Subject: Objection to Ten-digit Dialing

Dear Sir,

I staunchly object to having to look up and track every Utah phone number and dial ten digits instead of seven - forever. I think that is the worst utility commission decision ever. I would much rather be in a region where all telephone owners are inconvenienced for a short time, having to notify my contacts of a new phone prefix and have the state divided into regions that can be well known to have various area codes, as many as needed. Everyone I talk to feels the same. I believe you have ignored the general public's interest. Can this practice be reversed?

Burt Knudson
