

MDR_22 D.6 Miscellaneous Information.

Affiliates. A copy of cost allocation manuals and/or policies and procedures that set forth the detailed cost allocation methodology and/or pricing methodology used to charge costs between affiliates that have changed since the filing of the prior general rate case.

Answer: Attached as MDR_22 D.06_Attach1 is a summary of the allocation procedures/factors that are currently in use.

No changes were made to allocation methodologies except for telecommunication charges billed from Questar Pipeline Company to all affiliates. Beginning in January 2015, telecom costs were allocated to affiliates based upon new metrics, lowering the allocation percentage to Questar Gas from 73% in 2014 to 62% in 2015. The new allocation metrics include Low Band radio costs on the number of radios, InMotion costs on the number of units, RTU costs on the number of units, SMR costs on the number of radios, and Network costs on the number of Ports.
