT EXAMI NATI ON
10	BY MS. BELL:
11	Q. Mr. McKay, please state your full name for
12	the record.
13	A. Barrie L. McKay.
14	Q. And by whom are you employed?
15	A. I'm employed for the Quest by Questar Gas
16	Company.
17	Q. And what is your title?
18	A. I'm the general manager of regulatory affairs
19	and energy efficiency.
20	Q. In your capacity as general manager of state
21	regulatory affairs do you have responsibility for
22	general rate cases?
23	A. Yes.
24	Q. Are you familiar with the application,
25	testimony, and exhibits filed in this case?
	9

1	A. Yes.
2	Q. Are you prepared today to give a general
3	overview of the settlement stipulation filed on
4	March 18, 2010?
5	A. Yes, I am.
6	Q. Would you please proceed with your general
7	overview of the settlement stipulation?
8	A. And what I'd like to do in just summary of
9	that is to not necessarily walk us through or read any
10	specific things but to identify by paragraph and
11	specifically some of the exhibits that I think lend to
12	the understanding, or a greater understanding of what
13	the parties intended and what we're settling and
14	agreeing to.
15	And to start that, simply or we have about
16	three I guess about six paragraphs that have been
17	identified as the procedural history in this
18	sti pul ati on.
19	And the biggest take away that I think that
20	we were wanting to put forward in that portion of our
21	settlement was, one, that the Company did file
22	requesting a total revenue requirement of 277 million,
23	approximately.
24	But when we filed it was under some new
25	Commission rules. And we were found to be in
	10

compliance and meet having a complete filing at that
 time.

3 And what we had provided differently than 4 ever before was information that was ordered by the 5 Commission in their rules that provided far more information than we had ever provided with an initial 6 7 filing. And put into the hands of the parties that 8 are here today in stipulation information from the 9 start that we think helped provide greater 10 understanding.

11 As evidence to that we refer in paragraph --12 the next few paragraphs to some specific technical 13 conferences that took place. One of them dealt with 14 our modeling. And we filed not only our proposed test 15 period in that model but also had included in that, 16 for parties having been involved in several rate cases 17 before this Commission before, information not only 18 for the historical forecasted period that we were 19 proposing, which was a year-end test period, but also 20 that same test period run using the average results of 21 operations, as well as a 2009 historical results of 22 operations either being able to be run on average or year end, as well as even going back to a June period 23 24 in time.

25

So we put into people's hands information

that was far more -- had a -- they had a greater
 ability to be able to do an analysis and work right
 from the start.

Additionally, we had another technical
conference which helped to explain specifically what
the parties have agreed and have before the Commission
today, and that was a technical conference related to
our infrastructure replacement tracker.

And specifically we were able to cover the
information that dealt with the budgeting and planning
of that, the actual tracking of the expenses
themselves as they occur and the replacement occurs,
as well as the accounting for that, all the way to the
actual reporting and requesting of a change in the
surcharge rate before this Commission.

Finally, the parties -- all here and
represented today that have signed this stipulation -performed their audits. Some of them were on site.
Some of them were in the form of numerous data
requests.

And we were able to provide that information using the technology that we had in the previous case, and that was what we call our V Bulletin. Which gave all intervening parties access to any of the data requests as soon as we had provided responses, as well as whenever the parties had asked them, so the parties
 could see what was out there and they had that in
 their hands.

And finally, we first met on the 2nd of March
to begin discussions about the possibility of a
settlement. And finally on the 18th of March there
was an agreement reached, and that -- this settlement
which is before you today has been signed.

9 Essentially what I wouldn't mind doing is
10 just walking through. And the easiest thing for me is
11 I'd actually take out -- and I'm going to. I don't
12 think you have to. But Exhibit 1.

Which I'd like to point out that I think the
words in this stipulation are important, but also that
we provided what we hope to be clarifying
understanding and actual ability to track through the
points that the parties agreed to in the stipulation.
And I'll refer to that with the paragraphs
that we walk through now. But beginning in

paragraph 7, the parties agreed that for purposes of
settlement that we would use an average test period
rather than what the Company had proposed in the
filing, which was a year end.

This has a revenue requirement impact ofabout \$6.5 million. You can see that on Exhibit 1 by

line 1, which starts in column B, with the 20 - 277.3 million. And then the reduction in the total
 revenue requirement can be seen on line 2 as it
 relates to the average test period.

5 I'm prepared to talk about specifics and any details behind some of these adjustments, but in the 6 7 interest of moving this forward would simply observe 8 that the next lines, from line 3 through line 10, in 9 the course of discovery, and audit, and review of 10 particularly the Office and the Division there were 11 adjustments that were discovered, identified, and 12 agreed on for purposes of settlement.

And you can see the reflective revenue
requirement changes that occurred, and all parties
agreed to that.

16 Then beginning in paragraph J -- let's go 17 with I. Paragraph 8(I), we identify and agreed for 18 purposes of settlement to accept the depreciation 19 study. The key change here from what our original 20 filed position was is that we would agree that the 21 amortization of the reserve would be over a ten-year 22 This resulted in an additional revenue period. 23 requirement reduction of \$3.2 million. 24 Then moving to J -- and this is on line 12 in 25 Exhibit 1, page 1 -- you can see that we agreed to an

additional reduction in the rate base amount for the
 test period which resulted in about a \$1.6 million
 reduction.

Further, the parties agreed that we would use an actual three-year historical percentage for bad debt. And this resulted in an additional 400,000 reduction. That's seen on line 13 of Exhibit 1, page 1, and is identified in paragraph 8(K.)

And finally, for purposes of settlement the
parties agreed that a return on equity of 10.35 would
be used. This resulted in additional increase -decrease, sorry, of \$1.7 million. Which resulted in a
final agreed to in this settlement revenue requirement
of \$263.7 million.

15 This results, when comparing it using the 16 volumetric revenue for this average test period, in a 17 revenue deficiency of approximately \$2.6 million. The 18 key thing -- and you can see this in page 2 of the 19 Exhibit 1 -- is that the parties agreed that this 20 revenue requirement deficiency would be spread to the 21 different rate classes using a uniform percentage 22 increase.

You can see that in column D. And so all
revenue classes were receiving a 1.03 percent change
to the class. When adding that to the current

Γ

1	revenue and you can see that spread of that
2	1.03 percent in column E, as in Elephant.
3	When you add that together to what is already
4	in column C on this page 2 you come up with column F,
5	which is the total revenue requirement by class once
6	you have spread the \$2.6 million deficiency on an
7	equal percentage across all classes.
8	Now that you have the total revenue
9	requirement that we've agreed to, the key thing then
10	became to determine what how we would do our rate
11	designer related to this change. And the parties
12	agreed that we could accept the Company's proposal, in
13	paragraph 11, for the temperature and elevation to
14	more accurately bill customers.
15	The key thing from this is that this does not
16	change the total revenue requirement. It's just
17	changing the volumes which we will be applying the new
18	rates to. So with that we also agreed that there
19	would be no changes in paragraph 12 to the basic
20	service fee, the administrative fee, or the tariff
21	qual i fi cati ons.
22	And that this equal percentage change that
23	you can now see as far as the total requirement from
24	the rate class, column F, would be applied to the
25	volumetric rates. Except in one case there would be
	16

16

(April 8, 2010 - Questar Gas - 09-057-16)

1	one rate schedule and that's the transportation
2	schedule of which there would be a demand charge.
3	And we have demand charge in that rate schedule. And
4	it should be percentage changed accordingly.
5	And that brings us essentially to
6	paragraph 13. And in paragraph 13 we did something
7	that's at least unique to what l've ever done in
8	requesting before a Public Service Commission, and
9	that is we've agreed to the stipulating parties that
10	we would like this Commission to open up a new docket.
11	And have that docket have its own number.
12	And have it be specifically focused on cost of
13	service, and rate design, and any other issues the
14	parties may want to bring up related to those topics.
15	And this would be taking place over the next 12 to
16	14 months.
17	If the parties can come to agreement on this
18	we would present to the Commission our settlement, if
19	you will, or agreement. If not, we would like that
20	docket to move forward with being able to have
21	testimony, rebuttal to that, and then a hearing. In
22	which the Commission ultimately, we would hope, makes
23	a decision on those issues or gives us direction on
24	what we should do.
25	The key and binding thing from the Company's

perspective is that whatever the Commission orders out
 of that docket we will use as our base case in our
 next filed general rate case.

And then finally, in following -- or
completing this Exhibit No. 1 for clarity and
understanding, recognizing that we have one of these
rate classes, which is the general service rate class,
that is decoupled or falls under the Conservation
Enabling Tariff, we simply worked through that
calculation.

And what you do is you take from col -page 2, column F, line 1, the \$239 million. You bring that forward to page 3, line 1. And you divide that total revenue requirement of that class by the average customers in the test period, which is 877,000, which results in an allowed revenue per customer that the Company will use going forward of \$272.59.

That total amount is then, on lines 4 through 15, spread to have a specific dollar amount that's identified each month that we use for our monthly entries and calculations that we'll report on the records of the Company.

And that essentially summarizes that exhibit and brings us to the infrastructure tracker, which starts on paragraph 15. And the parties agreed that the Company could implement, on a pilot basis, an
infrastructure tracker that would apply to all the
rate classes.

So you'll see on the bottom of Page 7, the
I ast line, the specific identification of all the rate
classes for which this tracker will apply.

7 The party -- the Company agreed that we would 8 file with this Commission no later than the 15th of 9 each year our planned budget and the plan for the 10 replacement for that upcoming year. We also agreed 11 that we would provide quarterly reports during the 12 year to the Commission, as well as the Division, so 13 that they might be able to track and see how we're 14 doi ng.

15 It is anticipated that, given our current
16 analysis, that each year that this total dollar amount
17 will be about 40 to 50 million dollars that we will be
18 having capital expenditures on. This paragraph
19 specifically calls out that the -- this investment
20 shall not exceed 55 million. So it puts that cap on
21 it.

And I think that brings us, as far as the summary, to paragraph 16, where we identified -- the parties realized that there were dollar amounts that are currently in the average test period. And therefore we need to have expenditures of capital
investment in this year -- which is 2010 -- up to the
level of \$10 million before we would begin to track
any investment or include any infrastructure costs in
being included in this tracker. And that's what's
identified in paragraph 16.

7 We anticipate and it's called out in 8 paragraph 15 that the Company plans to file twice a 9 year. We'll probably be doing this in conjunction 10 with our other filings that we have on a twice-a-year The plant that will be included in this 11 basi s. 12 infrastructure tracker will only be the identified 13 replacement plant that is in service, with gas 14 flowing.

And that is specifically called out and explained in the tariff sheets that we proposed and laid out in Exhibit 2 to this stipulation. It also works through the calculation of exactly how the plant, the depreciation, the accumulated deferred taxes, and property taxes will be calculated and spread to the various rate classes.

Finally, we agreed with this tracker -- and as long as it's in place -- that the Company should file a general rate case at least every three years. And the next general rate case should be filed no 1 later than July of 2013.

Paragraph 20 simply identifies that the
Conservation Enabling Tariff would no longer be
considered a pilot program.

5 Paragraph 21 recognizes that the Company has a commitment to try to help with the development of 6 7 infrastructure here in the State of Utah. And after 8 that initial investment, that any future planned 9 investment that the Company has in natural gas 10 infrastructure, if it exceeds 1.5 million, that the 11 Company would first come in and request approval from 12 this Commission.

Finally -- and I think you'll have further testimony on this -- but paragraphs 22 and 23 specifically identify the low income assistance program that the parties have agreed to. And the take away from there is that this program is identified to be a \$1.5 million level.

And that we will be shaping and bringing back to this Commission the specific details of this program, based on what is described in Utah Code. And our plan is to try to have that be brought back to you no later than June 15th.

In paragraph 24 we simply identified that thedistribution integrity management program will be

treated in the same manner as the current pipeline
 integrity man -- program.

3 And then in paragraph 25 is the rate calculations. And it again refers to Exhibit 4, in 4 5 which we have calculated for each of the rate classes and shown both their current rates and what the new 6 7 proposed rates would be with the approval of this 8 stipulation. And identify that for a typical customer 9 this results in about \$4.70 annual change in their 10 bill, or about \$0.40 a month.

And then finally paragraphs 26 through the end, which is paragraph 32, is specific language that has been included in other stipulations, recognizing that we've agreed to these items that are before the Commission for settlement purposes.

And finally I'd like to simply say that I
think this stipulation results in just and reasonable
rates, and it is in the public interest.

MS. BELL: Mr. McKay, does that conclude yourtestimony?

THE WITNESS: Yes. Or summary.

22 CHAI RMAN BOYER: Thank you, Mr. McKay, very 23 much.

Mr. Ginsberg.

21

24

25

MR. GINSBERG: The Division's witness is Phil

1	Powlick.
2	(Dr. Powlick was sworn.)
3	CHAI RMAN BOYER: Thank you. PI ease be
4	seated.
5	<u>PHILIP POWLICK,</u>
6	called as a witness, having been duly sworn,
7	was examined and testified as follows:
8	DI RECT EXAMINATION
9	BY MR. GINSBERG:
10	Q. Can you go ahead and state your name for the
11	record?
12	A. Philip, one "I," Powlick, P-o-w-I-i-c-k.
13	Q. And you are the director of the Division?
14	A. I am.
15	Q. And you were intimately involved in the
16	development of this stipulation that's being presented
17	today?
18	A. I was.
19	Q. Can you go ahead and present your statement
20	in support of the stipulation?
21	A. Sure. Taken as a complete package, the DPU
22	views the stipulation in this case to be just and
23	reasonable and in the public interest. As with all
24	settlement agreements there are some aspects that are
25	more attractive to some parties than to others, but
	23

the balancing of all of these aspects we feel results
 in a reasonable settlement.

In making this statement I just -- I will lay out some key features of the stipulation. And I don't want to be overly redundant of what Mr. McKay has already said, but we are cognizant of the fact that the only evidence that you have on the record to this point is coming from the Company.

9 So there are some points where I may explain 10 some background or provide the Division's rationale 11 for supporting a particular aspect where we just want 12 to make sure that, that we have our points on the 13 record since we haven't filed testimony to this point.

14 Before I start talking about the stipulation 15 itself, following up on Mr. McKay's comments about the 16 amount of information that was provided I just want to 17 comment that, in working through this rate case and 18 these settlement agreements -- or settlement talks, I 19 found there to be a very refreshing and useful 20 transparency of the Company. And a great deal of 21 willingness to provide information, both formally and 22 informally.

We spent a lot of time working through cost
of service and rate design issues before this
settlement was arrived at. And the Company spent a

great deal of time working with our consultant on the
 issue in a very useful way. And the same kind of
 cooperation happened on the accounting adjustments as
 well.

5 So I just wanted to make sure that the 6 Commission is aware that things went very well in 7 getting through this rate case.

8 Okay, I'll start talking about the individual 9 features of the stipulation and settlement. The first 10 one that I want to talk about is the revenue 11 requirement. With this settlement the increase in the 12 revenue requirement is changed from the 13 Company-requested 17.2 million to 2.6 million.

The reduction is due to the discrete
adjustments that you've seen and had described briefly
in Exhibit 1, and I don't want to try to re-describe
them here. And just would point out that in the model
that was filed along with the settlement there are
more explanations than are presented in the settlement
stipulation itself or the exhibits.

The largest revenue adjustment of course, as Mr. McKay said, comes from the change from a year-end test year with year-end rate base expenses,

24 depreciation, and revenues, to an average test year.

25 And that amounts to about \$6.5 million a year.

Γ

1	I would note that a lot of that revenue
2	change represents the feeder line replacement costs
3	that have been taken out of the rate case because
4	we're not doing year-end rate base now. But that will
5	later be rolled into the feeder line tracker when the
6	Company makes its first filing there. So at some
7	point we will see some a substantial portion of
8	that 6.5 put back into revenues.
9	As I said, that resulted from moving to an
10	average test year. The original Company filing had
11	year-end rate base and depreciation, with
12	annualization adjustments that moved expenses and
13	revenues to what they were expected to be on
14	December 31, 2010.
15	The settlement moves back to what we more
16	typically have done in rate cases recently, which is
17	an average test year. Where rate base, depreciation,
18	expenses, and revenues were all averaged. And as I
19	said, that means that a lot of the feeder line
20	replacement that was in the original filing has been
21	taken out of the rate case.
22	In essence, we view this as a trade-off or
23	offset for permitting the feeder line tracker
24	mechanism to be implemented this year. The accounting
25	is more reliable and relies less upon year, year end
	26

1	estimates if we do the average test year.
2	At the same time the tracker allows the
3	Company to recover feeder line costs incurred in 2010
4	without needing to rely upon or file another rate case
5	that presumably, if we did an average test year
6	without the tracker, they would file close to
7	immediately after the end of this one or shortly
8	thereafter.
9	Let me talk about the feeder line tracker as
10	well. And I'll be going into some more detail here
11	than Mr. McKay did. The agreement calls for
12	establishing the feeder line tracker mechanism fair
13	in a fairly similar manner to that which was requested
14	by the Company in its original filing.
15	But modifications have been put in place that
16	provide safeguards to permit greater control of the,
17	of the program and of the mechanism by the Commission,
18	and also to provide input by the parties along the way
19	in the implementation of this tracker.
20	The tracker allows the Company to recover
21	major infrastructure improvement costs for its feeder
22	line replacement projects between rate cases. In
23	essence, this mechanism allows the Company to avoid
24	having to do rate cases every year while they're doing
25	these feeder line replacements.

27

1	The mechanism also protects ratepayers. If
2	the actual spending on feeder line replacement is less
3	than what was projected in a rate case and we had
4	that as a result of the most recent rate case. The
5	difference is small. But this, but this corrects for
6	any of those kinds of forecasting errors that might
7	happen.
8	Conversely, this removes any incentive that

9 the Company might have to overestimate or over
10 forecast what would be built in the feeder line
11 replacement program in a test year. It uses actuals.
12 So what is actually spent will be trued up to any
13 forecast after a rate case.

14 The Division believes that the feeder line 15 replacement program is necessary. Portions of it are 16 legally required by provisions in recent federal 17 legislation, namely the Pipes Act. And all so we 18 believe the aging condition of much of the feeder line 19 system suggests that the replacement of those lines 20 would be prudent in order to maintain safety and 21 rel -- the safety and reliability of the system. 22 With regard to the tracking mechanism, 23 because the feeder line program represents an 24 unusually large and ongoing level of capital spending 25 we think a tracker is appropriate to protect the

28

Company from regulatory lag that would be created if
 we relied solely on rate cases to recover the
 program's cost.

And again, I want to emphasize that this recovers actual levels of spending after a line has been in service. The levels of spending will be subject to audit for prudence by a division and other -- the Division and other parties when the Company makes its filings every six months or so.

The DPU's auditors have reviewed the accounting procedures at Questar and are satisfied that the costs that this feeder line program incurs can easily be isolated from other costs and capital projects that the Company is doing. And that those costs can be audited relatively easily.

There may be some question, and I know we had some debate among staff in considering the feeder line tracker as to why the Company hasn't proposed to use the new single-item rate case statute that was put into place in the 2009 legislative session and has been codified as 54-7-13.4.

And with -- and we talked about it at some length with the Company as well. And what we've come to decide and agree with is that the requirements of that new statute don't fit the nature of the feeder 1 line replacement program.

25

2 The statute requires that projects represent 3 at least one percent of a Company's rate base in order 4 to be eligible for that single-item treatment. That 5 would be about 7.9 million for Questar at this time. Most of the feeder line projects actually fit this if 6 7 you look at each of these projects taken as a whole. 8 The statute also requires that if the Company 9 is to file one of these mini rate cases that they have

10 to do it no more than 150 days prior to the in-service 11 date for each major addition. For a single, discrete 12 project, that's a workable provision.

For instance, if you have a power plant there is a date of which you throw the switch. Or if it's a pump station for Questar, that also has a date at which you throw the switch. These feeder line projects, though, are brought into service in segments, as we learned at the technical conference.

As discrete segments are completed, they're connected to the system. They don't just sit there waiting for the entire, 10, 15, or however many miles of the pipeline are to be completed. And it obviously brings the benefits of the improvements to customers immediately to do it that way.

But typically each of those segments that

(April 8, 2010 - Questar Gas - 09-057-16)

1	brought into service is too are too small to meet
2	that one percent threshold. And by waiting to
3	complete the entire project the Company could well
4	wait a year or two, if it's one of the larger feeder
5	lines, before they could actually seek recovery for
6	that line. In other words, there's no single
7	in-service date for these feeder line projects.
8	Now, since the purpose of the single-item
9	rate case legislation was to allow a company to avoid
10	regulatory lag without having to file a complete rate
11	case every year, we feel that using the tracker as an
12	alternative mechanism is a reasonable way to go
13	forward.
14	

14 Okay, let me talk a little bit more about 15 some of the other provisions and safeguards regarding 16 the tracker. The ability to recover tracker expenses 17 begins when the projected test year average spending 18 has been reached. And the stipulation says that 19 that's \$10.1 million.

That's just the amount of spending on the feeder lines that's been forecast to occur in the -by the time we reach the middle of the test year. After that point, then the Company can begin keeping track of the additional expenses and later file for recovery under this tracker mechanism.

1	Let me talk about the safeguards that we put
2	into place. We're cognizant of arguments that some
3	may have made maybe will make, I don't know that
4	this could be some kind of a slippery slope. That it
5	would get out of control and all lots of projects
6	would get thrown into it, and it would never end.

First of all, it is a three-year pilot. And
the Company agrees that it will file a rate case at
least every three years while the tracker is in
effect. So all parties and the Commission have the
opportunity to review it at least every three, every
three years.

And at the same time it prevents the Company from adding 40 or 50 million dollars to rate base every year and get recovery without having to also do rate cases to review the rest of what the Company is doing.

18 The stipulation also requires that the 19 Company file, annually, a billing plan and budget for 20 the following calendar year. This allows parties to 21 analyze and comment on both the budget and the planned 22 bui I di ng. And provides the opportunity for the Commission to disapprove or modify that plan if it 23 24 should see fit.

25

The stipulation provides for an annual budget

(April 8, 2010 - Questar Gas - 09-057-16)

cap on the feeder line replacement program of
 \$55 million, for the reasons Mr. McKay described.
 There's an inflation adjuster on that.

I learned something in doing this settlement.
The inflation adjuster for that 55 million is the
Global Insight Distribution Steel Main index. I had
no idea that there was an inflation index for
distribution steel mains. I guess there must be
inflation adjustors for a lot of things that we don't
want to know about.

11 If the Company has uncompleted work in any 12 given year for which it had planned and budgeted, it 13 has the ability to roll that work over into the next 14 year without that counting toward the 55 million 15 budget after that next year. So it gives flexibility 16 to the Company for unexpected construction delays, 17 weather delays, et cetera, et cetera.

18 If the Company expects to exceed the cap they 19 have to file and receive permission to exceed the cap. 20 The Company has to file quarterly reports on that 21 year's progress and disclose the amounts that have 22 been spent year to date, progress on planned work, and 23 notify the parties of any changes to the 24 previously-filed plan. And presumably give reasonable 25 explanations as to why those changes have occurred.

Γ

1	I note finally that the tariff that's been
2	filed as, I think it's Exhibit 2, that describes the
3	feeder line tracker mechanism has a definition of
4	replacement infrastructure that hopefully puts bans on
5	what is allowed into this tracker mechanism.
6	As I say, there were concerns expressed among
7	parties informally at the beginning of this process
8	that this could become some kind of a catchall. The
9	tariff says that only "replacement infrastructure" as
10	defined in the tariff is allowed.
11	And this is defined as high-pressure feeder
12	lines that are to be replaced I'm not quoting
13	directly. High-pressure feeder lines that are to be
14	replaced due to age, condition, reconditioned pipe,
15	operating his history, and as necessary for
16	pipeline safety compliance.
17	Moving on to the provisions on return on
18	equity. The stipulation moves the Company's current
19	return on equity from 10 percent to the stipulated
20	10.35 percent. When the settlement was agreed upon,
21	the DPU had largely completed its analysis of the
22	appropriate range for cost of equity.
23	An ROE of 10.35 percent is at the high end of
24	the range that the DPU had found to be reasonable, but
25	it was within that range of reasonableness. DPU
	31

agreed to this level of ROE in the context of the
 complete agreement.

In light of the concessions in the
stipulation by Questar on major items such as average
test year and overall revenue requirement, the DPU
feels that this return on equity is -- and the
agreement as a whole are just and reasonable.

8 Moving on to cost of service and rate design. 9 As Mr. McKay described, essentially this agreement 10 settles cost of service at present allocations, and 11 settles rate design with a uniform increase into the 12 variable rates for all classes. Fixed charges will 13 stay the same.

This, this settlement provision is really a
postponement of cost of service and rate design issues
pending further study. And let me give some
explanation to you behind that.

18 As required by the Commission in the '07 rate 19 case, the DPU was in the process of examining how to 20 split up the GS-1 class. Which of course is -- covers 21 98 percent of the customers, all of the residentials, 22 and many of the commercials, both large and small. 23 And we were looking to see how it could be 24 split at least in taking off the residential class and 25 perhaps also having several commercial classes. 0ne

of the methods that we were exploring to distinguish
 commercial customers was the basic service fees that
 they pay.

The basic service fees are essentially being used as a proxy for meter size, which itself is a proxy for the throughput capacity of that particular customer. However, in the pr -- in the process of discovery and dialogue Questar on these issues we found that Questar was planning to revise how it classified customers' basic service fees.

In other words, one of the methods that we
were going to use to distinguish membership in these
new classes was about to become obsolete, and we might
have to do it all over again.

15 Moreover, we learned that Questar was 16 planning to update its cost of service study with a 17 new and very detailed examination of service lines 18 that's now made possible by GIS and other mapping 19 technologies that allows them to not -- no longer 20 estimate the length of service lines but actually 21 know, for each customer, how long the service line is, 22 and therefore be much more accurate on the cost of 23 service modeling and allocations.

In light of this we determined, and otherparties have agreed, that it doesn't make much sense
to undertake a major modification of Questar's classes
until both of those processes -- the new mapping and
cost of service model, along with the basic service
fee reclassification -- has been done.

5 So as a result, the stipulation contemplates 6 a comprehensive examination of Questar's cost of 7 service allocation and methodologies, along with 8 determining a method for splitting the GS class over 9 the next one to two years.

As Mr. McKay described, the stipulation also requests that the Commission open a new docket, in which case -- in which docket new class definitions and new cost of service modeling and allocations can be examined. And that the outcome of that case would be used in the next general rate case filing expected before July 2013.

Moving on to compressed natural gas vehicles.
I'll just use the acronym from here on out "CNG"
vehicles. The settlement reflects the ongoing
concerns that have been expressed previously by both
the Division and the Office.

And again, I want to give you some background on what's going on there. The major provision, of course, deals with ongoing levels of infrastructure investment that the Company wishes to make in natural 1 gas vehi cl es.

Behind this is the fact that there was a
U.S. Department of Energy solicitation for alternative
vehicle projects that was going to use stimulus money
to do some major projects all across the country.

And Utah Clean Cities asked for and was 6 7 awarded nearly \$15 million from the Department of 8 Energy to do natural gra -- natural gas and other 9 alternative fuel vehicle infrastructure upgrades in 10 Utah. And as part of this application Questar had 11 pledged matching funds of \$14.7 million. When that 12 award was granted, Questar was then obligated to 13 provide that 14.7.

The DPU's concern on this was basically twofold: The degree of investment in natural gas facilities that is appropriately carried in general rates, or stated differently, the degree to which CNG vehicle users are subsidized by other users, has still not really been resolved among the parties.

And of course you heard arguments on this in the last rate case, and folks were teeing up positions in this rate case as well.

The second concern is that these funds,
nearly \$15 million, were committed for projects that
are really outside the normal scope of Questar's

business of providing natural gas, and incurred
 without Commission review or approval.

Again, there's a story to this. And that is essentially that the Company had -- has expressed to several people publicly -- so this isn't settlement talk -- that they had felt as if Governor Huntsman was asking them to make that commitment and they had done that in response to his request. And therefore they went ahead and did it.

10 So the settlement reflects essentially an 11 agreement, perhaps even a retrospective acceptance of 12 that, that it was okay for them to do that given that 13 the -- Governor Huntsman had asked them to do that. 14 But basically sets up a mechanism going forward so 15 that if that kind of an opportunity or that kind of a 16 request comes through again, that it work through the 17 regulators as well.

18 But basically what we've done is allow that 19 14.7 million to go through. And it specifies that 20 that's the amount for these -- the cap for these 21 projects. And then says that from here on out you 22 shouldn't make upgrades to the system and you 23 shouldn't spend on, on it beyond 1.5 million per year. 24 Which the Company has estimated represents the routine 25 upkeep of the existing system.

Γ

1	The settlement gives the compressed natural
2	gas users the same rate increase as other classes, as
3	we've already said, and postpones the cost of service
4	discussions that I feel will probably come again at a
5	later point in time.
6	With regard to the revenue decoupling
7	provisions, or the so-called CET, the parties agree to
8	remove the term "pilot" from the decoupling tariff.
9	And to reset the allowed revenue per customer, based
10	on the outcome of this case.
11	I point out that it leaves aside from
12	removing the word "pilot" and resetting the base
13	allowed per customer, it leaves everything else about
14	the existing tariff and program in place. That
15	includes the 5 percent cap on annual recruit
16	accruals that are in place, and the 2.5 percent cap on
17	annual amortizations to the fund.
18	The DPU believes that Questar's decoupling
19	mechanism has worked well, and variations in the
20	associated balancing account have been well within a
21	tolerable range. We also believe that Questar has
22	done what they said they would do.
23	That they're, that they're walking the talk.
24	That they're making exemplary efforts in implementing
25	their DSM programs. That they've enjoyed great
	40

success in implementing those programs. And this is
 what we wanted when we established the decoupling
 pilot, so we're more than willing to allow it to
 continue.

5 With regard to the low income assistance 6 fund, the stipulation provides only the general 7 outlines of that program. The parties were unable to 8 come to agreement, in the time frame we had, on all of 9 the nitty-gritty details of how it would work.

Eligibility for the program is set at 11 150 percent of the poverty level. And applicants have 12 to be certified by the Department of Community and 13 Culture. Consistent with the new statutory language 14 that allows such a program, the cap per customer per 15 month is set at \$50.

Annual target funding is 1.5 million. And the term "target" is used here essentially in recognition of the fact that actual expenditures in one year will depend upon the state of the economy, how cold of a winter we're having that year.

As was stated earlier, implement -implementation details are to be worked out among the parties and a proposal made to you by June 15th, with the goal of having a program in place by the next heating season.

1	Finally, on temperature and elevation
2	adjustments the parties have accepted the Company's
3	temperature and elevations adjustment proposal as
4	filed in its direct testimony and application. The
5	Division has reviewed the proposed adjustments and
6	believes that they are consistent with the laws of
7	physics regarding gases.
8	My friend Mr. Swensen will be happy, I think,
9	we're supporting the laws of physics. And they're
10	consistent with industry standards and guidelines.
11	For those of you that didn't understand that in joke,
12	catch me later and I'll explain it.
13	Correcting the measurement and billing errors
14	that can result from incorrect Btu value assumptions
15	in the gas billing will significantly reduce
16	intraclass subsidies that can result from those
17	inaccuracies. And therefore we feel that this is a
18	good thing to do moving forward.
19	In summary and in conclusion, the Division
20	believes that the stipulation before the Commission
21	today is just, reasonable, and in the public interest.
22	And recommends that the Commission approve the
23	proposed settlement of Questar's 2009 general rate
24	case. Thank you.
25	CHAIRMAN BOYER: Thank you, Dr. Powlick.
	12

1	Anything further, Mr. Ginsberg?
2	MR. GINSBERG: No.
3	CHAIRMAN BOYER: We'll turn now to
4	Mr. Proctor.
5	MR. PROCTOR: Thank you. Ms. Beck needs to
6	be sworn.
7	(Ms. Beck was sworn.)
8	CHAI RMAN BOYER: Thank you. PI ease be
9	seated.
10	MI CHELE BECK,
11	called as a witness, having been duly sworn,
12	was examined and testified as follows:
13	DI RECT EXAMINATION
14	BY MR. PROCTOR:
15	Q. Ms. Beck, you are familiar with the
16	settlement stipulation, are you not?
17	A. Yes, I am.
18	Q. Could you describe the Office's view of that
19	sti pul ati on?
20	A. Do you want me to do the whole
21	Q. Right.
22	A. Are you asking for my whole summary? Okay.
23	My name is Michele Beck, I'm the director of the
24	Office of Consumer Services. As you all know, our
25	office is charged with representing the interests of
	43

1 residential and small commercial com -- consumers. 2 First and foremost, in our analysis and 3 judgment we believe that the outcome of this 4 settlement would be just and reasonable rates for the 5 consumers we represent. And I'd like to speak a little bit about the 6 analysis that we did. I -- when I say "a little bit" 7 8 I don't mean 25 minutes, I actually mean probably 9 25 seconds. But I want the Commission to be assured 10 that we did significant analysis on behalf of the 11 small consumers. 12 I actually double checked our invoices. We 13 have almost 600 consultant hours into this case. Some 14 of that will be work that would be used towards the 15 new docket if the settlement is accepted by the 16 Commission. 17 Most of that was used in reviewing all of the 18 material presented by the Company and, and going about 19 the same kind of analysis we'd do if we filed a 20 full -- full testimony in the case. And that work 21 also included an on-site audit and numerous discovery 22 requests as well. So I want to call out just a few points of 23 24 the settlement that were important to us. First, it 25 was important to us to have that average test year in

44

there, the amortization of the reserve variance
 associated with the new depreciation study, and the
 rate-based adjustment.

And Looking at those, those are some of the biggest adjustments and issues that we would have raised in testimony. We also shared the concern about the NGV. Our concern of course was that the, the Company may have been committing ratepayer money without approval.

We are very much in agreement with the
settlement concept that came up surrounding the NGV
future investments.

In general, we do not support trackers. So
we are very hopeful that our support of a single
tracker in this case does not lead towards a trend.
But we do think that this tracker in this case for -will result in just and reasonable rates.

18 Two primary reasons: One is it facilitates 19 necessary infrastructure investments. And the second 20 one is that, as Dr. Powlick has explained, we think 21 there are enough consumer protections that have been 22 put in place surrounding that tracker that we do feel 23 comfortable.

24 We support the introduction of a low income 25 program. Right now we've had discussions that extend

(April 8, 2010 - Questar Gas - 09-057-16)

beyond what's being presented to you today. And we
 think that there's a good concept emerging on that,
 and we'll continue in those discussions to work
 towards a good program. Not being proposed as modest,
 but we'll continue to monitor that.

And as you know, we're -- we, you know, we
feel like we have to carefully evaluate a low income
program because we represent both the beneficiaries
and those who are paying for it. So it's something
that we watch carefully, and we'll continue to do so
as this emerges.

12 We did evaluate cost of service and rate 13 design issues. Certainly not to the extent that I 14 think the Division has, has done so. In fact we were 15 beginning to be concerned about the way that the 16 process itself would unfold, because if we see a --17 something as large as the breaking apart of the GS 18 class that comes kind of late in the process if it 19 comes in direct testimony -- which is not to say that 20 it was late in, in contradiction of any scheduled 21 order -- it just would be difficult for us to respond 22 in as productive of a way as we would like.

23 So we're very supportive of moving that into 24 a different docket so that it would allow for the full 25 investigation and exploration of those issues.

46

1	Now we come to the issue of the ROE. It may
2	not come as a surprise to the Commission that we are
3	one of the parties that do not accept the ROE of 10.35
4	in explanation is a reasonable return on equity, as
5	was highlighted in paragraph L for you.
6	For us it was too far outside of our range of
7	reasonableness. We don't think it recognizes the risk
8	deduct reduction associated with making the CET
9	permanent or having a tracker, and we do not think it
10	can be explained by commonly-used methodology.
11	And for that reason I wanted to highlight one
12	sentence in the stipulation for you at the bottom of
13	page 5, where it says:
14	"Thus, identification of the ROE is
15	unrelated to the parties' evidence that
16	the settlement stipulation as a whole
17	and end result is just and reasonable."
18	That being said, we recognize that this will
19	be in place for a relatively short term. The Company
20	will be filing within three years. And taken in total
21	with the other benefits that we perceive in this
22	settlement, not the least of which is a
23	greatly-reduced revenue requirement, we still believe
24	that the end result will be just and reasonable rates.
25	CHAIRMAN BOYER: Thank you Ms. Beck.
	17

1	Anything further, Mr. Proctor?
2	MR. PROCTOR: Nothing, thank you.
3	CHAIRMAN BOYER: Mr. Dodge, you do not have a
4	witness, do you?
5	MR. DODGE: We do not, thank you.
6	CHAI RMAN BOYER: Thank you for being here
7	anyway.
8	Mr. Plenk, please.
9	MR. PLENK: Thank you, Mr. Chairman. I'd
10	like to have Dr. Charles Johnson sworn in, please.
11	(Dr. Johnson was witness sworn.)
12	CHAIRMAN BOYER: Thank you. Please be
13	seated.
14	<u>CHARLES E. JOHNSON,</u>
15	called as a witness, having been duly sworn,
16	was examined and testified as follows:
17	DI RECT EXAMINATI ON
18	BY MR. PLENK:
19	Q. Dr. Johnson, would you please state your name
20	and address for the record?
21	A. Charles E. Johnson. My business address is
22	7B Pleasant Boulevard, No. 1086, Toronto, Ontario,
23	Canada.
24	Q. And Dr. Johnson, are you the Charles Johnson
25	who recently prefiled testimony in this case focussing
	48
I	Kelly L. Wilburn, CSR, RPR

(April 8, 2010 - Questar Gas - 09-057-16)

1	on the low income rate assistance program aspect of
2	the stipulation settlement?
3	A. Yes, I am.
4	Q. And if you were to be asked the questions and
5	answers in your prefiled testimony, would they be the
6	same?
7	A. Yes, they would.
8	Q. Do you have any corrections to make to your
9	prefiled testimony?
10	A. No.
11	Q. All right.
12	MR. PLENK: Mr. Chairman, at this point I'd
13	move the admission of what's been marked as AARP/Salt
14	Lake CAP Exhibit No. 1, Direct Testimony of Charles E.
15	Johnson.
16	CHAIRMAN BOYER: Are there any objections to
17	the admission of Dr. Johnson's prefiled direct
18	testimony?
19	Seeing none, it is admitted.
20	(Exhibit No. AARP/SLCAP-1 was admitted.)
21	MR. PLENK: Thank you very much.
22	Q. (By Mr. Plenk) Dr. Johnson, would you please
23	present your summary of your testimony, and your
24	position on the proposed settlement stipulation?
25	A. Yeah. The, the purpose of my testimony is to
	49

support the settlement stipulation. AARP and Salt
 Lake Community Action Program fully support Commission
 approval of the entire agreement.

Now, my test -- my prefiled testimony is
somewhat longer than would generally be expected for
this purpose. The reason for that is that only
Questar's testimony was filed prior to the signing of
the stipulation -- settlement stipulation, so there's
nothing in this record about the issues surrounding
the proposed low income assistance program.

11 So my testimony covers four areas to remedy 12 that. First of all, the need for the program. I have 13 used Census Bureau data from their surveys about the 14 levels of poverty in the State of Utah to demonstrate 15 that need.

One additional thing that I did in that
regard was to cite a study performed by Northeastern
University about the impact of the recent economic
downturn -- I guess not so recent now -- economic
downturn on low income people.

The people who -- the households that have the lowest income also have suffered the greatest job loss. And are -- have much higher levels of unemployment today.

25

The second thing I talk about is the effort

Γ

1	of the task force. I commend Questar for its efforts
2	in putting together the task force that worked on this
3	during the past year, and the preparation of the
4	report that was filed with the Commission last
5	December.
6	The third thing is that, as with the Rocky
7	Mountain Power Help program, this program we propose
8	to be the details of this program will be worked
9	out by the interested parties subsequent to Commission
10	approval of the overall general program.
11	Lastly, the familiarity of the parties with
12	Utah Code 54-7-13.6 that en the enabling
13	legislation for the low income assistance, is
14	something the Commission should be aware of.
15	Both the low income task force and the
16	parties to the settlement discussions are quite
17	familiar with these programs. And the low income task
18	force report and the settlement stipulation are a
19	result of that familiarity.
20	As far as the settlement stipulation itself
21	is concerned, I participated in the settlement
22	di scussi ons and have exami ned the settlement
23	stipulation. I believe the stipulation, taken as a
24	whole, will produce rates that are just and reasonable
25	and in the public interest. And I recommend that the

Commission adopt the settlement stipulation in its
 entirety.

The low income rate assistance program, as part of the agreement, will assist tens of thousands of low income Utah families pay their winter heating bill. This will result in benefit to these customers, to Questar, to other gas companies, and to the State of Utah.

9 Lastly, subsequent to my preparation of the
10 prefiled testimony I did some calculations on the
11 likely impact of the cost of the program on various
12 customers in the GS class. For this analysis I used
13 the test year sales levels and billing determinants
14 provided by Questar for the past year.

That is, this was data I had obtained during the discovery phase. And it was through October of last year, so it included last winter's heating season and last summer's data. Based on that data, the annual cost to an average residential customer would be about \$1.15. This is at the proposed \$1.5 million annual funding level.

Even during the peak month of January a year ago, half of the residential customers would have a surcharge of less than \$0.21. During the low-use summer months, half would have a surcharge of less

52

(April 8, 2010 - Questar Gas - 09-057-16)

1	than \$0.04. Now, obviously half of the customers
2	would have surcharges greater than those numbers, and
3	some would pay substantially more than those amounts.
4	The average residential use that I derived
5	from these billing determinants for the past year was
6	11 decatherms in a winter month, on average. But
7	there were some residential customers who used
8	thousands of decatherms per month, so their surcharge
9	would be substantially higher than the \$0.21 l
10	i denti fi ed.
11	I believe that these impacts are acceptable.
12	And I recommend that the Commission approve the
13	settlement stipulation in its entirety. That
14	concludes my summary.
15	Q. Thank you, Dr. Johnson.
16	CHAI RMAN BOYER: Thank you, Dr. Johnson.
17	Anything further, Mr. Plenk?
18	MR. PLENK: No. Thank you, Mr. Chairman.
19	CHAIRMAN BOYER: Turning now to Ms. Hayes.
20	MS. HAYES: Utah Clean Energy's witness is
21	Kevin Emerson. And he needs to be sworn in.
22	(Mr. Emerson was sworn.)
23	CHAIRMAN BOYER: Thank you, please be seated.
24	* * *
25	* * *
	53

1	<u>KEVIN M. EMERSON</u> ,
2	called as a witness, having been duly sworn,
3	was examined and testified as follows:
4	DI RECT EXAMI NATI ON
5	BY MS. HAYES:
6	Q. Mr. Emerson, will you please state your full
7	name for the record?
8	A. Kevin M. Emerson.
9	Q. And by whom are you employed?
10	A. I'm employed by Utah Clean Energy.
11	Q. What is your position and business address?
12	A. My position is senior policy and regulatory
13	associate. And my business address is 1014 Second
14	Avenue, Salt Lake City, Utah 84103.
15	Q. On whose behalf are you testifying?
16	A. I am testifying on behalf of Utah Clean
17	Energy and Southwest Energy Efficiency Project.
18	Q. Were you involved in and are you familiar
19	with this stipulation?
20	A. Yes.
21	Q. Do you have a statement you would like to
22	present today?
23	A. Yes. I'd like to read comments in support of
24	the settlement stipulation. Utah Clean Energy is a
25	nonprofit public interest group working to advance
	54

energy efficiency and renewable energy in Utah as key
 components of our energy future.

And the Southwest Energy Efficiency Project
is a regional nonprofit organization working to
advance energy efficiency in six states in the
Southwest, including Utah.

Our prime area of interest in this proceeding
is the continuation of the Conservation Enabling
Tariff, or the CET, that will be made permanent
through the settlement stipulation.

While Utah Clean Energy and Southwest Energy
Efficiency Project do not take a position on the other
individual provisions in the settlement stipulation,
when taken as a whole we agree that this settlement
stipulation is reasonable and in the public interest.

By making the CET permanent we understand that Questar will be able to continue its successful ThermWise program on a permanent basis, for which the Company incidentally recently received recognition from the Energy Star Program as an Energy Star partner of the year. That was in March, I believe.

The ThermWise program has, in many cases, cost-effectively exceeded projections. And continues to transform the market and increase awareness about energy efficiency, conservation, and efficient

1	products and practices.
2	And I'd also like to note that energy
3	conservation, efficiency, and well-designed DSM
4	programs offer least-cost reasonably-priced energy
5	resources, while providing tremendous co-benefits and
6	producing extra externalities associated with
7	natural gas use.
8	These externalities can include criteria
9	pollutant emissions, greenhouse gas emissions, public
10	land issues, threats to national and regional energy
11	security. Thank you.
12	Q. Does that conclude your testimony?
13	A. Yes.
14	CHAIRMAN BOYER: Thank you, Mr. Emerson.
15	Is there anyone who else wishes to speak in
16	favor of the stipulation?
17	Are there parties in attendance today who are
18	going to speak against the stipulation?
19	Okay. Well, let's see if the Commissioners
20	have questions. Commissioner Allen?
21	COMMISSIONER ALLEN: Thank you, Mr. Chair.
22	Those summaries were pretty effective. I think I had
23	several of my questions answered, especially on the
24	history of your settlement.
25	I am curious, and I think for the Company I
	56

(April 8, 2010 - Questar Gas - 09-057-16)

1	have a question. And I probably asked this before,
2	but everyone is keeping us so busy I've forgotten the
3	answer. And it's a minor item. But you've got
4	depreciation for land on your settlement spreadsheet,
5	and I've forgotten what that's counterintuitive for
6	those of us who are plagued by a background in
7	accounting.
8	MR. McKAY: It's a little counterintuitive
9	for the Company too. Bottom line is, is we had some
10	people review. And we observed that we had included a
11	portion of land in one particular county to who was
12	incurring depreciation, and it should not be.
13	And we will agree readily that that should be
14	removed, and we did. So it's some good eyes on those
15	who reviewed our case, and we appreciated that.
16	COMMISSIONER ALLEN: Great. That makes a lot
17	more sense now. I'm just curious about these
18	trackers. To the Company, are you aware on these
19	specific trackers, are a lot of LGCs now using them
20	around the country?
21	l'm familiar it's been a trend, but what
22	do you have some sense of how many people are finding
23	these just and reasonable around the country?
24	MR. McKAY: Yes, we do. And that
25	specifically was addressed in the testimony that was
	57

1	admitted to this record. And at the time of our
2	filing and I should point out that that was back in
3	December we had done research at the time in which
4	we had, one, identified all of those LGCs across the
5	country that had similar-type mechanisms to what we
6	were proposing.
7	Meaning specific infrastructure, we found
8	that most of those were like the cast iron, bare
9	steel. Some of them were actual ageing to where they
10	weren't functioning properly, and they were replacing
11	that.
12	Some even had they went so far as to have
13	it part of their state programs that they were
14	ordered or I shouldn't say "ordered." It was
15	actually passed in legislature in a couple of them.
16	But in total there was 20 of them across the country.
17	And we were pleasantly surprised as we went
18	about doing our research and analysis. So it's not
19	something that necessarily new to the industry. But
20	it made sense in several other jurisdictions, and we
21	recommended it and proposed it before this Commission.
22	COMMISSIONER ALLEN: Okay, great.
23	MR. McKAY: And I, I'm sorry, I was gonna
24	actually refer to the exhibit. That is found that
25	summary is found in Exhibit 1.8 of my direct

1 testimony.

COMMISSIONER ALLEN: Great, thank you. Let's
see here. When it comes to existing accounting
treatment of feeder lines I think they're probably
spread pro rata among -- amongst the blocks, speaking
now of our different blocks groups.

7 Is that correct, it's a pro rata assessment?
8 So that people who are, say, in blocks two and three
9 are being a allocated smaller amount of feeder line.
10 Is that correct? Am I reading that right?

MR. McKAY: I think you're specifically
referring to a class cost of service issue. And I've
got my good backup man that's sitting behind me if I
blow it here.

But the feeder lines, my memory is is that those have been identified and have been included -at least in what we proposed in this case -- as being allocated on a weighted factor that uses both our throughput, in other words energy, and our demand, peak. And that was going to be our proposal.

What I want us to make sure that we
understand is, is what we agreed for purposes of
settlement was to simply percentage change all of the
classes. So that particular issue is not necessarily
being resolved before this Commission.

1	But it has been typically allocated that way
2	in the past. Although as soon as I say that statement
3	I have to observe that what the Commission has done in
4	several of our rate cases back through the '90s and
5	the early 2000s is that we, again, we may have a
6	percentage change from where we have been before.
7	And there hasn't been specific findings on
8	how a particular account should be allocated for cost
9	of service purposes. My guess is, is you might see
10	that in play before you as we move forward into this
11	next docket that we would be opened up with the
12	acceptance of this stipulation.
13	COMMISSIONER ALLEN: You actually approached
14	my next, my next question. It was a follow up. And
15	that is, the tracker doesn't change that, but we can
16	expect that we might see this in the future. And if
17	we open a new docket this can be resolved as far as
18	specificity of how this is calculated?
19	MR. MCKAY: Yes.
20	COMMISSIONER ALLEN: Okay, great.
21	And then, let's see, I have a question for
22	the Division, for Dr. Powlick. I'm just I'm pretty
23	certain you answered this in your summary, but I want
24	to make certain I'm clear. If the CET becomes
25	permanent then, rather than a pilot, do you feel
	60

1 you'll still have adequate opportunity to test the efficacy of the program, review it, and track it? 2 3 DR. POWLICK: Certainly from an accounting viewpoint we'll be able to do that. As I say, the 4 5 variations in the balancing account have been fairly under control and readily auditable. 6 7 With regard to the efficacy of the DSM 8 programs, I assume you're asking? There's of course a 9 report due, I believe it's in June, that's supposed to be a comprehensive look at the effectiveness of the 10 11 And obviously we're recommending program. 12 continuation of the CET before that's in. 13 I'm not expecting any surprises with that 14 If there are, of course the Commission would report. 15 always have the ability to open up a new docket and 16 say, Wait a minute. You know, maybe the CET isn't 17 doing what it's supposed to do. 18 I don't know -- and I'm part of the, this 19 steering committee or whatever we're calling it these 20 days for the Questar DSM. But I don't recall -- Gary 21 maybe can correct me -- whether or not we've put in 22 place a mechanism for doing annual reporting, 23 tri-annual reporting? 24 I don't think we've, we've put that in place. 25 But certainly now, once we have this report, this

three-year report coming in June, we probably ought to
 establish something like that to have outside parties
 review the efficacy of the program.

Right now the Company is filing quarterly
reports on results. And those are giving us a lot of
granularity in what the individual programs are doing,
so I'm satisfied from that viewpoint. But you -- your
question does raise in my mind maybe we do need to
establish going forward a mechanism to have an outside
party review the program.

And, and a little bird just put a paper in front of me that reminds me that of course we can always challenge the prudence in the future.

14 COMMISSIONER ALLEN: All right, great. Thank
15 you, that's helpful. And something tells me the
16 Company might have an answer to your implied question
17 about the annual report or how that works.

MR. McKAY: I'll agree with Dr. Powlick in
his observation of what we have out there. But also
remind the Commission that the way we currently have
done this is slightly different than maybe other
utilities that are operating in this state.

And that is this: We come before the
Commission with a proposed budget every year. And
right now all we have before this Commission that

they've approved is a budget for 2010. There's not a
 budget for 2011.

We simply have a Conservation Enabling Tariff on the accounting side of revenues that's gonna move forward. We anticipate that we would again follow -as has been our standard procedure after input from the advisory board, which Phil has been on, as well as the Office, and Utah Clean Energy, and others with their input.

And we're anticipating making adjustments to our current programs when we get this June report. Just in fine tuning them, improving them. Some measures might need to be eliminated if we don't feel like and the results come back that they're not producing the benefits that we thought. Others could be added.

17 But we would be filing at the 1st of October 18 again for approval of a 2011 budget moving forward. 19 And unless the Commission were to change -- and that's 20 also a separate docket that it be docketed every 21 year -- unless they were to change that procedure, we 22 would anticipate moving forward in that same manner. 23 COMMISSIONER ALLEN: Okay, great. Those, 24 those questions are helpful. I think that the other 25 questions that I had have been answered during

1	
1	summary, so thank you.
2	CHAIRMAN BOYER: Commissioner Campbell?
3	COMMISSIONER CAMPBELL: My first question I
4	guess would go to the DPU. And it is what rate of
5	return on equity will the DPU use as it evaluates
6	whether the Company's over earning?
7	Are you intending to use the 10.35 in the
, 8	stipulation? Are you intending to use what you feel
9	
	like is the appropriate ROE.
10	DR. POWLICK: We would use the 10.35 in the
11	stipulation.
12	COMMISSIONER CAMPBELL: Have the parties, as
13	you've talked about this issue, have you established
14	any sort of agreement on capital structure or cost of
15	debt? Did that come up at all in the context of the
16	sti pul ati on?
17	DR. POWLICK: We haven't. I believe, I
18	believe it's as filed.
19	COMMISSIONER CAMPBELL: Is that your
20	understanding, Mr. McKay, that it's as filed?
21	MR. McKAY: The revenue requirement upon
22	which is specifically identified in Exhibit 1, page 1,
23	used the capital structure and cost of debt as filed
24	to reach that agreed 263.7 million total revenue
25	requirement.

1	And that has been consistent with how this
2	Commission has ordered in all of our rate cases since
3	'93, that I'm aware of.
4	COMMISSIONER CAMPBELL: Then let me ask you a
5	question, Mr. McKay, from the Company's respect. And
6	I don't know if you're prepared to do this, but on
7	Exhi bi t 2?
8	MR. McKAY: Correct.
9	COMMISSIONER CAMPBELL: There is a number for
10	a current Commission allowed pre-tax rate of return of
11	11.79 percent. Do you have the details to that
12	cal cul ati on?
13	MR. McKAY: Yes, we have them. I don't know
14	if I have them in front of me. I can tell you what
15	they're based on, and then give you the exact numbers
16	that I don't have memorized.
17	And they are this. They are the average
18	capital structure for the test period of 2010, with
19	a forecast that's based on the average capital
20	structure. With the cost of debt beyond the being
21	the actual cost of debt for that period.
22	We're not doing any financing, so that's
23	essentially historical. Meaning that it is what it is
24	today. With the stated allowed return on equity of
25	10.35, which results in a average rate of return of
	65

	(April 8, 2010 - Questar Gas - 09-057-16)
1	8.42 percent is the rate of return. The equity was
2	10. 35.
3	When you use those numbers, given our current
4	federal and state tax rate, it produces a pre-tax rate
5	of return of 11.79.
6	COMMISSIONER CAMPBELL: Could you provide us
7	that calculation? When our staff tried to come up
8	with that number they came, they came to that number
9	in a different way which showed your 10.6 original
10	request and a gross of debt as well as equity.
11	So if you could provide that for us, that
12	would be helpful. Because we could not figure out
13	how, with the 10.35, you got to that number.
14	MR. McKAY: I yes, we can provide that.
15	We'll provide it not only on a separate sheet of
16	paper, but I think I'm gonna turn around and look
17	at my revenue requirement witness here.
18	I think we might also be able to specifically
19	refer to you in the settlement model that was filed
20	with this settlement stipulation. And
21	COMMISSIONER CAMPBELL: I think that's where
22	they got their numbers for the gross factor and some
23	of the other things. So if you could just point us to
24	the numbers, that would be helpful.
25	MR. McKAY: We can do that.

66

1	COMMISSIONER CAMPBELL: Let me I'm gonna
2	move on to decoupling. And I think I'll ask Ms. Beck
3	the first question. You left decoupling out of your
4	summary. I was anxious to hear what you had to say
5	about that paragraph.
6	So could you harmonize for me your agreement
7	to the paragraph, "Explanation of implementing full
8	decoupling in the state," with the pages of testimony
9	and the testimony we're gonna hear on Monday and
10	Tuesday as it relates to the other company?
11	Could you just harmonize that for me from the
12	Office's standpoint?
13	MS. BECK: Within the Office first of all,
14	I want to be careful and say that I personally was not
15	here for the majority of the process associated with
16	the implementation of the CET. So I don't have quite
17	all of that history.
18	And I think, to be fair and honest, I think
19	there were was we maybe did not have complete
20	consistency in the positions that were taken.
21	Although also to be fair, the Office itself was going
22	through a great deal of turmoil during that time.
23	So viewing it today and going forward, in the
24	Office's judgment there are significant differences
25	between Questar and the company about which we will be
	67

speaking on Monday. Some of those differences have
 been outlined in the testimony I presented in that
 other case.

And so that's, I think, one of the, one of the key differences. One of the things that we had intended to do within this Questar Gas rate case, and did give up in the settlement, is take a more specific look at some of the details.

Now, in our view -- not that the question was
asked of me, but to respond to Commissioner Allen -we don't think anything is ever permanent. I mean, we
think that in any case before the Commission we can
always come back and ask for changes, or adjustments,
or challenge prudence.

And so there may be elements of this decoupling program -- and one of them, by the way, is that I hate the name. But that's, that's there. I -but this decoupling program, there may be elements that we'll want to come back and try and refine and try and ask for in future cases.

And to be honest and clear, we gave that up in this case in the interest of pursuing I think in many respects what we think would be the best use of our resources, given limited resources and multiple cases.

1	So, but I think that's one of the clear
2	distinctions that's made. And I think probably it
3	would be more appropriate to discuss in the other
4	case, come out in the other case. And that is the
5	difference between the companies.
6	COMMISSIONER CAMPBELL: And I'm sure we'll
7	have that description on Monday or Tuesday.
8	MS. BECK: I mean, I'd be happy to go
9	further, I just don't want to cross cases.
10	COMMISSIONER CAMPBELL: I just, in context of
11	this stipu just in context of this stipulation and
12	your signing off on this stipulation, it raised the
13	questi on.
14	MS. BECK: Uh-huh (affirmative.)
15	COMMISSIONER CAMPBELL: With that other case
16	so close in time.
17	MS. BECK: Did my answer provide an adequate
18	response?
19	COMMISSIONER CAMPBELL: I understand your
20	answer.
21	But let me ask Dr. Powlick, you mentioned
22	that the caps in the decoupling or the CET tariff
23	would remain in place. My question is, to you or the
24	Company, have they ever been applied?
25	DR. POWLICK: My recollection is that we have
	69

(April 8, 2010 - Questar Gas - 09-057-16)

Γ

1	not reached either of those caps in the, what is it
2	now? Three years that we've been doing it.
3	COMMISSIONER CAMPBELL: Is that correct?
4	MR. McKAY: We apply them each month. We
5	compare to see if
6	COMMISSIONER CAMPBELL: Have they ever been
7	reached?
8	MR. McKAY: No, they've never been reached.
9	COMMISSIONER CAMPBELL: Okay. Let me ask a
10	little bit about NGV now. I think in the last order
11	the Commission by through that order had suggested
12	a policy of narrowing the subsidy that's provided to
13	customers that have NGV the NGV customers.
14	And the question is, does this stipulation
15	increase that subsidy? Does it move us in the
16	opposite direction, and if so, by how much?
17	DR. POWLICK: Because this is a uniform
18	percentage rate increase, it I'm it I'm
19	having to do some math in my head.
20	COMMISSIONER CAMPBELL: Well, then let
21	DR. POWLICK: Yes, but by a miniscule amount.
22	COMMISSIONER CAMPBELL: Let me ask it this
23	way. There's a significant capital investment, yet
24	the volumes are unchanged, so. Maybe I should go to
25	the Company on this one.

1	MR. McKAY: One of the other things that came
2	out just to bring us all on the same page first,
3	then I'll specifically answer that question was
4	that we wanted to break out the natural the NGV
5	rate as a its own specifically allocated to
6	schedul e.
7	In the previous case that was that had not
8	occurred. And so that's one thing that happened that
9	is part of the excuse me the data that is before
10	all of the parties.
11	And when that was done, because of the
12	principle of average allocations and that occur
13	when you try to allocate all of the costs and then
14	also mix that with specific allocations, the actual
15	amount of "subsidy" that you're specifically referring
16	to was less, just to begin with, than was identified
17	in the last case. Which did it in a different manner.
18	I think to further answer your question
19	though is we anticipate and we've put that issue
20	into this next portion of the cost of service and rate
21	design. And it very much is a cost of service and
22	rate design issue.
23	And we would anticipate that all the parties
24	that Dr. Powlick had identified earlier as perhaps
25	lining up to weigh in would need to weigh in at that
	71

1	time. And no party's position is limited as to what
2	they could would or could recommend before the
3	Commission and have you decide in that portion. Or in
4	that case.
5	COMMISSIONER CAMPBELL: But do I have the
6	math right? I mean, with the significant capital
7	investment to go along with the Clean Cities grant
8	we're making new stations, we're beefing up the
9	compression, but the volumes don't go up. So is this
10	subsi dy i ncreasi ng?
11	MR. McKAY: No. The for specific purposes
12	there was 5.1 million included in the total investment
13	for the 2010 test period. On average that's gonna be
14	something more along the 2 to 3 range, so that's what
15	the amount it affected rates by.
16	Second, the volumes have gone have
17	continued to be at a higher level than what we were
18	providing in the last case, so that actually works to
19	reduce it. And then third, because of it being broken
20	out in a separate rate class, that also had an overall
21	effect of helping to reduce.
22	So we are slightly less subsidized, because
23	of usage and allocations, in the results that we have
24	put forward in this case when compared to the previous
25	case.
1	COMMISSIONER CAMPBELL: Okay, thank you.
----	---
2	Let me ask a question about, from a
3	customer's perspective, as it relates to the
4	surcharges. We're gonna have a surcharge for the
5	tracker as well as a surcharge for the low income
6	program.
7	Are both of those gonna be on the bill? Or
8	is the tracker surcharge gonna be on the in the
9	tariff, where it ends up in the volumetric rate? And
10	it comes down to the question of you want
11	transparency, but you don't want confusion. And so.
12	I believe the low income tracker on your
13	statute has to be on the bill, as I reread that
14	statute this morning. But I what is your intent as
15	it relates to the infrastructure tracker surcharge?
16	MR. McKAY: Our intent is to treat it like
17	other tariff components and have it broken out
18	specifically on the tariff page. But to have it be
19	treated like the other ones that are on the regular
20	bill in the essence of it not creating the confusion.
21	We my understanding is also consistent
22	with yours, Commissioner, and that is that I think
23	that the low income does require that. I didn't know
24	for sure, but I assumed that that would get clarified
25	and worked out in our efforts of meeting together and
	73

1 hammering that out and trying to have the 2 recommendation to you by June 15th. 3 CHAIRMAN BOYER: Okay, I have just a couple of questions. My first is, how long is the 4 5 infrastructure tracker pilot? I heard Dr. Powlick say three years, but as I read the stipulation it looks 6 7 like it is revisited every three years, at least every 8 three years in a rate case, but it continues so long 9 as the feeder line projects are going on? So it could 10 go longer than three years? MR. McKAY: I think all of our understanding 11 12 is we recognize that currently what we have out there 13 is ten-plus years of specific infrastructure to be 14 replaced, but the idea is to have it be reviewed and 15 revisited at least every three years. 16 Thank you. And so about a CHAI RMAN BOYER: 17 ten-year period to complete the feeder line, more or 18 less? I'm not gonna hold you to it, but that's what 19 you estimate? 20 MR. MCKAY: More or less. 21 CHAI RMAN BOYER: Okay. Question for 22 Dr. Johnson. In the course of your analysis did you 23 look into the issue of whether or not the low income 24 assistance program might result in savings to the 25 Company in terms of reducing uncollectible accounts,

Г

1	bad debt expense, those sorts of things?
2	DR. JOHNSON: I did look at that in the last
3	Questar general rate case, but I did not at this time.
4	I think it's it would be expected that it would
5	reduce it somewhat. But I think as Questar has
6	recognized, their level of uncollectibles is lower
7	than many comparable companies.
8	CHAIRMAN BOYER: Okay, thank you.
9	DR. JOHNSON: I would like to just correct
10	one thing. The legislations does require that the
11	credit to the beneficiaries of the low income program
12	be on the bill, but I can't find any reference to the
13	surcharge being a separate item.
14	COMMISSIONER CAMPBELL: I think in the
15	statute it use the term it uses the term "bill
16	surcharge." Which makes me think. I think in the
17	case of our other utility they actually put that in
18	singly on the bill.
19	CHAIRMAN BOYER: Okay. Another question, you
20	know, for anyone to respond to, I guess. And that is,
21	in the course of the settlement discussions did anyone
22	raise the issue of whether or not the infrastructure
23	track tracker reduces risk for the Company that
24	could, or might, or should be reflected in the rate of
25	return?

1	Ms. Beck?
2	MS. BECK: Yes.
3	CHAIRMAN BOYER: So is the does the
4	stipulation reflect some kind of consensus on that
5	i ssue?
6	MS. BECK: Paragraph L reflects our view on
7	whether or not the ROE properly reflects all risk.
8	CHAIRMAN BOYER: Mr. McKay?
9	MR. McKAY: Chairman, I'll agree with the
10	yes, because it was brought up, it was reviewed, it
11	was discussed. I think there's a couple of different
12	sides to that issue. And therefore we there the
13	need for compromise in what's before you here in the
14	form of a settlement.
15	We recognized the very first thing out of the
16	block was for us to agree to an average test period.
17	Which essentially, at the time these rates will go
18	into effect, will be 100 percent historical. Because
19	the average point will be June 2010. That was a
20	significant give and take on our part.
21	And then in the form of the tracker we will
22	not be able to do what the statute allows, and that is
23	file a forecasted test period that could go out
24	20 months. And instead the only historical inservice
25	pl ant.

1	I also recognize that the Office had points
2	that recognized other issues that could say, Hey, I
3	can argue to have it be reduced. So I think it
4	absolutely was discussed and vetted.
5	CHAI RMAN BOYER: Okay, thank you. Did anyone
6	represent NGV users or these folks who retrofit
7	automobiles in the course of these discussions?
8	They didn't participate? Okay.
9	DR. POWLICK: I don't believe so.
10	MR. McKAY: Chairman, we did have those
11	parties contact us. We told them that they should
12	monitor and review this case, and that there would be
13	a public witness day. But that was at the time that
14	we were anticipating a full-blown perhaps litigated
15	proceedi ng.
16	l don't know if they're necessarily gonna
17	show up today. But we did tell those also that
18	communicated with us that what would be in play in the
19	next portion of this case could absolutely be that
20	issue as it relates to cost of service allocated to
21	natural gas vehicles, as well as whether or not it
22	continues to be subsidized.
23	DR. POWLICK: Chairman Boyer, I believe
24	none no such parties intervened in the case. So
25	they wouldn't have been in on the settlement

1 di scussi ons.

2 CHAI RMAN BOYER: Thank you. And then my last 3 questi on. There's a reference in -- on page 22 that 4 states more or less that the parties agree that the 5 Company will account for the costs incurred in compliance with the new distribution and integrity 6 7 management program rules in the same manner. 8 Is that -- does that just apply to the cost 9 tracking and not to allocation? 10 MR. McKAY: Correct. It's an accumulation of costs or the tracking of it, not the allocation. It's 11 12 never been specifically called out to be allocation. 13 CHAI RMAN BOYER: Thank you. Since there are 14 no other questions from the Commissioners, do any of 15 the parties wish to do any cross examination of any of 16 those who have spoken in favor of the -- or any 17 redi rect? Okay. Very well. We'll be in recess then 18 19 until 12:00. Ms. Bell, did you --20 21 MS. BELL: I'm aware -- I believe Mr. McKay 22 may have one comment he would like to maybe --23 MR. McKAY: Maybe I'm asking a procedural, so I'll ask it as a question. And maybe it's premature, 24 25 too, because we need to have a opportunity for the 78

Γ

1	public witness.
2	But I'm really curious, recognizing that I
3	want to keep our commitment as it relates to the
4	stipulation, of how we would proceed forward in making
5	sure that we're meeting and providing the document to
6	this Commission by the 15th of June.
7	And didn't know if that's something we need
8	to be waiting for as far as the Commission's
9	indication or of acceptance of this stipulation, or
10	we how that would go forward. And maybe that's a
11	legal issue.
12	CHAIRMAN BOYER: Well, I don't want to tip
13	our hand at this moment. I think we'll just have
14	to we will work expeditiously to get the order out
15	on this stipulation.
16	But if there's nothing else, let's be in
17	recess then until 12:00. We'll see if anyone from the
18	public wishes to speak. And thank you for your
19	participation. We'll see you then.
20	(A recess was taken from 11:41 to 12:09 p.m.)
21	CHAIRMAN BOYER: Any members of the public
22	shown up?
23	Okay. We noted at this time that we'd start
24	at 12 and continue until we finished, but it looks
25	like we'll finish earlier than we anticipated.
	79

1	We did have an opportunity to discuss the
2	case and the stipulation and are prepared to order
3	from the bench on this one our ruling, which is we
4	will approve the stipulation as presented.
5	And we'll ask the Company if they would
6	prepare a first draft of the order, circulate it among
7	the parties. And we'll put our finishing touches on
8	it and issue it ASAP.
9	Thank you all for your participation.
10	MS. BELL: Thank you.
11	CHAIRMAN BOYER: Have a good day.
12	(The hearing was concluded at 12:10 p.m.)
