P.S.C.U. Docket No. 19-057-02 Data Request No. MDR\_22 B.04 Requested by R746-700-22 Date of DEU Response: July 1, 2019

- MDR\_22 B.04 **Workpapers.** The information shall provide the forecast workpapers (including assumptions, spreadsheets and tests).
- Answer: Workpapers are provided for the forecast of labor costs and capital expenditures. With each attachment is a list of the files associated with that attachment and their descriptions.

MDR\_22 B.04\_Attach1 provides support for labor costs. Actual amounts have been provided for 2017, 2018 and for the first three months of 2019. This forecast was adjusted to replace the first three months with actual amounts (see 2019 3+9 sheet). The 2020 forecast has also been provided. Labor expense increased from 2017 to 2018 due to the change in how allowed time is coded. A general labor increase of 3.0% is used for 2020, which occurs in March of each year to reflect the effective date of employee merit increases. The 3% increase for 2020 is consistent with past merit increases for DEU employees (see MDR 22 D.24). Additionally, the company changed accounting systems at the beginning of 2018, which changed the method of how certain accounts are classified. MDR\_22 B.04\_Attach2 contains the capital expenditure and budget information.

Prepared by: Mike Rawlins, Senior Financial Analyst, Dominion Energy Utah

69	Percent Increase		21.4%	-0.3%	-0.6%

<u>Note:</u> The Company changed accounting systems at the beginning of 2018 which resulted in changing the method of how certain accounts are classified. Labor expense increased from 2017 to 2018 due to the change in how allowed time is coded. This change has resulted in variances that may not be consistent with 2017.

1/ In 2019 Dominion Energy offered an early retirement incentive. There are 87 employees who took the incentive. This reflects the anticipated savings related to these retirements.

P.S.C.U. Docket No. 19-057-02 Data Request No. MDR\_22 B.04 Requested by R746-700-22 Date of DEU Response: July 1, 2019

- MDR\_22 B.04 **Workpapers.** The information shall provide the forecast workpapers (including assumptions, spreadsheets and tests).
- Answer: Workpapers are provided for the forecast of labor costs and capital expenditures. With each attachment is a list of the files associated with that attachment and their descriptions.

MDR\_22 B.04\_Attach1 provides support for labor costs. Actual amounts have been provided for 2017, 2018 and for the first three months of 2019. This forecast was adjusted to replace the first three months with actual amounts (see 2019 3+9 sheet). The 2020 forecast has also been provided. Labor expense increased from 2017 to 2018 due to the change in how allowed time is coded. A general labor increase of 3.0% is used for 2020, which occurs in March of each year to reflect the effective date of employee merit increases. The 3% increase for 2020 is consistent with past merit increases for DEU employees (see MDR 22 D.24). Additionally, the company changed accounting systems at the beginning of 2018, which changed the method of how certain accounts are classified. MDR\_22 B.04\_Attach2 contains the capital expenditure and budget information.

## Western Distribution **Executive Summary and Key Assumptions**

Growth

- Dependent on new customer connections •
  - Driven by economic development (jobs, new homes, multi-family)
- Rate case filings •
  - General rate case will be filed 2019, effective March 1, 2020 0
  - General rate case to be filed 2022, with rates effective January 1, 2023 0
- spend from 2018 2022; subject to commission approval LNG facility (supply reliability) •
  - Ensures system reliability during critical peak-need periods across growing customer base 0
  - Utah Public Service Commission project approval decision expected 2019 0
  - Estimated construction completion Q4 2022 0
- Southern System Expansion from 2020 2023 •
- Supply gas to fast growing region; dependent on customer growth in the southern region (St. George 0 603
  - Phase 1 (Northern Tie) proposed completion 2020 with estimated capex of 0
  - Phase 2 (FL 81 Loop Section I) proposed completion 2022 with estimated capex of 0 in 2022 and
  - Phase 3 (FL 81 Loop Section II) proposed completion in 2024 with estimated capex of in 2023 0 in 2024 and

## Western Distribution **Executive Summary and Key Assumptions**

- Utah customer growth forecast at ~2.2%; approximately 24,000 customers/year •
  - \$297 pre-tax reform margin per sales customer per year in Utah/Idaho revenue decoupling 0 mechanism
  - \$454 pre-tax reform margin per sales customer per year in Wyoming revenue decoupling 0 mechanism
    - Revenue per customer = total # of sales customers x allowed margin per customer
    - RULE Allowed revenue per customer is determined in rate case based on expenses, rate base 746 allowed return, and customer count .601
- Infrastructure replacement tracker no regulatory lag •
  - Tracker spend of \$65M \$71M annually Ο
  - Increase tracker investment \$10M beginning in 2020, pending approval Ο
- Other
  - BU continues to manage O&M costs: restructuring, best practice sharing, process Ο improvement
  - CNG sales forecast to decline as existing CNG vehicles age and are not replaced Ο
  - Excludes Alternative Fuel Tax Credit on CNG sales ~\$1M annually if approved by Congress Ο

## Western Gas Distribution **Growth Projects – New Investment** in Reliability and Capacity

#### Northern Utah: On-System LNG Facility\* •

- Project submitted to Public Service Commission for pre-approval-decision expected 2019
- Property purchase rights have been acquired
- Capex: 0
- o In-Service Q4 2022
- Ensures system reliability during critical peakneed periods across growing customer base
- On-system supply provides ability to maintain service during supply disruptions

## Southern Utah System Expansion\*\*

- Provides needed capacity to fastest growing county in the Western Gas Distribution system
- Phase 1 in 2020 (Northern Tie), Capex:
- Phase 2 (FL81 Loop Section 1), Capex: 2021 2022
- Phase 3 (FL81 Loop Section 2) Capex : 2023: 2024

- Additional Capex in 2020 and 2022
  - \$41.7M additional capex spend in 2020 to reinforce system for growth and to accelerate 2 integrity initiatives
    - Includes \$10M increase in infrastructure replacement tracker\*, \$10M for a new gate station, and \$10M for automatic shutoff valves around fault lines and highconsequence areas
  - \$22M additional capex spend in 2022 to reinforce system for growth and to accelerate integrity initiatives

## Western Gas Distribution Regulatory – Approved \$ Per General Sales Customer

Collection of margin per sales customer follows customer usage pattern Utah is more densely populated than Wyoming resulting in a lower rate

## Western Gas Distribution Regulatory – Rate Case Overview

## 2019 Rate Case Filing - Overview

## <u>Utah</u>

- Company can file in UT on July 1, 2019 with a March 1, 2020 effective date
- UT law allows for fully forecasted test period
- Fully forecasted 18 month test period based on average rate base
- UT law allows cost recovery 240 days from time of filing

## Wyoming

- WY has no law concerning test period but has allowed a year-end forecast in the year the rate case is filed
- March 1, 2020 filing date with January 1, 2021 rate effective date (could alternatively file 3Q 2019 with a year-end 2019 test period)

## 2022 Rate Case Filing - Overview

## <u>Utah</u>

- Company to file in UT in 2022 with a January 1, 2023 effective date
- UT law allows for fully forecasted test period
- Fully forecasted 18 month test period based on average rate base
- UT law allows cost recovery 240 days from time of filing

### Wyoming

- WY has no law concerning test period but has allowed a year-end forecast in the year the rate case is filed
- March 1, 2022 filing date with January 1, 2023 rate effective date

## Wrap-up

HIGHLY CONFIDENTIAL: SUBJECT TO UTAH PUBLIC SERVICE COMMISSION

RULE 746-601 TO 603

#### MDR\_22 D.41 Miscellaneous Information.

Financial – Strategic Plans. Copies of completed strategic plans and the most recent plan approved by the Board of Directors for the utility and the plan that was utilized at the time of and in the preparation of its application, if different.

Answer: Please refer to MDR 22 D.14.

Prepared by: Scott Chandler, Manager - Finance, Dominion Energy

P.S.C.U. Docket No. 19-057-02 Data Request No. MDR\_22 D.42 Requested by R746-700-22 Date of DEU Response: July 1, 2019

#### MDR\_22 D.42 Miscellaneous Information.

Penalties and Fines. A list of penalties and fines in the Base Year and the Test Period and indicate in which accounts the associated amounts are included.

Answer: The only fine identified in the referenced period was from the Division of Water Quality for \$3,750 in November 2018. The charge was booked to Account 932 – Maintenance of General Plant.

Prepared by: Nancy Fines, Manager – Gas Infrastructure Accounting, Dominion Energy

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 3.02 Requested by the Office of Consumer Services Date of DEU Response September 3, 2019

- OCS 3.02: Pensions. Refer to DEU Exhibit 3.0, lines 533 536. Also refer to DEU Exhibit 3.30. Please provide what the total pension costs and the pension expense/(income) would be on a total DEU and on a Utah jurisdictional DNG basis for each year, 2018 actual, 2019 forecast and 2020 forecast if the \$75 million contribution that was funded by Dominion Energy, Inc. had not been made. Include all workpapers, studies and analysis used to determine the amounts.
- Answer: The \$75M contribution reduced the pension cost by approximately \$6.6M for Questar Corporation and \$4.3M for Dominion Energy Utah. This estimate was calculated by applying the Expected Return on Plan Assets (EROPA) of 8.75% as of 12/31/2017 and 12/31/2018 by the \$75,000,000. 65.62% was allocated to Dominion Energy Utah in 2017 and can be used for purposes of providing an estimate. In addition, the percentage expensed was 53.79% based on labor activity.

Applying this EROPA each year since the contribution would result in the following estimate for pension expense reduction related to the contribution:

			Allocated Credit	Percentage
	Fund Level	EROPA at	to DEU	Expensed
	Contribution	8.75%	(65.62%)	(53.79%)
2017	75,000,000	6,562,500	4,306,404	2,316,415
2018	81,562,500	7,136,719	4,683,214	2,519,101
2019	88,699,219	7,761,182	5,092,995	2,739,522
2020	96,460,400	8,440,285	5,538,632	2,979,230

Prepared by: Rebecca C. McGhee, Supervisor, Corporate Accounting

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 3.08 Requested by the Office of Consumer Services Date of DEU Response September 3, 2019

- OCS 3.08: Pension. Please provide the total amount included in rate base in Questar Gas Company's two most recent litigated rate cases for pension assets, pension liabilities, OPEB assets and OPEB liabilities. If such assets and/or liabilities were not included as a component of rate base in either of the Company's two most recent litigated rate cases, explain, in detail, why not? Additionally, if such assets and/or liabilities were not included as a component of rate cases, explain, in detail, why not? Additionally, if such assets and/or liabilities were not included as a component of rate base in either of the Company's two most recently litigated rate cases, explain, in detail, why it is shown as a component of rate base on DEU Exhibit 3.02.
- Answer: The Company's previous two litigated rate cases treated pension assets and liabilities similarly to what was explained in the response to OCS 3.07. The pension expense was included while the pension asset was excluded. Please refer to the explanation for including the pension asset in OCS 3.07 and OCS 3.05.

Prepared by: Jordan K. Stephenson, Manager, Regulation

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.03 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.03: Budgets. Refer to DEU Exhibit 3.09. Please provide the budgeted Operating & Maintenance expense for 2019 and 2020 on a comparable basis to the budgeted Operating & Maintenance expense on lines 7 11 of this exhibit. For example, the exhibit identifies the 2017 and 2018 budgeted Operating & Maintenance expense as \$136,212,673 and \$146,593,733, respectively.
- Answer: The total O&M for 2019 and 2020 can be found in MDR\_22\_D.12 Attach1 in the "2019 and 2020 Budget" tab. This provides annual and monthly amounts. Column AC and AD, rows 62-72 provide the budgeted O&M totaling to \$146,212,943 and \$142,425,169 for years 2019 and 2020 respectively.

Prepared by: Scott B. Chandler, Manager, Financial & Business Services

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.04 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.04: Budgets. Refer to the attachment provided in response to MDR D.12, which provided the annual operating budgets for 2018, 2019 and 2020. The attachment shows that the budgeted "Operation & Maintenance," "BU Managed Service Company," and "DRS Managed Service Co." costs are each budgeted to be lower in 2020 than the 2018 budgeted amounts. For example, the combined total of these three items was \$149.57 million in the 2018 budget and \$142.42M in the 2020 budget. Considering the 2020 budgeted expenses for these three categories are approximately \$7.15 million lower than the 2018 budgeted expenses, explain why the Company is proposing to inflate the 2018 non-labor O&M expenses by the inflation factors found in the Global Insight Power Planner report.
- Answer: As a general rule in prior rate cases, the non-labor O&M has not been based on budgets, but rather historical actuals adjusted for known and measurable changes. The referenced budget amounts represent an adjustment for efficiency goals across the broader corporation. Though the Company strives to increase efficiencies and manage O&M costs, the budget does not reflect adjustments for known and measurable items. The regulatory filing is based on 2018 actual costs and adjusting for known items. These items include millions of dollars in VRP savings and the \$500,000 in "Own your own future" initiatives.
  - Prepared by: Scott B. Chandler, Manager, Financial & Business Services Michael Gill, Engineering and Project Manager

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.05 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.05: Budgets. Refer to the attachment provided in response to MDR D.12, which provided the annual operating budgets for 2018, 2019 and 2020. The budgeted "Operation & Maintenance," "BU Managed Service Company," and "DRS Managed Service Co." expenses are \$142,425,169 for 2020 on a combined basis. Company Exhibit DEU 3.10, page 2 of 2, shows the "2020 Total O&M" as \$146,502,353 (excludes the -\$500,000 "Cost Savings Initiatives" as it is not carried forward to the O&M adjustment on Exhibit DEU 3.03). Does the Company currently anticipate that its 2020 O&M expenses will be lower than the O&M expenses included in its adjusted test year in this case? If yes, then please explain why the Company is escalating the non-labor O&M expenses in this case. If no, then explain why not considering the 2020 budgeted amounts.
- Answer: As a general rule in prior rate cases, the non-labor O&M has not been based on budgets, but rather historical actuals adjusted for known and measurable changes. The referenced budget amounts represent an adjustment for efficiency goals across the broader corporation. Though the Company strives to increase efficiencies and manage O&M costs, the budget does not reflect adjustments for known and measurable items. The regulatory filing is based on 2018 actual costs and adjusting for known items. These items include millions of dollars in VRP savings and the \$500,000 in "Own your own future" initiatives.

Prepared by: Scott B. Chandler, Manager, Financial & Business Services

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.06 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.06: Budgets. Refer to the attachment provided in response to MDR D.12, which provided the annual operating budgets for 2018, 2019 and 2020. Do the budgeted "Operation & Maintenance," "BU Managed Service Company," and "DRS Managed Service Co." expenses for 2020 contained in the attachment include the impacts of the Voluntary Retirement Program? If not, does the Company have an updated 2020 budget that has been revised to reflect the impacts of the Voluntary Retirement Program? If such an updated budget exists, please provide a copy of the updated version.
- Answer: The 2020 budget information provided in MDR D.12 does not include the impacts of the VRP. It was created prior to the VRP announcement. See file OCS 4.06 Attach1 for an updated 2020 budget that includes the impact of the VRP.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.13 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.13: Expenses. Refer to the response to OCS 1.13. Please explain the difference between the \$1,053,567 of charges from Deloitte & Touche for 2018 identified in MDR D.33 and the \$380,200 identified in response to OCS 1.13(b) as Deloitte & Touche audit services for 2018.
- Answer: A monthly accrual estimate of \$87,500 (totaling \$1,053,567) was recorded on DEU's books in 2018. This estimate included a fee for the Questar Gas Audit (the \$380,200 referenced above) as well as an estimate for DEU's allocated portion of the Dominion Energy, Inc. Integrated Audit. It was decided that the fees associated with the Integrated Audit be paid and charged to the various Dominion registrant companies only, and therefore, DEU was not allocated or charged a portion of these fees. The difference of \$673,367 will be credited back to DEU in September 2019.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 4.21 Requested by the Office of Consumer Services Date of DEU Response September 6, 2019

- OCS 4.21: Rate Base Plant. Does the Company have a more detailed capital budget in support of the projected 2020 capital expenditures of \$277,702,231 than the single page provided in response to MDR B.04, Attachment 2, under the "2020 Forecast" tab? If yes, please provide the 2020 capital expenditures budget in the most detailed format available. If the support being provided in this response does not include projects that total \$277,702,231, please provide a reconciliation between the additional support being provided and the \$277.7 million of 2020 capital expenditures forecasted in the Company's filing.
- Answer: The capital budget provided as part of Attachment 2 of MDR B.04 is the most detailed 2020 budget currently available.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.20 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.20: Working Capital. Please describe, in detail, the impact of bonus depreciation on the calculation of the federal income tax lag days included in the 2017 Lead Lag study and on the overall net lag days of 7.358.
- Answer: The net lag days is reduced by 4.227 days if the federal income tax is eliminated.

Prepared by: Damir Sabanovic, Regulatory Analyst II, Dominion Energy Utah

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.21 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.21: Working Capital. Please describe, in detail, the impact of bonus depreciation on the calculation of the state income tax lag days included in the 2017 Lead Lag study on the overall net lag days of 7.358.
- Answer: The net lag days is reduced by 0.576 days if the state income tax is eliminated.

Prepared by: Damir Sabanovic, Regulatory Analyst II, Dominion Energy Utah

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.23 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.23: Working Capital. Refer to DEU Exhibit 3.27, specifically the page for "Income Tax Payments 2017 (Payment)/Refund." Please provide similar calculations based on the 2018 tax year instead of the 2017 tax year. As part of this response, please also indicate if the calculation is consistent with Section 3 of the "Consolidated Federal Income Tax Allocation Agreement Among Members of the Dominion Resources, Inc. Affiliated Group", which was provided with the response to MDR D.05. If not consistent with the agreement, please explain why not.
- Answer: Please see attached OCS5.23 Attachment 1 for 2018 tax year federal and state income tax payments. The cash settlements are consistent with the requirements explained in the Federal Income Tax Allocation Agreement Among Members of the Dominion Resources, Inc. Affiliated Group document.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.28 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.28: Working Capital. Refer to DEU Exhibit 3.27, specifically the page for "Income Tax Payments 2017 (Payment)/Refund." Please explain, in detail, why the 2017 State Income Tax amounts were negative amounts in total.
- Answer: Dominion Energy Utah incurred a taxable loss in 2017 largely related to bonus depreciation. This resulted in refunds of cash taxes for state tax purposes.

Prepared by: James F. Gabbert, Manager, Tax

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.29 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.29: Working Capital. Refer to DEU Exhibit 3.27, page 1.1.1. Please explain, in detail, why the depreciation expense is being included as a negative expense in the study.
- Answer: The depreciation figure had been linked to a query that was negative, and the sign should have been changed. The depreciation expense should be a positive number.

Prepared by: Damir Sabanovic, Regulatory Analyst II, Dominion Energy Utah

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.30 Requested by the Office of Consumer Services Date of DEU Response September 10, 2019

- OCS 5.30: Working Capital. Refer to DEU Exhibit 3.27, page 1.1.1. The "Total Expense Lag" for the "Amount for Lead-Lag" column totaling \$761,059,925 does not include the (\$72,191,050) shown for "Depreciation & DIT Lag". However, the "Total Expense Lag" for the "Dollar Days" column does include the (\$2,588,554,474) shown for "Depreciation & DIT Lag." Please explain, in detail, why the "Depreciation & DIT Lag" amounts are included in the "Dollar Days" but not in the "Amount for Lead-Lag" in calculating the net expense lag days.
- Answer: The Company agrees that the total should include the Depreciation & DIT Lag.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.31 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.31: Working Capital. The testimony of Jordan K. Stephenson, DEU Exhibit 3.0, at lines 434 through 448 explains why the Company added depreciation and deferred income taxes to the lead-lag study. DEU Exhibit 3.27 shows "Depreciation & DIT Lag" as part of the calculation of the Net Lag Days. The revenue requirement model provided as DEU Exhibit 4.18, under the tab "ROR Model" shows the calculation of the "Working Capital Cash" component of rate base in rows 1246 1264. In the calculation on DEU Exhibit 4.18, depreciation expense is shown as \$0. Please explain, in detail, why depreciation is being included in the calculation of the net lag days but not in the calculation of the test year working capital component of rate base.
- Answer: The depreciation should be included in the Working Capital Cash calculation.

Prepared by: Damir Sabanovic, Regulatory Analyst II, Dominion Energy Utah

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 5.32 Requested by the Office of Consumer Services Date of DEU Response September 9, 2019

- OCS 5.32: Working Capital. Refer to DEU Exhibit 3.27, page 1.1.1. Does the Company agree that if the Depreciation & DIT Lag is excluded from the determination of the expense lag days, the expense lag days would be 31.90 days instead of the 28.499 days used in the net lag day calculation? If no, please explain why not.
- Answer: Yes, the Company agrees with the statement above.
- Prepared by: Damir Sabanovic, Regulatory Analyst II, Dominion Energy Utah

- OCS 8.01: Rate Base Accumulated Depreciation. Refer to the response to OCS 4.18 and DEU Exhibit 4.18 under the "108\_111 Projection" tab.
  - a. With reference to OCS 4.18(a), please explain why the Company did not "record any proceeds to the 108 in 2018." Additionally, please indicate in what account the proceeds that would normally be recorded in Account 108 were recorded in during 2018 and the amount recorded.
  - b. Please provide the amount included in DEU Exhibit 4.18 under the "108\_111 Projection" tab on line 2 Retirements (row 8) for the retirement of transponders for each year presented.
  - c. Please provide the amount included in DEU Exhibit 4.18 under the "108\_111 Projection" tab on line 7 Proceeds (row 13) associated with the retirement of transponders for each year presented.
  - d. Please provide the amount included in DEU Exhibit 4.18 under the "108\_111 Projection" tab on line 8 Dismantling (row 14) associated with the retirement of transponders for each year presented.

Answer: a. There were no proceeds in 2018.

b. The amount for 2019 is \$27,978,329 and the amount for 2020 is \$12,717,433.

c. Proceeds were estimated using a three-year average percentage of historical proceeds to total retirements. Based on the amounts in part b., the amount of proceeds included in 2019 and 2020 due to the transponder retirements are \$326,833 (-1.35%) and \$148,794 (-1.17%) respectively.

d. Dismantling costs were estimated using a three-year average percentage of historical dismantling to total retirements. Based on the amounts in part b., the amount of dismantling included in 2019 and 2020 due to the transponder retirements is \$4,052,865 (14.49%) and \$1,655,875 (13.02%) respectively.

P.S.C.U. Docket No. 19-057-02 OCS Data Request No. 8.03 Requested by the Office of Consumer Services Date of DEU Response September 24, 2019

- OCS 8.03: Pipeline Integrity Expense. Refer to the response to OCS 4.26 and DEU Exhibit 4.18, specifically the tabs for "Projected Expenses" and "Pipeline Integrity". The response to OCS 4.26 states, in part, that "The month amortization is booked to the 887 account and this amount is not being inflated on the pipeline integrity tab (see row 16)."
  - a. Please confirm that the monthly amortization expense booked to account 887 is included in the "Projected Expenses" tab on excel line 586 (row 687) and that the escalation factor for account 887 is being applied to the amortization expense included in this account.
  - b. Does the Company agree that the amortization expense recorded in Account 887 during the test year should <u>not</u> be inflated? If no, explain, in detail, why not.
- Answer: a. Yes, the pipeline integrity amortization is being expensed to account 887 on row 587 of the projected expenses tab. An inflation factor is being applied to this account, the inflation factor is shown in columns AW and AX for 2019 and 2020 respectively.

b. The Company agrees that the amortization portion of costs included in the Account 887 should not be inflated. It will be replaced with the amount authorized in this Docket, which the Company is proposing increase by \$1,092,326.
