Re: Docket Nos. 16-057-T01

Dear Mr. Widerburg:

Questar Gas Company (Questar Gas or Company) hereby submits a tariff sheet pursuant to section 8.07 of the Company's tariff. The Company is required to update the carrying charge by March 1 of each year. The carrying charge is calculated using the average of the annual Aaa and Baa corporate interest rate for the previous year as published by the Federal Reserve Board of Governors. The adjusted average of both Aaa and Baa interest rate affects the following six accounts: Pipeline Distribution and Integrity, Demand Side Management, Gas Balancing Account, Energy Assistance, Conservation Enabling Tariff, and customer deposits. The Aaa and Baa historical rates for 2015 are 3.89 and 5.00, respectively. The average Aaa and Baa interest rate for 2015 is 4.45%. The carrying charge will be effective March 1, 2016 through February 28, 2017.

Attached is a proposed tariff sheet in both legislative and clean format reflecting an update to the 2015 average rate of 4.45%. The sheet will have an effective date of March 1, 2016.

Section

8.07 Calculation of Carrying Charge

Upon receipt of the Utah Public Service Commission's acceptance of this tariff sheet, the Company will issue an advice letter to its Utah Tariff Holders of Record informing them of this tariff change.

Sincerely,

Kelly B. Mendenhall
General Manager Regulatory Affairs
