Public Service Commission (cc. Becky, Jamie, Carol, et.al.):

I wish to inquire how I can provide a report with relevant data for the docket of S.B. 275.

Because the investigation focuses on improving air quality through the use of alternative fuel vehicles, I purport that it is crucial to compare which drivetrains are actually the cleanest and most efficient —so that the legislature can modify the Utah tax incentives accordingly.

Here is the report itself:

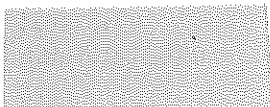

http://www.casteyanqui.com/ev/leaf_vs_cng_2013/index.html

I will also attach a PDF version to this e-mail.

Am I to submit paper copies of this report to the commission, according to the "filing requirements" on your webpage? Please forgive my naïvete, but as a mere private citizen, I am unfamiliar with the established procedureds and rules for providing input on such matters.

I hope to hear from you soon,

Mark D Larsen
