Hello, Ms. Spencer:

When I sent my reply to the PSC prior to their deadline, I made an assumption that they would automatically inform everyone that I had, in a timely fashion, replied to your answer to my initial formal complaint. The nice person at the PSC told me this morning that they do so by posting it on the Docket, but they do not forward it to anyone. Nevertheless, you may have already seen my reply on the PSC website, because it was posted 15 Jan 2019. If not, I've attached it here for your perusal.

Thank you for your understanding - and by the way, if Dominion Energy is full-out busting their tails to get an equally convenient replacement NGV station in the south end of the Salt Lake Valley for the one that was demolished off 90th South, you'll have one real happy customer here. I invite Dominion Energy to convince the NGV driving public that it means what it says when it uses the word "focused" on their website:

"With growing public concern over high gasoline prices, dependence on foreign-oil imports, climate change and air quality, Dominion Energy is *focused on providing safe, clean-burning natural gas for vehicles in Utah*. There currently are about 40 natural gas vehicle (NGV) fueling stations within our service area, and we operate 27 of these stations." (www.dominionenergy.com)

Respectfully,
Scott Soulier
