Re: *Confidential Presentation from April 28, 2015 Annual Infrastructure Tracker Reporting Meeting; Docket No. 14-057-29*

Dear Mr White:

I am forwarding the powerpoint presentation referenced above to you in both confidential and redacted format, for your convenience. The presentation is submitted as a confidential document pursuant to the Utah Public Service Commission's (Commission) Rules, Utah Admin. Code R746-100-16, and the Government Records Access and Management Act (GRAMA), Utah Code Ann. 63G-2-101 *et seq.*

Section 63G-2-305 of GRAMA protects certain records from disclosure. Specifically, it provides that, with some exceptions, a record is "protected" if the disclosure of the record "would identify real property . . . under consideration for public acquisition before any rights to the property are acquired. . . ." Utah Code Ann. 63G-2-305.

The confidential portions of the referenced presentation set forth Questar Gas' prioritization for pipeline replacement. This data includes the locations of the pipelines identified to be replaced and the current prioritization for such replacement. Because such replacements often include property right acquisition for relocation and/or workspace, and because none of the enumerated exceptions to the above-referenced provision apply, disclosure of the geographic location and prioritization of these lines, together, should be considered protected pursuant to GRAMA.

Questar Gas Company respectfully provides this written claim of confidentiality and its reasons supporting that claim to the Commission, and respectfully requests that the Commission maintain these documents as confidential in accordance with the statutes and regulations referenced herein.

Sincerely,

Jennifer Nelson Clark
