

P.S.C.U. Docket No. 13-057-05

Data Request No. 2.10

Requested by Division of Public Utilities

Date of QGC Response August 12, 2013

DPU 2.10 Please provide an estimated completion date and total cost estimate for the proposed intermediate high pressure replacement program.

Answer: The total estimated cost to replace the intermediate high pressure mains identified in QGC Exhibit 1.10 is \$100 to \$115 million dollars. If \$10 million were to be spent a year, the replacement program could be completed in roughly 10 to 12 years.

Prepared by: Brad Hasty, General Manager Engineering & Project Management, Questar Gas Company
