

Table of Contents

1.	EXECUTIVE SUMMARY	1
2.	INTRODUCTION AND BACKGROUND	2-1
	Wexpro II Agreement and Gas-Producing Property Acquisitions	2-8
	Wyoming IRP Process	2-10
	Utah IRP Process	2-11
3.	CUSTOMER AND GAS DEMAND FORECAST	3-1
	System Total Temperature-Adjusted Dth Sales and Throughput	3-1
	Temperature-Adjusted Dth Sales and Throughput Summary	3-1
	Residential Usage and Customer Additions	3-2
	Small Commercial Usage and Customer Additions	3-3
	Non-GS Commercial, Industrial and Electric Generation Gas Demand	3-3
	Firm Customer Design-Peak Day Gas Demand	3-4
	Periods of Interruption	3-4
	Source Data	3-5
	Utah and Wyoming Economic Outlook	3-5
	U.S. Economic Outlook	3-6
	Alternatives to Natural Gas	3-7
	Lost and Unaccounted For Gas	3-9
	Forecast Exhibits	3-11
	Exhibit Numbers	3.1 - 3.11
4.	SYSTEM CAPABILITIES AND CONSTRAINTS	4-1
	Dominion Energy System Overview	4-1
	Ongoing and Future System Analysis Projects	4-2
	System Modeling and Reinforcement	4-3
	Model Verification	4-3
	Gate Station Flows vs. Capacity	4-4
	System Pressures	4-4
	System Capacity Conclusions	4-11
5.	DISTRIBUTION SYSTEM ACTION PLAN (DNG ACTION PLAN)	5-1
	High Pressure Projects:	5-1
	Plant Projects:	5-7
	Intermediate High Pressure Projects:	5-7
	Transponder Replacement Program:	5-8
6.	INTEGRITY MANAGEMENT	6-1
	Activities and Associated Costs for Transmission Lines and Distribution Systems	6-1
	Transmission Integrity Management	6-2
	Distribution Integrity Management	6-4
	Key Performance Integrity Metrics	6-5

	New Regulations	6-5
	Industry and Company Best Practices	6-8
7.	ENVIRONMENTAL REVIEW	7-1
8.	PURCHASED GAS.....	8-1
	Local Market Environment.....	8-1
	Annual Gas Supply Request for Proposal.....	8-2
	Price Stabilization.....	8-3
	Exhibit Number.....	8.1
9.	COST-OF-SERVICE GAS.....	9-1
	Cost-of-Service Modeling Factors.....	9-1
	Producer Imbalances.....	9-4
	Future Resources.....	9-5
	Production Shut-Ins	9-7
	Exhibit Number.....	9.1
10.	GATHERING, TRANSPORTATION, AND STORAGE	10-1
	Gathering and Processing Services.....	10-1
	Transportation Services	10-1
	Firm Peaking Services	10-5
	Storage Services.....	10-7
	Related Issues.....	10-12
	Exhibit Numbers	10.1 - 10.6
11.	SUPPLY RELIABILITY	11-1
	Supply Reliability Needs	11-1
	Supply Reliability Options.....	11-2
	Supply Reliability Conclusions	11-5
12.	ENERGY-EFFICIENCY PROGRAMS.....	12-1
	Utah Energy-Efficiency Results 2017	12-1
	Energy Efficiency Effects on Peak Day & Demand Response.....	12-5
	Wyoming Energy-Efficiency Results for 2017.....	12-7
	Utah Energy-Efficiency Plan for 2018	12-7
	Wyoming Energy-Efficiency Plan for 2018	12-12
	SENDOUT Model Results for 2018.....	12-12
	Avoided Costs Resulting From Energy Efficiency.....	12-13
	Exhibit Number.....	12.1
13.	FINAL MODELING RESULTS	13-1
	Linear Programming Optimization Model.....	13-1
	Constraints and Linear Programming.....	13-1
	Model Improvements	13-2
	Monte Carlo Method.....	13-2
	Natural Gas Prices.....	13-2

	Weather and Demand.....	13-3
	Design-Peak Day and Baseload Purchase Contracts	13-3
	Normal Temperature Case	13-4
	Purchased Gas Resources	13-4
	Cost-of-Service Gas	13-5
	First-Year and Total System Costs	13-5
	Gas Supply/Demand Balance	13-5
	Shut-in Scenario Analysis.....	13-5
	Exhibit Numbers	13.1 - 13.90
14.	GENERAL IRP GUIDELINES/GOALS FOR GAS SUPPLY AND ENERGY EFFICIENCY RESOURCES	14-1
