Subject: New Telephone Dialing Procedures

Public Service Commission,

I just read in the news today that as of March 1, 2009 all Utah residents will be required to dial the area code when making any phone call - including local calls. If this is true then a mistake has been made in allowing Qwest to do this. Having to dial the area code for local calls is not an improvement in the service being provided by Qwest. Please let me know if this is really going to happen. If yes, I would like to know why the Public Service Commission agreed to it.

Thanks,

David Frandsen
