Re: Docket No. 06-999-03
Rocky Mountain Power's Fossil Fuel Energy Efficiency Standard Plan

On August 10, 2007, the Utah Commission issued its Determination Concerning the PURPA Fossil Fuel Generation Efficiency Standard and adopted the PURPA Fossil Fuel Generation Efficiency Standard. A sample of the Rocky Mountain Power Fossil Fuel Energy Efficiency Standard Plan for the Huntington power plant was provided to the Commission on May 21, 2008. On July 21, 2008, the Commission issued a letter finding the draft plan acceptable and agreeing to Rocky Mountain Power's proposal that a complete plan for all of the plants be filed annually by March 31, with the first full report being due by March 31, 2009. Rocky Mountain Power also committed to provide the most current summary of FERC Form 1 data.

Enclosed for filing is the first full report of the Rocky Mountain Power Fossil Fuel Energy Efficiency Standard for all plants. The report included a heat rate improvement plan for the PacifiCorp system followed by individual plans for each coal fired plant. Heat rate improvement plans are currently not prepared for gas fueled plants. Also included is the most current summary of the FERC Form 1 data

It is respectfully requested that all formal correspondence and staff requests regarding this filing be addressed to:
