Re: Docket No. 15-057-19  
(Compliance with the Report and Order in Docket No. 13-057-05  
Infrastructure Rate Adjustment Mechanism Pilot Program)

Dear Commissioners:

Pursuant to the Report and Order approving Partial Settlement Stipulation in Docket No. 13-057-05 (Order), Questar Gas Company (Questar Gas or the Company) respectfully submits the following attachments:

Confidential Attachment 1: The High Pressure (HP) Feeder Line Master List (HP Master List)  
Confidential Attachment 2: The current HP Feeder Line replacement schedule (HP Schedule)  
Confidential Attachment 3: The intermediate high pressure (IHP) belt line Master List (IHP Master List)  
Confidential Attachment 4: The current IHP belt line replacement schedule (IHP Schedule)

All of these documents are subject to change according to the terms and conditions set forth in the Order and the Partial Settlement Stipulation.

Paragraph 22 of the Partial Settlement Stipulation requires the Company to explain any material changes to the HP Schedule and the IHP Schedule. As explained in the April 14, 2016 annual infrastructure technical conference, there are no material changes in the project schedules for 2017 and beyond, however the ending date of replacement for high pressure has been extended two years to 2030 based on currently allowed annual investment. Any changes to the 2016 construction schedule have been and will continue to be addressed in the quarterly variance reports that the Company files pursuant to Paragraph 22(c) of the Partial Settlement Stipulation.

The attached documents are shown in both confidential and redacted format, for your convenience. The documents are submitted as confidential documents pursuant to the Utah Public Service Commission's (Commission) Rules, Utah Admin. Code R746-100-16, and the Government Records Access and Management Act (GRAMA), Utah Code Ann. 63G-2-101 et seq. If you or your staff has additional questions concerning these reports, please contact me.

Sincerely,

Barrie L. McKay  
Vice President  
Regulatory Affairs/Energy Efficiency
