
Energy Efficiency Program Proposal

ThermWise[®] Weatherization Rebates Program

Program Overview

Description

Dominion Energy Utah (Dominion Energy or the Company) is proposing to continue offering the ThermWise® Weatherization Program to Dominion Energy residential GS customers in Utah. A qualifying single-family residence is an existing structure that has 1-3 residential dwelling units. A qualifying multifamily residence is an existing dwelling having four or more residential dwelling units. To qualify for insulation (wall, attic, and floor), air sealing, and duct related rebates, customers will be required to have measures installed by a ThermWise® Authorized Contractor.

For qualifying multifamily residences, a pre-qualification inspection will be required. This program will offer incentives for qualifying weatherization measures. Weatherization measure delivery will leverage the marketing access and existing delivery channels of local businesses, wholesalers, and retailers.

The Company will work with its Authorized Contractors to identify previously completed measures in a premise. If a premise has received rebates and conditions warrant additional attic, floor or wall insulation work to be completed, approval may be granted based on the recommendation from a ThermWise® Home Energy Plan inspection or documented program approval for specific work.

Program Design

Program Measures

Qualifying Customers

Metered existing single-family or multifamily residences in Dominion Energy Utah service territories that are billed on the GS rate schedule are eligible to participate in the ThermWise® Weatherization Rebates program.

Measure Eligibility

To receive a rebate, customers must submit a completed application form within six months of the installation date and provide all required documentation.

A Home Energy Plan will be required for participation in the air-sealing measure (excluding Direct Install contractors). Dominion Energy Home Energy Experts may conduct a blower door test as part of the Home Energy Plan to determine eligibility. Only single-family units will be eligible for the air-sealing program. Participation in any attic related air-sealing will require that customers have a weighted R-value of R-38 or better attic insulation once air-sealing specifications are achieved.

For a complete list of minimum efficiency requirements and rebate amounts, see section 2.14 of the Company's Utah Tariff (DEU Energy Efficiency Exhibit 1.9).

Program Rebates, Projected Participation and Savings

Weatherization measures outlined in Table 1 include the associated available incentive per unit. These measures will be available to residential customers based on measure eligibility requirements.

Table 1. Weatherization Energy Efficiency Projected Participation and Savings

Single Family (1-3 units)		
Measure	Projected Participation	Total Projected Savings (annual Dth)
Window	900	9,423
Wall Insulation	780	2,108
Attic Insulation Tier 1	11,000	35,610
Attic Insulation Tier 2	6,000	2,859
Floor Insulation	185	488
Duct Sealing and Insulation	200	2,192
Air Sealing	11,500	46,298
Pipe Insulation	5	5
Exterior Insulation	5	37
TOTAL Single Family	30,575	99,021
Multifamily (4 or more units)		

Measure	Projected Participation	Total Projected Savings (annual Dth)
Window	5	70
Wall Insulation	10	34
Attic Insulation Tier 1	40	98
Attic Insulation Tier 2	40	41
Floor Insulation	5	12
Duct Sealing and Insulation	5	57
Exterior Insulation	5	37
TOTAL Multifamily	110	348
TOTAL Weatherization Program	30,685	99,369

Rebate Limitations

ThermWise® Weatherization Rebate program limitations are defined in Section 2.14 of the Company’s Tariff (DEU Energy Efficiency Exhibit 1.9).

Implementation

This program is currently in the marketplace. Upon Commission approval, implementation activities will begin for the new program year beginning January 1, 2023.

Administration

The program administration represents the on-going delivery of the program. All internal systems, processes, and procedures have been created and are in place for 2023.
