

EXHIBIT ____ (LK-5)

REDACTED

(CONF Attachment to OCS 3.08 has been removed)

OCS 3.08 Refer to the response to OCS 2.15.

- a. Please confirm that the Applicants have provided all responsive studies, analyses, and reports and that there are not documents, electronic or hard copy) that address the integration process and/or progress. If this is not correct, then please provide all studies, analyses, and reports responsive to the request.
- b. Please provide all documents related to the integration process, including planning and implementation. This request encompasses all meetings, correspondence, analyses, and reports.

Answer: The Applicants object to this request on the grounds that it is overly broad, voluminous and unduly burdensome. Information for this request would potentially require an inordinate number of interviews as well as an IT search for emails or other electronic communications in order to identify and locate all such information.

Notwithstanding such objection, the Applicants respond as follows. A description of the integration process was provided as part of the Applicants' presentation given at the April 28, 2016 Utah Technical Conference (slides 13 and 14). There has been no formal study completed on the integration process. The integration process is a work in progress and the plan for integration is constantly evolving. Commencing in mid-April, the Integration Team has held weekly update meetings and has provided biweekly reports on the progress of the integration team to management. These reports provide a summary of the planning work to date and copies of all such biweekly reports are attached hereto as OCS 3.08 Confidential Attachment 1. These reports are preliminary and changing on a regular basis as the integration process is still in the analysis phase. As material components of the integration plan are finalized, Applicants will provide updated information.
