BEFORE THE PUBLIC SERVICE COMMISSION OF UTAH

IN THE MATTER OF THE APPLICATION OF DOMINION ENERGY UTAH COMPANY TO MODIFY THE SUSTAINABLE TRANSPORTATION AND ENERGY PLAN SURCHARGE	Docket No. 21-057-22 APPLICATION TO MODIFY THE STEP SURCHARGE
----------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------

Questar Gas Company dba Dominion Energy Utah (Dominion Energy Utah or the Company) respectfully submits this Application to modify the Sustainable Transportation and Energy Plan (STEP) surcharge, in order to reflect the Step 3 cost-of-service allocations prescribed by the Utah Public Service Commission (Commission) in its Order in Docket No. 19-057-02 (Rate Case Order), and as the Company committed to do in its application in Docket No. 20-057-19.

If the Commission grants this Application, the current annual STEP rates charged to sales customers in the General Service class will be slightly reduced by one one-hundredth of a penny, resulting in an imperceivable annual impact for a typical customer using 80 decatherms per year.

In support of this Application, Dominion Energy Utah states:

1. Dominion Energy Utah's Operations. Dominion Energy Utah, a Utah corporation, is a public utility engaged in the distribution of natural gas primarily to customers in the states of Utah and Wyoming. Its Utah public utility activities are regulated by the Commission, and the Company's rates, charges, and general conditions for natural gas service in Utah are set forth in the Company's Utah Natural Gas Tariff No. 500 (Tariff). Copies of the Company's Articles of Incorporation are on file with the Commission. In addition, the Company serves customers in the Franklin County, Idaho area. Under the terms of an agreement between the Commission and the Idaho Public Utilities Commission, the rates for these Idaho customers are determined by the Utah Commission. Volumes for these customers have been included in the Utah volumes.

2. Background. In the Report and Order dated August 31, 2020 in Docket 19-057-33, the Commission approved a Settlement Stipulation that allows Dominion Energy to provide funding of \$500,000 per year to the University of Utah's Intermountain Industrial Assessment Center (IIAC) for a two-year pilot period. Additionally, the Commission determined that the STEP Balancing Account, carrying charge, and associated Tariff changes should be resolved in a future proceeding.

In Docket No. 20-057-19, the Commission approved a STEP surcharge to collect \$500,000 annually, allocated to all customer classes based on the Commission-approved cost-of-service allocation at the time. In Docket No. 20-057-23, the Company updated the cost-of-service allocation with Step 2 rates pursuant to the Rate Case Order. The Company is now requesting to implement cost-of-service Step 3 rates in Docket No. 21-057-22. The Company has filed, concurrently with this Application, a motion in Docket No. 19-057-02 to implement cost-of-service Step 3 rates.

3. Calculation of the STEP Surcharge. DEU Exhibits 1.1 through DEU Exhibit 1.5 provide the updated calculation of the STEP surcharge. DEU Exhibit 1.1 provides the cost of service allocation of the \$500,000 to the various rate schedules based on the Step-3 cost-of-service that the Commission approved in Docket 19-057-02 and that the Company seeks to implement in its concurrent motion in that same docket. Exhibit 1.2 provides the updated rate calculation for each class. The Cost-of-Service amounts allocated to each class are shown in Column G. The percentage increases necessary to collect the assigned Cost-of-Service amount are shown in Column H. The STEP Surcharge rate calculation is shown in Column I. The resulting changes in the STEP Surcharge rate are shown in column K.

4. Change in Typical Customer’s Bill. The annualized change in rates calculated in this Application results in no material change to the bill for a typical GS residential customer using 80 decatherms per year when rounding to the penny. This is shown in DEU Exhibit 1.3.

5. Legislative and Proposed Tariff Sheets. DEU Exhibit 1.4 shows the legislative and proposed Tariff sheets.

6. Final Tariff Sheet. In addition to this STEP Surcharge Application, the Company is concurrently filing pleadings to adjust rates in the following dockets:

Pass-Through Application	21-057-17
Transportation Imbalance Charge (TIC) Application	21-057-18
Infrastructure Tracker Application	21-057-19
CET Application	21-057-20
Energy Efficiency Application	21-057-21
Low-Income Application	21-057-23
Cost-of-Service Step 3 Rate Implementation	19-057-02

The Company has requested that these pleadings all be approved and made effective November 1, 2021. DEU Exhibit 1.5 reflects the final Tariff sheets that would be effective if the Commission approved all the aforementioned applications.

7. Exhibits. Dominion Energy Utah submits the following exhibits in support of its request to adjust the STEP surcharge:

- DEU Exhibit 1.01 STEP Surcharge COS Allocation
- DEU Exhibit 1.02 STEP Surcharge Calculation
- DEU Exhibit 1.03 Effect on Typical GS Customer
- DEU Exhibit 1.04 Legislative and Proposed Rate Schedules
- DEU Exhibit 1.05 Combined Legislative and Proposed Rate Schedules

WHEREFORE, Dominion Energy Utah respectfully requests the Commission:

1. Enter an order authorizing Dominion Energy Utah to modify rates and charges applicable to its Utah natural gas service that reflect an adjustment for each rate class, and to approve those rates as final rates, as more fully described in this Application; and
2. Authorize Dominion Energy Utah to implement its rates effective November 1, 2021.

RESPECTFULLY SUBMITTED this 1st day of October, 2021.

Peak winter day is defined in Section 11 of this Tariff.) If 3 years of annual usage is not available, the Company may estimate usage or use any available actual usage. Customers with a load factor of 40% or greater qualify for the FS Rate Schedule. Customers with a load factor below 35% do not qualify for FS service. If a customer's load factor falls below 40%, but is greater than 35%, the customer may remain an FS customer for one year, after which such customer must have a load factor of 40% or greater to continue to qualify for FS service.
- (2) Service is subject to a minimum monthly distribution non-gas charge and a monthly basic service fee.
- (3) Minimum annual usage of 2,100 Dth is required.

2.08 CONSERVATION ENABLING TARIFF (CET)

The CET is a mechanism designed to ensure that the Company only collects from GS customers the Commission-authorized revenue per customer. The CET applies only to the GS rate schedule.

DEFERRED ACCOUNT ACCRUAL

The Company shall record monthly over- or under-recoveries of authorized GS DNG revenue in the CET Deferred Account (Account 191.9). The Company may not accrue more than 5% of Base DNG revenue each calendar year ending October. The allowed revenue for a given month is equal to the allowed DNG revenue per customer for that month times the actual number of customers. The monthly accrual (positive or negative) is determined by calculating the difference between the actual billed GS DNG revenue and the allowed revenue for that month.

The allowed GS DNG Revenue per Customer per Month is as follows:

Jan = \$51.383	Apr = \$21.1032	Jul = \$11.3226	Oct = \$17.0146
Feb = \$43.704.10	May = \$15.7487	Aug = \$11.2015	Nov = \$323.7908
Mar = \$35.866.18	Jun = \$12.292	Sep = \$11.660	Dec = \$478.8833

The formula for calculating the accrual each month can be shown as follows:

$$\begin{aligned}
 \text{Allowed Revenue (for each month)} &= \text{Actual GS Customers} \times \text{Allowed Revenue per Customer for that month} \\
 \text{Monthly Accrual} &= \text{Allowed Revenue} - \text{Actual GS Revenue}
 \end{aligned}$$

AMORTIZATION OF ACCRUAL

At least annually, the Company will file with the Commission an application to amortize the balance (positive or negative) in Account 191.9. The balance will be amortized by a uniform percentage increase or decrease to the GS DNG block rates of the magnitude necessary to amortize the balance over one year. The Company may not amortize CET accruals amounting on a net basis to more than 2.5% of total Utah jurisdictional Base DNG GS revenues based on the most recent 12-month period at the time of the amortization.

“TWO-WAY” CARRYING CHARGE

An annual interest rate, as described in § 8.07 Calculation of Carrying Charge, shall be applied monthly to the CET Deferred Account balance, as adjusted for the corresponding tax deferral balance in Account 283. The CET Deferred Account will be increased by the carrying charge during months when the balance in the account represents revenue that is under-collected and reduced when over-collected.

- (7) An MT customer will be required to notify the Company before it proposes to extend service beyond the state of Utah or into a service area designated by the Federal Energy Regulatory Commission (FERC) pursuant to 7(f) of the Natural Gas Act. Such service extension will be cause for termination of MT service by the Company, unless it is demonstrated, prior to service extension, that an order has been issued by the FERC, or any other federal, state or local entity potentially exercising regulatory jurisdiction, showing respectively that the Company will not be subject to the regulatory jurisdiction of the FERC or other federal, state or local entity, and, with respect to an order issued by the FERC, that the Company will not lose any Hinshaw status that it may have. The Company may also terminate MT service commenced upon the issuance of any such order described above if the order is stayed or if an administrative or judicial appeal of such order results in a finding that providing the MT service subjects it to the jurisdiction of the FERC, or other federal, state or local entity, or results in a loss of any Hinshaw status it may have.

- (8) Service is only available for cities where the Company does not have a franchise or an existing distribution system.

- (9) For municipal customers with usage on more than one rate schedule, the usage for different rate schedules must be separately metered and subject to the appropriate administrative charge as provided for in the Administrative Charge paragraph of § 5.01.

2.08 CONSERVATION ENABLING TARIFF (CET)

The CET is a mechanism designed to ensure that the Company only collects from GS customers the Commission-authorized revenue per customer. The CET applies only to the GS rate schedule.

DEFERRED ACCOUNT ACCRUAL

The Company shall record monthly over- or under-recoveries of authorized GS DNG revenue in the CET Deferred Account (Account 191.9). The Company may not accrue more than 5% of Base DNG revenue each calendar year ending October. The allowed revenue for a given month is equal to the allowed DNG revenue per customer for that month times the actual number of customers. The monthly accrual (positive or negative) is determined by calculating the difference between the actual billed GS DNG revenue and the allowed revenue for that month.

The allowed GS DNG Revenue per Customer per Month is as follows:

Jan = \$51.33	Apr = \$21.10	Jul = \$11.26	Oct = \$17.01
Feb = \$43.70	May = \$15.74	Aug = \$11.15	Nov = \$32.79
Mar = \$35.86	Jun = \$12.22	Sep = \$11.60	Dec = \$47.88

The formula for calculating the accrual each month can be shown as follows:

$$\begin{aligned}
 \text{Allowed Revenue (for each month)} &= \text{Actual GS Customers} \times \text{Allowed Revenue per Customer for that month} \\
 \text{Monthly Accrual} &= \text{Allowed Revenue} - \text{Actual GS Revenue}
 \end{aligned}$$

AMORTIZATION OF ACCRUAL

At least annually, the Company will file with the Commission an application to amortize the balance (positive or negative) in Account 191.9. The balance will be amortized by a uniform percentage increase or decrease to the GS DNG block rates of the magnitude necessary to amortize the balance over one year. The Company may not amortize CET accruals amounting on a net basis to more than 2.5% of total Utah jurisdictional Base DNG GS revenues based on the most recent 12-month period at the time of the amortization.

“TWO-WAY” CARRYING CHARGE

An annual interest rate, as described in § 8.07 Calculation of Carrying Charge, shall be applied monthly to the CET Deferred Account balance, as adjusted for the corresponding tax deferral balance in Account 283. The CET Deferred Account will be increased by the carrying charge during months when the balance in the account represents revenue that is under-collected and reduced when over-collected.
