Item 1. Financial Statements

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
PacifiCorp
Portland, Oregon

We have reviewed the accompanying consolidated balance sheet of PacifiCorp and subsidiaries ("PacifiCorp") as of March 31, 2010, and the related consolidated statements of operations, cash flows, changes in equity and comprehensive income for the three-month periods ended March 31, 2010 and 2009. These interim financial statements are the responsibility of PacifiCorp's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of PacifiCorp and subsidiaries as of December 31, 2009, and the related consolidated statements of operations, cash flows, changes in equity and comprehensive income for the year then ended (not presented herein); and in our report dated March 1, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2009 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

/s/ Deloitte & Touche LLP

PACIFICORP AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) General

PacifiCorp, which includes PacifiCorp and its subsidiaries, is a United States regulated electric company serving 1.7 million retail customers, including residential, commercial, industrial and other customers in portions of the states of Utah, Oregon, Wyoming, Washington, Idaho and California. PacifiCorp owns, or has interests in, a number of thermal, hydroelectric, wind-powered and geothermal generating facilities, as well as electric transmission and distribution assets. PacifiCorp also buys and sells electricity on the wholesale market with public and private utilities, energy marketing companies and incorporated municipalities. PacifiCorp is subject to comprehensive state and federal regulation. PacifiCorp's subsidiaries support its electric utility operations by providing coal-mining services and environmental remediation services. PacifiCorp is an indirect subsidiary of MidAmerican Energy Holdings Company ("MEHC"), a holding company based in Des Moines, Iowa that owns subsidiaries principally engaged in energy businesses. MEHC is a consolidated subsidiary of Berkshire Hathaway Inc.

The unaudited Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and the United States Securities and Exchange Commission's rules and regulations for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the disclosures required by GAAP for annual financial statements. Management believes the unaudited Consolidated Financial Statements contain all adjustments (consisting only of normal recurring adjustments) considered necessary for the fair presentation of the Consolidated Financial Statements as of March 31, 2010 and for the three-month periods ended March 31, 2010 and 2009. The results of operations for the three-month period ended March 31, 2010 are not necessarily indicative of the results to be expected for the full year.

The preparation of the unaudited Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from the estimates used in preparing the unaudited Consolidated Financial Statements. Note 2 of Notes to Consolidated Financial Statements included in PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009 describes the most significant accounting policies used in the preparation of the Consolidated Financial Statements. There have been no significant changes in PacifiCorp's assumptions regarding significant accounting estimates and policies during the three-month period ended March 31, 2010.

(2) New Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2010-06 (“ASU No. 2010-06”), which amends FASB Accounting Standards Codification (“ASC”) Topic 820, “Fair Value Measurements and Disclosures.” ASU No. 2010-06 requires disclosure of (a) the amount of significant transfers into and out of Levels 1 and 2 of the fair value hierarchy and the reasons for those transfers and (b) gross presentation of purchases, sales, issuances and settlements in the Level 3 fair value measurement rollforward. This guidance clarifies that existing fair value measurement disclosures should be presented for each class of assets and liabilities. The existing disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements have also been clarified to ensure such disclosures are presented for the Levels 2 and 3 fair value measurements. PacifiCorp adopted this guidance as of January 1, 2010, with the exception of the disclosure requirement to present purchases, sales, issuances and settlements gross in the Level 3 fair value measurement rollforward, which is effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption did not have a material impact on PacifiCorp’s disclosures included within Notes to Consolidated Financial Statements.

In June 2009, the FASB issued authoritative guidance (which was codified into ASC Topic 810, “Consolidation,” with the issuance of ASU No. 2009-17) that requires a primarily qualitative analysis to determine if an enterprise is the primary beneficiary of a variable interest entity. This analysis is based on whether the enterprise has (a) the power to direct the activities of the variable interest entity that most significantly impact the entity’s economic performance and (b) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the variable interest entity. In addition, enterprises are required to more frequently reassess whether an entity is a variable interest entity and whether the enterprise is the primary beneficiary of the variable interest entity. Finally, the guidance for consolidation or deconsolidation of a variable interest entity is amended and disclosure requirements about an enterprise’s involvement with a variable interest entity are enhanced. PacifiCorp adopted this guidance as of January 1, 2010 on a prospective basis. As a result, PacifiCorp’s coal mining joint venture, Bridger Coal Company (“BCC”), was deconsolidated and is being accounted for under the equity method of accounting as the power to direct the activities that most significantly impact BCC’s economic performance are shared with the joint venture partner. The deconsolidation of BCC resulted in a decrease in assets, liabilities and noncontrolling interest equity as of January 1, 2010 of \$192 million, \$108 million and \$84 million, respectively. These changes included the deconsolidation of: (a) mine reclamation trust funds totaling \$79 million; (b) property, plant and equipment, net totaling \$249 million; and (c) asset retirement obligation liabilities totaling \$79 million. Additionally, as a result of PacifiCorp’s investment in BCC being accounted for under the equity method, an investment of \$168 million was recorded on January 1, 2010.

(3) Property, Plant and Equipment, Net

Property, plant and equipment, net consists of the following (in millions):

	Depreciable Life	As of	
		March 31, 2010	December 31, 2009
Property, plant and equipment in service	5-80 years	\$ 20,127	\$ 20,330
Accumulated depreciation and amortization		<u>(6,471)</u>	<u>(6,623)</u>
Net property, plant and equipment in service		13,656	13,707
Construction work-in-progress		<u>1,857</u>	<u>1,830</u>
Total property, plant and equipment, net		<u>\$ 15,513</u>	<u>\$ 15,537</u>

(4) Regulatory Matters

Rate Matters

Oregon Senate Bill 408

Oregon Senate Bill 408 ("SB 408") requires PacifiCorp and other large regulated, investor-owned utilities that provide electric or natural gas service to Oregon customers to file an annual report each October with the Oregon Public Utility Commission ("OPUC") comparing income taxes collected and income taxes paid, as defined by the statute and its administrative rules. If after its review, the OPUC determines the amount of income taxes collected differs from the amount of income taxes paid by more than \$100,000, the OPUC must require the public utility to establish an automatic adjustment clause to account for the difference.

The OPUC's April 2008 order approving the recovery of \$35 million, plus interest, related to PacifiCorp's 2006 tax report is being challenged by the Industrial Customers of Northwest Utilities, which filed a petition in May 2008 with the Oregon Court of Appeals seeking judicial review of the April 2008 order. PacifiCorp believes the outcome of these proceedings will not have a material impact on its consolidated financial results. The \$35 million, plus interest, was previously recorded in earnings.

In October 2009, PacifiCorp filed its 2008 tax report under SB 408. PacifiCorp's filing for the 2008 tax year indicated that PacifiCorp paid \$38 million more in income taxes than was collected in rates from its retail customers. In January 2010, PacifiCorp entered into a stipulation with OPUC staff and the Citizens' Utility Board of Oregon, agreeing to a lower recovery totaling \$2 million, including interest. In April 2010, the OPUC issued an order adopting the stipulation in its entirety.

(5) Fair Value Measurements

The carrying amounts of PacifiCorp's cash, certain cash equivalents, receivables, payables, accrued liabilities and short-term borrowings approximate fair value because of the short-term maturity of these instruments. PacifiCorp has various financial assets and liabilities that are measured at fair value on the Consolidated Financial Statements using inputs from the three levels of the fair value hierarchy. A financial asset or liability classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The three levels are as follows:

- Level 1 – Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that PacifiCorp has the ability to access at the measurement date.
- Level 2 – Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market corroborated inputs).
- Level 3 – Unobservable inputs reflect PacifiCorp's judgments about the assumptions market participants would use in pricing the asset or liability since limited market data exists. PacifiCorp develops these inputs based on the best information available, including its own data.

The following table presents PacifiCorp's assets and liabilities recognized on the Consolidated Balance Sheet and measured at fair value on a recurring basis as of March 31, 2010 (in millions):

Description	Input Levels for Fair Value Measurements			Other ⁽¹⁾	Total
	Level 1	Level 2	Level 3		
Assets:					
Investments in available-for-sale securities –					
Money market mutual funds ⁽²⁾	\$ 255	\$ -	\$ -	\$ -	\$ 255
Commodity derivatives	-	421	6	(267)	160
	<u>\$ 255</u>	<u>\$ 421</u>	<u>\$ 6</u>	<u>\$ (267)</u>	<u>\$ 415</u>
Liabilities:					
Commodity derivatives	<u>\$ -</u>	<u>\$ (433)</u>	<u>\$ (415)</u>	<u>\$ 363</u>	<u>\$ (485)</u>

(1) Primarily represents netting under master netting arrangements and a net cash collateral receivable of \$96 million.

(2) Amounts are included in cash and cash equivalents, other current assets and investments and other assets on the Consolidated Balance Sheet. The fair value of these money market mutual funds approximates cost.

The following table presents PacifiCorp's assets and liabilities recognized on the Consolidated Balance Sheet and measured at fair value on a recurring basis as of December 31, 2009 (in millions):

Description	Input Levels for Fair Value Measurements			Other ⁽¹⁾	Total
	Level 1	Level 2	Level 3		
Assets:					
Investments in available-for-sale securities:					
Money market mutual funds ⁽²⁾	\$ 123	\$ -	\$ -	\$ -	\$ 123
Debt securities	1	33	-	-	34
Equity securities	36	8	-	-	44
Commodity derivatives	-	285	6	(140)	151
	<u>\$ 160</u>	<u>\$ 326</u>	<u>\$ 6</u>	<u>\$ (140)</u>	<u>\$ 352</u>
Liabilities:					
Commodity derivatives	<u>\$ -</u>	<u>\$ (274)</u>	<u>\$ (386)</u>	<u>\$ 165</u>	<u>\$ (495)</u>

(1) Primarily represents netting under master netting arrangements and a net cash collateral receivable of \$25 million.

(2) Amounts are included in cash and cash equivalents, other current assets and investments and other assets on the Consolidated Balance Sheet. The fair value of these money market mutual funds approximates cost.

PacifiCorp's investments in money market mutual funds and debt and equity securities are accounted for as available-for-sale securities and are stated at fair value. When available, a readily observable quoted market price or net asset value of an identical security in an active market is used to record the fair value. In the absence of a quoted market price or net asset value of an identical security, the fair value is determined using pricing models or net asset values based on observable market inputs and quoted market prices of securities with similar characteristics.

When available, the fair value of derivative contracts is determined using unadjusted quoted prices for identical contracts on the applicable exchange in which PacifiCorp transacts. When quoted prices for identical contracts are not available, PacifiCorp uses forward price curves derived from market price quotations, when available, or internally developed and commercial models, with internal and external fundamental data inputs. Market price quotations are obtained from independent energy brokers, exchanges, direct communication with market participants and actual transactions executed by PacifiCorp. Market price quotations for certain major electricity and natural gas trading hubs are generally readily obtainable for the first six years; therefore, PacifiCorp's forward price curves for those locations and periods reflect observable market quotes. Market price quotations for other electricity and natural gas trading hubs are not as readily obtainable for the first six years. Given that limited market data exists for these contracts, as well as for those contracts that are not actively traded, PacifiCorp uses forward price curves derived from internal models based on perceived pricing relationships to major trading hubs that are based on significant unobservable inputs. Refer to Note 6 for further discussion regarding PacifiCorp's risk management and hedging activities.

Contracts with explicit or embedded optionality are valued by separating each contract into its physical and financial forward, swap and option components. Forward and swap components are valued against the appropriate forward price curve. Option components are valued using Black-Scholes-type models, such as European option, Asian option, spread option and best-of option, with the appropriate forward price curve and other inputs.

The following table reconciles the beginning and ending balances of PacifiCorp's commodity derivative assets and liabilities measured at fair value on a recurring basis using significant Level 3 inputs for the three-month periods ended March 31 (in millions):

	<u>2010</u>	<u>2009</u>
Beginning balance	\$ (380)	\$ (408)
Changes in fair value recognized in regulatory assets	(31)	(17)
Purchases, sales, issuances and settlements	2	(6)
Net transfers (to) from Level 2	-	(21)
Ending balance	<u>\$ (409)</u>	<u>\$ (452)</u>

PacifiCorp's long-term debt is carried at cost on the Consolidated Financial Statements. The fair value of PacifiCorp's long-term debt has been estimated based upon quoted market prices, where available, or at the present value of future cash flows discounted at rates consistent with comparable maturities with similar credit risks. The carrying value of PacifiCorp's variable-rate long-term debt approximates fair value because of the frequent repricing of these instruments at market rates. The following table presents the carrying value and estimated fair value of PacifiCorp's long-term debt (in millions):

	As of			
	<u>March 31, 2010</u>		<u>December 31, 2009</u>	
	<u>Carrying Value</u>	<u>Fair Value</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Long-term debt	<u>\$ 6,357</u>	<u>\$ 6,844</u>	<u>\$ 6,357</u>	<u>\$ 6,843</u>

(6) Risk Management and Hedging Activities

PacifiCorp is exposed to the impact of market fluctuations in commodity prices and interest rates. PacifiCorp is principally exposed to electricity and natural gas commodity price risk as it has an obligation to serve retail customer load in its regulated service territories. PacifiCorp's load and generation assets represent substantial underlying commodity positions. Exposures to commodity prices consist mainly of variations in the price of fuel required to generate electricity and wholesale electricity that is purchased and sold. Electricity and natural gas prices are subject to wide price swings as supply and demand for these commodities are impacted by, among many other unpredictable items, changing weather, market liquidity, generating facility availability, customer usage, storage and transmission and transportation constraints. Interest rate risk exists on variable-rate debt, commercial paper and future debt issuances. PacifiCorp does not engage in a material amount of proprietary trading activities.

PacifiCorp has established a risk management process that is designed to identify, assess, monitor, report, manage and mitigate each of the various types of risk involved in its business. To mitigate a portion of its commodity risk, PacifiCorp uses commodity derivative contracts, including forwards, futures, options, swaps and other agreements, to effectively secure future supply or sell future production generally at fixed prices. PacifiCorp manages its interest rate risk by limiting its exposure to variable interest rates and by monitoring market changes in interest rates. PacifiCorp may from time to time enter into interest rate derivative contracts, such as interest rate swaps or locks, to mitigate PacifiCorp's exposure to interest rate risk. No interest rate derivatives were in place during the periods presented. PacifiCorp does not hedge all of its commodity price and interest rate risks, thereby exposing the unhedged portion to changes in market prices.

There have been no significant changes in PacifiCorp's accounting policies related to derivatives. Refer to Note 5 for additional information on derivative contracts.

The following tables, which exclude contracts that qualify for the normal purchases or normal sales exception afforded by GAAP, summarize the fair value of PacifiCorp's derivative contracts, on a gross basis, and reconcile those amounts to the amounts presented on a net basis on the Consolidated Balance Sheets (in millions):

	As of March 31, 2010				
	Derivative Assets		Derivative Liabilities		Total
	Current	Noncurrent	Current	Noncurrent	
Not Designated as Hedging Contracts ⁽¹⁾⁽²⁾:					
Commodity assets	\$ 283	\$ 60	\$ 10	\$ 64	\$ 417
Commodity liabilities	(91)	(23)	(181)	(553)	(848)
Total	192	37	(171)	(489)	(431)
Designated as Cash Flow Hedging Contracts ⁽¹⁾:					
Commodity assets	10	-	-	-	10
Commodity liabilities	-	-	-	-	-
Total	10	-	-	-	10
Total derivatives	202	37	(171)	(489)	(421)
Cash collateral receivable (payable)	(79)	-	101	74	96
Total derivatives – net basis	<u>\$ 123</u>	<u>\$ 37</u>	<u>\$ (70)</u>	<u>\$ (415)</u>	<u>\$ (325)</u>

As of December 31, 2009

	Derivative Assets		Derivative Liabilities		Total
	Current	Noncurrent	Current	Noncurrent	
Not Designated as Hedging Contracts ⁽¹⁾⁽²⁾:					
Commodity assets	\$ 191	\$ 61	\$ 8	\$ 31	\$ 291
Commodity liabilities	(29)	(17)	(142)	(472)	(660)
Total	<u>162</u>	<u>44</u>	<u>(134)</u>	<u>(441)</u>	<u>(369)</u>
Designated as Cash Flow Hedging Contracts:					
Commodity assets	-	-	-	-	-
Commodity liabilities	-	-	-	-	-
Total	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>
Total derivatives	162	44	(134)	(441)	(369)
Cash collateral receivable (payable)	(54)	(1)	49	31	25
Total derivatives – net basis	<u>\$ 108</u>	<u>\$ 43</u>	<u>\$ (85)</u>	<u>\$ (41.0)</u>	<u>\$ (344)</u>

- (1) Derivative contracts within these categories are subject to master netting arrangements and are presented on a net basis on the Consolidated Balance Sheets.
- (2) PacifiCorp's commodity derivatives not designated as hedging contracts are generally included in regulated rates and as of March 31, 2010 and December 31, 2009, a net regulatory asset of \$429 million and \$367 million, respectively, was recorded related to the net derivative liability of \$431 million and \$369 million, respectively.

Not Designated as Hedging Contracts

For PacifiCorp's commodity derivatives not designated as hedging contracts, the settled amount is generally included in regulated rates. Accordingly, the net unrealized gains and losses associated with interim price movements on contracts that are accounted for as derivatives and probable of inclusion in regulated rates are recorded as net regulatory assets. The following table reconciles the beginning and ending balances of PacifiCorp's net regulatory assets and summarizes the pre-tax gains and losses on commodity derivative contracts recognized in net regulatory assets, as well as amounts reclassified to earnings for the three-month periods ended March 31 (in millions):

	2010	2009
Beginning balance	\$ 367	\$ 442
Changes in fair value recognized in net regulatory assets	32	(73)
Gains reclassified to earnings – operating revenue	21	79
Gains (losses) reclassified to earnings – energy costs	<u>9</u>	<u>(63)</u>
Ending balance	<u>\$ 429</u>	<u>\$ 385</u>

For PacifiCorp's derivatives not designated as hedging contracts and for which changes in fair value are not recorded as a net regulatory asset or liability, unrealized gains and losses are recognized on the Consolidated Statements of Operations as operating revenue for sales contracts, energy costs and operations and maintenance for purchase contracts and electricity and natural gas swap contracts and interest expense for interest rate derivatives. The following table summarizes the pre-tax gains (losses) included on the Consolidated Statements of Operations associated with PacifiCorp's derivative contracts not designated as hedging contracts and not recorded as a net regulatory asset or liability for the three-month periods ended March 31 (in millions):

	<u>2010</u>	<u>2009</u>
Commodity derivatives:		
Operating revenue	\$ -	\$ 3
Energy costs	(1)	-
Operations and maintenance	<u>1</u>	<u>(1)</u>
Total	<u>\$ -</u>	<u>\$ 2</u>

Designated as Cash Flow Hedging Contracts

PacifiCorp uses derivative contracts accounted for as cash flow hedges to hedge electricity and natural gas commodity prices. The gains and losses on these derivative contracts are recognized in other comprehensive income. PacifiCorp recognized pre-tax gains of \$10 million and \$- million on derivative contracts accounted for as cash flow hedges for the three-month periods ended March 31, 2010 and 2009, respectively. Hedge ineffectiveness is recognized in income as operating revenue or energy costs depending upon the nature of the item being hedged. For the three-month periods ended March 31, 2010 and 2009, hedge ineffectiveness was insignificant. As of March 31, 2010, PacifiCorp had cash flow hedges with expiration dates extending through December 31, 2010 and \$10 million of pre-tax net unrealized gains forecasted to be reclassified from accumulated other comprehensive income into earnings over the next twelve months as contracts settle.

Derivative Contract Volumes

The following table summarizes the net notional amounts of outstanding derivative contracts with fixed price terms that comprise the mark-to-market values as of March 31 (in millions):

	<u>Unit of Measure</u>	<u>2010</u>	<u>2009</u>
Commodity contracts:			
Electricity sales	Megawatt hours	(21)	(22)
Natural gas purchases	Decatherms	188	220
Fuel purchases	Gallons	11	6

Credit Risk

PacifiCorp extends unsecured credit to other utilities, energy marketers, financial institutions and other market participants in conjunction with wholesale energy supply and marketing activities. Credit risk relates to the risk of loss that might occur as a result of nonperformance by counterparties on their contractual obligations to make or take delivery of electricity, natural gas or other commodities and to make financial settlements of these obligations. Credit risk may be concentrated to the extent that one or more groups of counterparties have similar economic, industry or other characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in market or other conditions. In addition, credit risk includes not only the risk that a counterparty may default due to circumstances relating directly to it, but also the risk that a counterparty may default due to circumstances involving other market participants that have a direct or indirect relationship with the counterparty.

PacifiCorp analyzes the financial condition of each significant wholesale counterparty before entering into any transactions, establishes limits on the amount of unsecured credit to be extended to each counterparty and evaluates the appropriateness of unsecured credit limits on an ongoing basis. To mitigate exposure to the financial risks of wholesale counterparties, PacifiCorp enters into netting and collateral arrangements that may include margining and cross-product netting agreements and obtaining third-party guarantees, letters of credit and cash deposits. Counterparties may be assessed interest fees for delayed payments. If required, PacifiCorp exercises rights under these arrangements, including calling on the counterparty's credit support arrangement.

Collateral and Contingent Features

In accordance with industry practice, certain derivative contracts contain provisions that require PacifiCorp to maintain specific credit ratings from one or more of the major credit rating agencies on its unsecured debt. These derivative contracts may either specifically provide bilateral rights to demand cash or other security if credit exposures on a net basis exceed specified rating-dependent threshold levels ("credit-risk-related contingent features") or provide the right for counterparties to demand "adequate assurance" in the event of a material adverse change in PacifiCorp's creditworthiness. These rights can vary by contract and by counterparty. As of March 31, 2010, PacifiCorp's credit ratings from the three recognized credit rating agencies were investment grade.

The aggregate fair value of PacifiCorp's derivative contracts in liability positions with specific credit-risk-related contingent features totaled \$494 million and \$353 million as of March 31, 2010 and December 31, 2009, respectively, for which PacifiCorp had posted collateral of \$175 million and \$80 million, respectively. If all credit-risk-related contingent features for derivative contracts in liability positions had been triggered as of March 31, 2010 and December 31, 2009, PacifiCorp would have been required to post \$121 million and \$159 million, respectively, of additional collateral. PacifiCorp's collateral requirements could fluctuate considerably due to market price volatility, changes in credit ratings or other factors.

(7) Employee Benefit Plans

Net periodic benefit cost for the pension and other postretirement benefit plans included the following components for the three-month periods ended March 31 (in millions):

	Pension		Other Postretirement	
	2010	2009	2010	2009
Service cost ⁽¹⁾	\$ 3	\$ 4	\$ 1	\$ 1
Interest cost	17	18	8	8
Expected return on plan assets	(18)	(18)	(7)	(7)
Net amortization	6	3	4	3
Net amortization of regulatory assets	(3)	(2)	-	1
Net periodic benefit cost	\$ 5	\$ 5	\$ 6	\$ 6

(1) Service cost excludes \$3 million and \$4 million of contributions to the joint trust union plans during the three-month periods ended March 31, 2010 and 2009, respectively.

Employer contributions to the pension, other postretirement benefit and joint trust union plans are expected to be \$117 million, \$25 million and \$12 million, respectively, during 2010. As of March 31, 2010, \$40 million, \$6 million and \$3 million of contributions had been made to the pension, other postretirement benefit and joint trust union plans, respectively.

In March 2010, the President signed into law healthcare reform legislation that included provisions to eliminate the tax deductibility of other postretirement costs to the extent of retiree drug subsidies received from the federal government beginning after December 31, 2012. Accordingly, PacifiCorp increased deferred income tax liabilities and, consistent with the expectation that such additional income tax expense amounts are probable of inclusion in regulated rates, recorded a \$39 million increase to regulatory assets.

(8) Commitments and Contingencies

PacifiCorp is party to a variety of legal actions arising out of the normal course of business. Plaintiffs occasionally seek punitive or exemplary damages. PacifiCorp does not believe that such normal and routine litigation will have a material impact on its consolidated financial results. PacifiCorp is also involved in other kinds of legal actions, some of which assert or may assert claims or seek to impose fines, penalties and other costs in substantial amounts and are described below.

Legal Matters

In February 2007, the Sierra Club and the Wyoming Outdoor Council filed a complaint against PacifiCorp in the federal district court in Cheyenne, Wyoming, alleging violations of the Wyoming state opacity standards at PacifiCorp's Jim Bridger generating facility in Wyoming. Under Wyoming state requirements, which are part of the Jim Bridger generating facility's Title V permit and are enforceable by private citizens under the federal Clean Air Act, a potential source of pollutants such as a coal-fired generating facility must meet minimum standards for opacity, which is a measurement of light that is obscured in the flue of a generating facility. The complaint alleged thousands of violations of asserted six-minute compliance periods and sought an injunction ordering the Jim Bridger generating facility's compliance with opacity limits, civil penalties of \$32,500 per day per violation and the plaintiffs' costs of litigation. In February 2010, PacifiCorp, the Sierra Club and the Wyoming Outdoor Council reached an agreement in principle to settle all outstanding claims in the action. The settlement was memorialized in a consent decree filed in April 2010 with the United States Environmental Protection Agency ("EPA") and also with the court for review and approval. The EPA has 45 days to review and comment on the consent decree. After that, if approved by the court as expected, the consent decree is expected to be issued as a final court order and is not expected to have a material impact on PacifiCorp's consolidated financial results.

Environmental Laws and Regulations

PacifiCorp is subject to federal, state and local laws and regulations regarding air and water quality, renewable portfolio standards, climate change, hazardous and solid waste disposal, protected species and other environmental matters that have the potential to impact PacifiCorp's current and future operations. PacifiCorp believes it is in material compliance with all applicable laws and regulations.

New Source Review

As part of an industry-wide investigation to assess compliance with the New Source Review ("NSR") and Prevention of Significant Deterioration ("PSD") provisions, the EPA has requested from numerous utilities information and supporting documentation regarding their capital projects for various generating facilities. Between 2001 and 2003, PacifiCorp responded to requests for information relating to its capital projects at its generating facilities, and it has been engaged in periodic discussions with the EPA over several years regarding its historical projects and their compliance with NSR and PSD provisions. A NSR enforcement case against another utility has been decided by the United States Supreme Court, holding that an increase in annual emissions of a generating facility, when combined with a modification (i.e., a physical or operational change), may trigger NSR permitting. PacifiCorp could be required to install additional emissions controls, and incur additional costs and penalties, in the event it is determined that PacifiCorp's historical projects did not meet all regulatory requirements. The impact of these additional emissions controls, costs and penalties, if any, on PacifiCorp's consolidated financial results cannot be determined at this time.

Accrued Environmental Costs

PacifiCorp is fully or partly responsible for environmental remediation at various contaminated sites, including sites that are or were part of PacifiCorp's operations and sites owned by third parties. PacifiCorp accrues environmental remediation expenses when the expenses are believed to be probable and can be reasonably estimated. The quantification of environmental exposures is based on many factors, including changing laws and regulations, advancements in environmental technologies, the quality of available site-specific information, site investigation results, expected remediation or settlement timelines, PacifiCorp's proportionate responsibility, contractual indemnities and coverage provided by insurance policies. The liability recorded as of March 31, 2010 and December 31, 2009 was \$18 million and is included in other current liabilities and other long-term liabilities on the Consolidated Balance Sheets. Environmental remediation liabilities that separately result from the normal operation of long-lived assets and that are legal obligations associated with the retirement of those assets are separately accounted for as asset retirement obligations.

Hydroelectric Relicensing

PacifiCorp's hydroelectric portfolio consists of 47 generating facilities with an aggregate facility net owned capacity of 1,158 megawatts ("MW"). The Federal Energy Regulatory Commission ("FERC") regulates 98% of the net capacity of this portfolio through 16 individual licenses, which typically have terms of 30 to 50 years. PacifiCorp expects to incur ongoing operating and maintenance expense and capital expenditures associated with the terms of its renewed hydroelectric licenses and settlement agreements, including natural resource enhancements. PacifiCorp's Klamath hydroelectric system is currently operating under annual licenses. Substantially all of PacifiCorp's remaining hydroelectric generating facilities are operating under licenses that expire between 2030 and 2058.

Klamath Hydroelectric System – Klamath River, Oregon and California

In February 2004, PacifiCorp filed with the FERC a final application for a new license to operate the 170-MW Klamath hydroelectric system in anticipation of the March 2006 expiration of the existing license. PacifiCorp is currently operating under an annual license issued by the FERC and expects to continue operating under annual licenses until the relicensing process is complete or the system's four mainstem dams are removed. As part of the relicensing process, the FERC is required to perform an environmental review and in November 2007, the FERC issued its final environmental impact statement. The United States Fish and Wildlife Service and the National Marine Fisheries Service issued final biological opinions in December 2007 analyzing the Klamath hydroelectric system's impact on endangered species under a new FERC license consistent with the FERC staff's recommended license alternative and terms and conditions issued by the United States Departments of the Interior and Commerce. These terms and conditions include construction of upstream and downstream fish passage facilities at the Klamath hydroelectric system's four mainstem dams. Prior to the FERC issuing a final license, PacifiCorp is required to obtain water quality certifications from Oregon and California. PacifiCorp currently has water quality applications pending in Oregon and California.

In November 2008, PacifiCorp signed a non-binding agreement in principle ("AIP") that laid out a framework for the disposition of PacifiCorp's Klamath hydroelectric system relicensing process, including a path toward potential dam transfer and removal by an entity other than PacifiCorp no earlier than 2020. Subsequent to release of the AIP, negotiations between the parties continued with an expanded group of stakeholders. A final draft of the Klamath Hydroelectric Settlement Agreement ("KHSAs") was released in January 2010 for public review. The parties to the KHSAs, which include PacifiCorp, the United States Department of the Interior, the United States Department of Commerce, the State of California, the State of Oregon and various other governmental and non-governmental settlement parties, signed the KHSAs in February 2010. Federal legislation to endorse and enact provisions of the KHSAs is expected to be introduced in the United States Congress in 2010.

Under the terms of the KHSAs, the United States Departments of the Interior and Commerce will conduct scientific and engineering studies and consult with state, local and tribal governments and other stakeholders, as appropriate, to determine by March 31, 2012 whether removal of the Klamath hydroelectric system's four mainstem dams will advance restoration of the salmonid fisheries of the Klamath Basin and is in the public interest. This determination will be made by the United States Secretary of the Interior. If it is determined that dam removal should proceed, dam removal is expected to commence no earlier than 2020.

Under the KHSA, PacifiCorp and its customers are protected from uncapped dam removal costs and liabilities. For dam removal to occur, federal legislation consistent with the KHSA must be enacted to provide, among other things, protection for PacifiCorp from all liabilities associated with dam removal activities. In addition, the KHSA limits PacifiCorp's contribution to dam removal costs to no more than \$200 million, of which up to \$184 million would be collected from PacifiCorp's Oregon customers with the remainder to be collected from PacifiCorp's California customers. An additional \$250 million for dam removal costs is expected to be raised through a California bond measure. If dam removal costs exceed \$200 million and if the State of California is unable to raise the funds necessary for dam removal costs, sufficient funds would need to be obtained elsewhere in order for the KHSA and dam removal to proceed.

Actual removal of a facility would occur only after all permits for removal are obtained and the facility and associated land are transferred to a dam removal entity. Prior to potential removal of a facility, the facility will generally continue to operate as it does currently. However, PacifiCorp is responsible for implementing interim measures to provide additional resource protections, water quality improvements, habitat enhancement for aquatic species and increased funding for hatchery operations in the Klamath River Basin.

In July 2009, Oregon's governor signed a bill authorizing PacifiCorp to collect surcharges from its Oregon customers for Oregon's share of the customer contribution for the cost of removing the Klamath hydroelectric system's four mainstem dams. In March 2010, PacifiCorp filed with the OPUC to begin collecting the surcharge from Oregon customers, as of that date, subject to refund based on the OPUC's determination that the surcharges result in rates that are fair, just and reasonable. Also, in March 2010, PacifiCorp filed with the California Public Utilities Commission to collect a surcharge from PacifiCorp's California customers beginning January 1, 2011. The proceeds from the surcharges will be deposited in trust accounts to be established by each of the respective utility commissions.

As of March 31, 2010 and December 31, 2009, PacifiCorp had \$69 million and \$67 million, respectively, in costs related to the relicensing of the Klamath hydroelectric system included in construction work-in-progress and reflected in property, plant and equipment, net on the Consolidated Balance Sheets.

FERC Issues

FERC Investigation

During 2007, the Western Electricity Coordinating Council ("WECC") audited PacifiCorp's compliance with several of the reliability standards developed by the North American Electric Reliability Corporation ("NERC"). In April 2008, PacifiCorp received notice of a preliminary non-public investigation from the FERC and the NERC to determine whether an outage that occurred in PacifiCorp's transmission system in February 2008 involved any violations of reliability standards. In November 2008, PacifiCorp received preliminary findings from the FERC staff regarding its non-public investigation into the February 2008 outage. Also in November 2008, in conjunction with the reliability standards review, the FERC assumed control of certain aspects of the WECC's 2007 audit. PacifiCorp has engaged in discussions with FERC staff regarding findings related to the WECC audit and the non-public investigation. However, PacifiCorp cannot predict the impact of the audit or the non-public investigation on its consolidated financial results at this time.

Northwest Refund Case

In June 2003, the FERC terminated its proceeding relating to the possibility of requiring refunds for wholesale spot-market bilateral sales in the Pacific Northwest between December 2000 and June 2001. The FERC concluded that ordering refunds would not be an appropriate resolution of the matter. In November 2003, the FERC issued its final order denying rehearing. Several market participants, excluding PacifiCorp, filed petitions in the United States Court of Appeals for the Ninth Circuit ("Ninth Circuit") for review of the FERC's final order. In August 2007, the Ninth Circuit concluded that the FERC failed to adequately explain how it considered or examined new evidence showing intentional market manipulation in California and its potential ties to the Pacific Northwest, and that the FERC should not have excluded from the Pacific Northwest refund proceeding purchases of energy in the Pacific Northwest spot market made by the California Energy Resources Scheduling ("CERS") division of the California Department of Water Resources. Without issuing the mandate order, the Ninth Circuit remanded the case to the FERC to (a) address the new market manipulation evidence in detail and account for it in any future orders regarding the award or denial of refunds in the proceedings; (b) include sales to CERS in its analysis; and (c) further consider its refund decision in light of related, intervening opinions of the court. The Ninth Circuit offered no opinion on the FERC's findings based on the record established by the administrative law judge and did not rule on the merits of the FERC's November 2003 decision to deny refunds. In April 2009, the Ninth Circuit issued a formal mandate order, completing the remand of the case to the FERC, which has not yet undertaken further action. PacifiCorp cannot predict the future course of this proceeding and its impact on its consolidated financial results, if any, at this time.

(9) Components of Accumulated Other Comprehensive Loss, Net

Accumulated other comprehensive loss attributable to PacifiCorp, net consists of the following components (in millions):

	<u>As of</u>	
	<u>March 31, 2010</u>	<u>December 31, 2009</u>
Unrecognized amounts on retirement benefits, net of tax of \$(3) and \$(3)	\$ (6)	\$ (6)
Fair value adjustment of cash flow hedges, net of tax of \$4 and \$-	<u>6</u>	<u>-</u>
Total accumulated other comprehensive loss attributable to PacifiCorp, net	<u>\$ -</u>	<u>\$ (6)</u>

(10) Related-Party Transactions

PacifiCorp has an intercompany administrative services agreement with its indirect parent company, MEHC. Services provided by PacifiCorp and charged to affiliates relate primarily to administrative services, financial statement preparation and direct-assigned employees. Services provided by affiliates and charged to PacifiCorp relate primarily to the administrative services provided under the intercompany administrative services agreement among MEHC and its affiliates. These expenses totaled \$2 million during each of the three-month periods ended March 31, 2010 and 2009.

PacifiCorp engages in various transactions with several of its affiliated companies in the ordinary course of business. Services provided by affiliates in the ordinary course of business and charged to PacifiCorp relate primarily to the transportation of natural gas and relocation services. These expenses totaled \$1 million during each of the three-month periods ended March 31, 2010 and 2009.

PacifiCorp has long-term transportation contracts with Burlington Northern Santa Fe, LLC ("BNSF"), which became a wholly owned subsidiary of Berkshire Hathaway, PacifiCorp's ultimate parent company, in February 2010. Transportation costs under these contracts were \$8 million during each of the three-month periods ended March 31, 2010 and 2009.

PacifiCorp participates in a captive insurance program provided by MEHC Insurance Services Ltd. ("MISL"), a wholly owned subsidiary of MEHC. MISL covers all or significant portions of the property damage and liability insurance deductibles in many of PacifiCorp's current policies, as well as overhead distribution and transmission line property damage. PacifiCorp has no equity interest in MISL and has no obligation to contribute equity or loan funds to MISL. Premium amounts were established in March 2006 based on a combination of actuarial assessments and market rates to cover loss claims, administrative expenses and appropriate reserves, but as a result of regulatory commitments are capped through December 31, 2010. Certain costs associated with the program are prepaid and amortized over the policy coverage period expiring March 20, 2011. Premium expenses were \$2 million during each of the three-month periods ended March 31, 2010 and 2009. Prepayments to MISL were \$7 million and \$2 million as of March 31, 2010 and December 31, 2009, respectively. Receivables for claims were \$12 million and \$10 million as of March 31, 2010 and December 31, 2009, respectively. Proceeds from claims were \$- million during each of the three-month periods ended March 31, 2010 and 2009.

PacifiCorp is party to a tax-sharing agreement and is part of the Berkshire Hathaway United States federal income tax return. As of March 31, 2010, income taxes payable to MEHC were \$40 million and as of December 31, 2009, income taxes receivable from MEHC were \$249 million.

PacifiCorp transacts with its equity investees, BCC and Trapper Mining, Inc. Refer to Note 2 for additional information regarding BCC. Services provided by PacifiCorp and charged to BCC relate primarily to management services, income taxes and labor. Services provided by equity investees and charged to PacifiCorp primarily relate to coal purchases; for BCC these purchases are under a long-term contract that ends on December 31, 2024. These payables were \$16 million as of March 31, 2010. Expenses for these coal purchases were \$41 million during the three-month period ended March 31, 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is management's discussion and analysis of certain significant factors that have affected the financial condition and results of operations of PacifiCorp and its subsidiaries (collectively, "PacifiCorp") during the periods included herein. Explanations include management's best estimate of the impact of weather, customer growth and other factors. This discussion should be read in conjunction with PacifiCorp's historical unaudited Consolidated Financial Statements and Notes to Consolidated Financial Statements included in Item 1 of this Form 10-Q. PacifiCorp's actual results in the future could differ significantly from the historical results.

Forward-Looking Statements

This report contains statements that do not directly or exclusively relate to historical facts. These statements are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements can typically be identified by the use of forward-looking words, such as "may," "could," "project," "believe," "anticipate," "expect," "estimate," "continue," "intend," "potential," "plan," "forecast" and similar terms. These statements are based upon PacifiCorp's current intentions, assumptions, expectations and beliefs and are subject to risks, uncertainties and other important factors. Many of these factors are outside PacifiCorp's control and could cause actual results to differ materially from those expressed or implied by PacifiCorp's forward-looking statements. These factors include, among others:

- general economic, political and business conditions in the jurisdictions in which PacifiCorp's facilities operate;
- changes in federal, state and local governmental, legislative or regulatory requirements affecting PacifiCorp or the electric utility industry;
- changes in, and compliance with, environmental laws, regulations, decisions and policies that could, among other items, increase operating and capital costs, reduce plant output or delay plant construction;
- the outcome of general rate cases and other proceedings conducted by regulatory commissions or other governmental and legal bodies;
- changes in economic, industry or weather conditions, as well as demographic trends, that could affect customer growth and usage or supply of electricity or PacifiCorp's ability to obtain long-term contracts with customers;
- a high degree of variance between actual and forecasted load and prices that could impact the hedging strategy and costs to balance electricity and load supply;
- hydroelectric conditions, as well as the cost, feasibility and eventual outcome of hydroelectric relicensing proceedings, that could have a significant impact on electric capacity and cost and PacifiCorp's ability to generate electricity;
- changes in prices, availability and demand for both purchases and sales of wholesale electricity, coal, natural gas, other fuel sources and fuel transportation that could have a significant impact on generation capacity and energy costs;
- the financial condition and creditworthiness of PacifiCorp's significant customers and suppliers;
- changes in business strategy or development plans;
- availability, terms and deployment of capital, including reductions in demand for investment-grade commercial paper, debt securities and other sources of debt financing and volatility in the London Interbank Offered Rate, the base interest rate for PacifiCorp's credit facilities;
- changes in PacifiCorp's credit ratings;
- performance of PacifiCorp's generating facilities, including unscheduled outages or repairs;

- the impact of derivative contracts used to mitigate or manage volume, price and interest rate risk, including increased collateral requirements, and changes in the commodity prices, interest rates and other conditions that affect the fair value of derivative contracts;
- increases in employee healthcare costs;
- the impact of investment performance and changes in interest rates, legislation, healthcare cost trends, mortality and morbidity on pension and other postretirement benefits expense and funding requirements;
- unanticipated construction delays, changes in costs, receipt of required permits and authorizations, ability to fund capital projects and other factors that could affect future generating facilities and infrastructure additions;
- the impact of new accounting pronouncements or changes in current accounting estimates and assumptions on consolidated financial results;
- other risks or unforeseen events, including litigation, wars, the effects of terrorism, embargoes and other catastrophic events; and
- other business or investment considerations that may be disclosed from time to time in PacifiCorp's filings with the United States Securities and Exchange Commission ("SEC") or in other publicly disseminated written documents.

Further details of the potential risks and uncertainties affecting PacifiCorp are described in its filings with the SEC, including Part II, Item 1A and other discussions contained in this Form 10-Q. PacifiCorp undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The foregoing review of factors should not be construed as exclusive.

Results of Operations

Operating revenue and energy costs are the key drivers of PacifiCorp's results of operations as they encompass retail and wholesale electricity sales and the direct costs associated with providing electricity for our customers. PacifiCorp believes that a discussion of gross margin, representing operating revenue less energy costs, is therefore most meaningful. PacifiCorp serves its customers with electricity supplied by its generating facilities, as well as through wholesale electricity purchases as needed to meet its retail load and long-term wholesale sales obligations. PacifiCorp also sells electricity in the wholesale market to balance its system and when market and other conditions are favorable.

Overview

Net income attributable to PacifiCorp during the three-month period ended March 31, 2010 was \$136 million, an increase of \$13 million, or 11%, as compared to 2009. The increase in net income attributable to PacifiCorp primarily resulted from higher allowances for funds used during construction due to PacifiCorp's construction program and lower income tax expense, partially offset by an \$8 million decrease in operating income. The lower operating income was due to lower wholesale electricity sales primarily due to a 14% decrease in volumes and lower average prices, a 2% decrease in retail sales volumes primarily resulting from warmer than normal weather experienced in Oregon and Washington during the current period and higher operations and maintenance expense, partially offset by higher retail prices approved by regulators, higher sales of renewable energy credits and lower wholesale electricity purchases on lower volumes. Fuel costs were relatively flat compared to the prior period due to a 4% decrease in output from PacifiCorp's thermal generating facilities, partially offset by higher average fuel prices.

As discussed in Note 2 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q, PacifiCorp adopted authoritative guidance as of January 1, 2010 that required equity method accounting treatment of its majority owned coal mining operation.

A comparison of PacifiCorp's key operating results were as follows for the three-month periods ended March 31:

	2010	2009	Favorable/(Unfavorable)	
			Change	% Change
<u>Gross margin (in millions):</u>				
Operating revenue	\$ 1,106	\$ 1,116	\$ (10)	(1)%
Energy costs	<u>415</u>	<u>436</u>	<u>21</u>	5
Gross margin	<u>\$ 691</u>	<u>\$ 680</u>	<u>\$ 11</u>	2%
<u>Volumes of electricity sold (in gigawatt hours ("GWh")):</u>				
Residential	4,323	4,426	(103)	(2)%
Commercial	3,774	3,915	(141)	(4)
Industrial	4,799	4,781	18	-
Other	<u>137</u>	<u>145</u>	<u>(8)</u>	(6)
Total retail electricity sales	13,033	13,267	(234)	(2)
Wholesale electricity sales	<u>3,001</u>	<u>3,500</u>	<u>(499)</u>	(14)
Total electricity sales	<u>16,034</u>	<u>16,767</u>	<u>(733)</u>	(4)%
<u>Retail electricity sales:</u>				
Average retail customers (in thousands)	1,730	1,716	14	1%
Average revenue per megawatt hour ("MWh")	\$ 68.31	\$ 64.55	\$ 3.76	6%
<u>Wholesale electricity sales:</u>				
Average revenue per MWh	\$ 52.90	\$ 58.26	\$ (5.36)	(9)%
<u>Volumes of electricity generated (in GWh):</u>				
Coal-fired generation	10,912	11,160	(248)	(2)%
Natural gas-fired generation	2,187	2,503	(316)	(13)
Hydroelectric generation	1,054	1,038	16	2
Other	<u>653</u>	<u>614</u>	<u>39</u>	6
Total PacifiCorp generated volumes	<u>14,806</u>	<u>15,315</u>	<u>(509)</u>	(3)%
<u>Volumes of electricity purchased (in GWh):</u>				
Wholesale electricity purchases	2,383	2,660	277	10%
<u>Cost of wholesale electricity purchased:</u>				
Average cost per MWh	\$ 48.65	\$ 50.68	\$ 2.03	4%

Gross margin increased \$11 million, or 2%, for 2010 compared to 2009 primarily due to:

- \$35 million of increases from higher retail prices approved by regulators;
- \$22 million of increases in sales of renewable energy credits;
- \$11 million of increases in revenues associated with Utah DSM programs;
- \$11 million of increases due to the elimination of certain regulatory liabilities resulting from the settlement of the Utah DSM tariff filing;
- \$10 million due to higher deferrals of incurred power costs in accordance with established adjustment mechanisms; and
- \$5 million of decreases in fuel costs primarily due to lower volumes of natural gas consumed.

These increases in gross margin were partially offset by:

- \$23 million of decreases due to lower average customer usage driven primarily by warmer than normal weather experienced in Oregon and Washington;
- \$26 million of decreases in net wholesale electricity activities due to \$29 million of lower volumes of wholesale electricity sales and \$16 million of lower average prices on wholesale electricity sales, partially offset by \$14 million of significantly lower volumes of wholesale electricity purchases;
- \$18 million of decreases due to prior year sales to the noncontrolling interest in PacifiCorp's majority owned coal mining operation;
- \$8 million of decreases resulting from higher transmission expense due to higher contract rates; and
- \$6 million of decreases due to changes in the fair value of energy sales and purchase contracts accounted for as derivatives.

Operations and maintenance increased \$17 million, or 7%, for 2010 compared to 2009 primarily due to:

- \$12 million of higher expense associated with Utah DSM programs;
- \$11 million due to the write-off of a portion of the Utah DSM regulatory asset resulting from the settlement of the Utah DSM tariff filing; and
- \$6 million of higher costs associated with jointly owned generating facilities primarily due to increased overhauls; partially offset by,
- \$8 million of decreases due to prior year costs associated with sales to the noncontrolling interest in PacifiCorp's majority owned coal mining operation.

Depreciation and amortization increased \$4 million, or 3%, for 2010 compared to 2009 primarily due to higher plant-in-service.

Allowance for borrowed and equity funds increased \$14 million, or 70%, for 2010 compared to 2009 primarily due to higher qualified construction work-in-progress balances, partially offset by lower average rates.

Income tax expense decreased \$3 million to \$53 million for 2010 compared to 2009, primarily due to regulatory treatment of certain deferred income tax items and higher production tax credits associated with PacifiCorp's wind-powered generating facilities. The effective tax rate was 28% for 2010 compared to 31% for 2009.

Liquidity and Capital Resources

As of March 31, 2010, PacifiCorp's total net liquidity available was \$1.392 billion. The components of total net liquidity available are as follows (in millions):

Cash and cash equivalents	<u>\$ 255</u>
Available revolving credit facilities	\$ 1,395
Less:	
Short-term borrowings and issuances of commercial paper	-
Tax-exempt bond support and letters of credit	<u>(258)</u>
Net revolving credit facilities available	<u>\$ 1,137</u>
Total net liquidity available	<u>\$ 1,392</u>
Unsecured revolving credit facilities:	
Maturity date	<u>2012-2013</u>
Largest single bank commitment as a % of total ⁽¹⁾	<u>15%</u>

- (1) An inability of financial institutions to honor their commitments could adversely affect PacifiCorp's short-term liquidity and ability to meet long-term commitments.

Operating Activities

Net cash flows from operating activities for the three-month periods ended March 31, 2010 and 2009 were \$514 million and \$417 million, respectively. The \$97 million increase was primarily due to significantly higher income tax receipts related to the repairs deduction and bonus depreciation in the prior year and higher prices approved by regulators, partially offset by a net posting of cash collateral on derivative contracts in the current year compared to a net receipt of cash collateral in the prior year and lower volumes and prices on wholesale electricity sales.

Investing Activities

Net cash flows from investing activities for the three-month periods ended March 31, 2010 and 2009 were \$(375) million and \$(561) million, respectively. Capital expenditures decreased \$198 million. Capital expenditures consisted mainly of the following during the three-month periods ended March 31:

2010

- Transmission system investments totaling \$126 million, including construction costs for the first major segment of the Energy Gateway Transmission Expansion Program, a 135-mile, double-circuit, 345-kilovolt transmission line to be built between the Populus substation in southern Idaho and the Terminal substation near Salt Lake City, Utah, which is expected to be placed in service during 2010.
- Emissions control equipment totaling \$54 million, including costs for the Dave Johnston generating facility Unit 3 sulfur dioxide scrubber installation and the Unit 4 scrubber replacement, and installation of sulfur dioxide scrubbers on Naughton generating facility Units 1 and 2.
- Distribution, generation, mining and other infrastructure needed to serve existing and expected demand totaling \$189 million.

2009

- The construction and development of wind-powered generating facilities totaling \$201 million.
- Transmission system investments totaling \$99 million, including a major segment of the Energy Gateway Transmission Expansion Program.
- Emissions control equipment totaling \$60 million.
- Distribution, generation, mining and other infrastructure needed to serve existing and expected demand totaling \$207 million.

Financing Activities

Net cash flows from financing activities for the three-month period ended March 31, 2010 were \$(1) million, which included preferred stock dividends paid.

Net cash flows from financing activities for the three-month period ended March 31, 2009 were \$893 million. Sources of cash totaled \$992 million and consisted of proceeds from the issuance of long-term debt. Uses of cash totaled \$99 million and consisted primarily of \$85 million for net repayments of short-term debt.

Short-term Debt and Revolving Credit Facilities

Regulatory authorities limit PacifiCorp to \$1.5 billion of short-term debt. PacifiCorp had no outstanding short-term debt as of March 31, 2010 and December 31, 2009.

Long-term Debt

PacifiCorp has regulatory authority from the Oregon Public Utility Commission ("OPUC") and the Idaho Public Utilities Commission ("IPUC") to issue an additional \$2.0 billion of long-term debt. PacifiCorp must make a notice filing with the Washington Utilities and Transportation Commission ("WUTC") prior to any future issuance.

Future Uses of Cash

PacifiCorp has available a variety of sources of liquidity and capital resources, both internal and external, including net cash flows from operating activities, public and private debt offerings, the issuance of commercial paper, the use of unsecured revolving credit facilities, capital contributions and other sources. These sources are expected to provide funds required for current operations, capital expenditures, debt retirements and other capital requirements. The availability and terms under which PacifiCorp has access to external financing depends on a variety of factors, including PacifiCorp's credit rating, investors' judgment of risk and conditions in the overall capital market, including the condition of the utility industry in general.

Capital Expenditures

PacifiCorp has significant future capital requirements. Capital expenditure needs are reviewed regularly by management and may change significantly as a result of these reviews, which may consider, among other factors, changes in rules and regulations, including environmental; changes in income tax laws; general business conditions; load projections; system reliability standards; the cost and efficiency of construction labor, equipment and materials; and the cost and availability of capital. Expenditures for compliance-related items, such as pollution-control technologies, replacement generation, hydroelectric relicensing and decommissioning, and associated operating costs are generally incorporated into PacifiCorp's retail rates.

Forecasted capital expenditures, which exclude non-cash equity allowance for funds used during construction, are approximately \$1.7 billion for 2010 and include the following:

- \$452 million for transmission system investments, including \$248 million for the Energy Gateway Transmission Expansion Program, which includes costs for completion of the first major segment of the program, the Populus to Terminal transmission line.
- \$359 million for environmental projects to install and upgrade emissions control equipment at certain coal-fired generating facilities to meet anticipated air quality and visibility targets through reductions of sulfur dioxide, nitrogen oxide and particulate matter emissions.
- \$146 million for construction and development of wind-powered generating facilities, primarily construction costs for the 111-MW Dunlap Ranch I wind-powered generating facility that is expected to be placed in service during 2010 and the remaining project costs related to the wind-powered generating facilities placed in service during the year ended December 31, 2009.
- Remaining amounts are for ongoing investments in distribution, generation, mining and other infrastructure needed to serve existing and expected demand.

Integrated Resource Plan

As required by certain state regulations, PacifiCorp uses an Integrated Resource Plan ("IRP") to develop a long-term view of prudent future actions required to help ensure that PacifiCorp continues to provide reliable and cost-effective electric service to its customers. The IRP process identifies the amount and timing of PacifiCorp's expected future resource needs and an associated optimal future resource mix that accounts for planning uncertainty, risks, reliability impacts, state energy policies and other factors. The IRP is a coordinated effort with stakeholders in each of the six states where PacifiCorp operates. PacifiCorp files its IRP on a biennial basis, and for four of its six state jurisdictions, receives a formal notification as to whether the IRP meets the commission's IRP standards and guidelines. In May 2009, PacifiCorp filed its 2008 IRP with each of its state commissions. During 2009, PacifiCorp received orders from the WUTC and the IPUC acknowledging that the 2008 IRP met their applicable standards and guidelines. During 2010, the OPUC and the Utah Public Service Commission ("UPSC") issued orders acknowledging the 2008 IRP.

Requests for Proposals

PacifiCorp has issued a series of individual Requests for Proposals (“RFPs”), each of which focuses on a specific category of resources consistent with the IRP. The IRP and the RFPs provide for the identification and staged procurement of resources in future years to achieve a balance of load requirements and resources. As required by applicable laws and regulations, PacifiCorp files draft RFPs with the UPSC, the OPUC and the WUTC prior to issuance to the market. Approval by the UPSC, the OPUC or the WUTC may be required depending on the nature of the RFPs.

In August 2009, under PacifiCorp’s 2008R-1 renewable resources RFP (approved by the OPUC in September 2008), PacifiCorp executed a power purchase agreement to purchase the entire output of the proposed 200-MW Top of the World wind-powered generating facility located in Wyoming. The generation of the energy and associated renewable energy credits under this agreement are expected to commence by December 2010 and continue for a period of 20 years. PacifiCorp’s 2009R renewable resources RFP (approved by the OPUC with modification in July 2009) seeks additional cost-effective renewable generation projects with no single resource greater than 300 MW, combined total resources of no more than 400 MW and on-line dates no later than December 31, 2012. As a result of the 2009R renewable resources RFP, PacifiCorp’s 111-MW Dunlap Ranch I wind-powered generating facility located in Wyoming was selected and construction has commenced. Negotiations were also initiated with the remaining final shortlist bidder under the 2009R renewable resources RFP.

In October 2009, PacifiCorp filed a request for approval with the UPSC to re-issue the All Source RFP, which was previously suspended in April 2009. In October 2009 and November 2009, respectively, the UPSC and the OPUC approved resumption of the All Source RFP. The All Source RFP seeks up to 1,500 MW on a system wide basis from projects with in-service dates from 2014 through 2016. In December 2009, the All Source RFP was issued to the market. Proposals have been received under the All Source RFP and evaluations are currently underway.

Contractual Obligations

Subsequent to December 31, 2009, there were no material changes outside the normal course of business in contractual obligations from the information provided in Item 7 of PacifiCorp’s Annual Report on Form 10-K for the year ended December 31, 2009. Additionally, refer to the “Capital Expenditures” discussion included in “Liquidity and Capital Resources.”

Regulatory Matters

In addition to the discussion contained herein regarding updates to regulatory matters based upon material changes that occurred subsequent to those disclosed in Item 7 of PacifiCorp’s Annual Report on Form 10-K for the year ended December 31, 2009, refer to Notes 4 and 8 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q for additional regulatory matter updates.

Utah

In March 2009, PacifiCorp filed for an energy cost adjustment mechanism (“ECAM”) with the UPSC. The filing recommends that the UPSC adopt the ECAM to recover the difference between base net power costs set in the next Utah general rate case and actual net power costs. The UPSC has separated the application into two phases to first address whether the mechanism is in the public interest, and then if it is found to be in the public interest, to determine the type of mechanism that should be implemented. Hearings on the public interest phase were completed in January 2010. In February 2010, the UPSC issued an order to proceed to the second phase to address design considerations in the development of an ECAM. Additionally, in February 2010, PacifiCorp filed an application with the UPSC seeking approval to defer the difference between the net power costs allowed by the UPSC’s final order in PacifiCorp’s 2009 general rate case and the actual net power costs incurred. Also in February 2010, the Utah Association of Energy Users filed a motion with the UPSC seeking approval to defer incremental renewable energy credit revenue in excess of the renewable energy credit value utilized in Utah rates established by the 2009 general rate case. If approved, the filings would establish a deferred cost balance to be considered for collection or refund through any potential mechanism established in the second phase of the ECAM proceeding.

In February 2010, PacifiCorp filed an alternative cost recovery application with the UPSC requesting recovery of \$34 million associated with two major construction projects that are expected to be completed and in service by June 2010. The mechanism provides for a ruling from the UPSC within 150 days of the application. In March 2010, PacifiCorp updated its alternative cost recovery application to reflect the cost of capital decisions from the February 2010 general rate case order, reducing the amount requested for recovery to \$33 million.

Oregon

In February 2010, PacifiCorp made the initial filing for the annual transition adjustment mechanism ("TAM") with the OPUC for an annual increase of \$69 million to recover the anticipated net power costs forecasted for calendar year 2011. The rates in the TAM filing will be effective January 1, 2011 and are subject to updates throughout the proceeding.

In March 2010, PacifiCorp filed a general rate case with the OPUC requesting an annual increase of \$131 million, or an average price increase of 13%. If approved by the OPUC, the rates will be effective January 1, 2011.

Wyoming

In October 2009, PacifiCorp filed a general rate case with the Wyoming Public Service Commission ("WPSC") requesting a rate increase of \$71 million with an effective date of August 1, 2010. Power costs are included in the general rate case, reflecting increased coal costs and the expiration of low cost long-term power purchase contracts. The application is based on a test period ending December 31, 2010. In March 2010, a multi-party stipulation was filed with the WPSC agreeing to an overall rate increase of \$36 million, or an average price increase of 7%, to be implemented in two phases. If the stipulation is approved by the WPSC, the first phase, consisting of a \$26 million increase, will be effective July 1, 2010 and the second phase, consisting of the remaining \$10 million increase, will be effective February 1, 2011. The WPSC held hearings in April 2010 on the general rate case stipulation.

In January 2010, PacifiCorp filed its annual power cost adjustment mechanism ("PCAM") application with the WPSC requesting recovery of \$8 million in deferred net power costs. In March 2010, a multi-party stipulation was filed with the WPSC agreeing to reduce the requested recovery to \$4 million. In April 2010, the WPSC approved a change in the PCAM surcharge rate effective April 1, 2010 to begin recovery of the \$4 million on an interim basis until a final order on the PCAM stipulation is issued. In April 2010, the WPSC held hearings on the PCAM application and the multi-party stipulation.

In April 2010, PacifiCorp filed an application with the WPSC requesting approval of a new ECAM to replace the existing PCAM. The PCAM will sunset with the final deferral of power costs in November 2010.

Washington

In May 2010, PacifiCorp filed a general rate case with the WUTC requesting an annual increase of \$57 million, or an average price increase of 21%. If approved by the WUTC, the rates will be effective in April 2011.

Idaho

In February 2010, PacifiCorp filed an ECAM application with the IPUC requesting recovery of \$2 million in deferred net power costs. In March 2010, the IPUC issued an order approving PacifiCorp's ECAM application effective April 1, 2010.

California

In November 2009, PacifiCorp filed a general rate case with the California Public Utilities Commission ("CPUC") requesting an annual increase of \$8 million, or an average price increase of 10%. If approved by the CPUC, the rates will be effective January 1, 2011.

In March 2010, PacifiCorp filed an application with the CPUC for authorization to offer PacifiCorp's California customers a solar incentive program that would pay incentives to customers for installing solar photovoltaic equipment at their homes or businesses. The program would be funded through a new surcharge designed to collect the proposed annual program budget of approximately \$1 million, or an average price increase of 1%. Funds collected through the surcharge would only be used to pay customer incentives and cover the administrative costs associated with the program. PacifiCorp has requested an effective date of August 2, 2010.

In March 2010, PacifiCorp filed an advice filing with the CPUC that would allow PacifiCorp to complete the transition of certain Klamath irrigation customers from contract rates to full tariff rates as agreed to as part of the 2005 California general rate case. The change was approved by the CPUC resulting in an annual rate increase of \$1 million effective April 17, 2010.

Environmental Laws and Regulations

PacifiCorp is subject to federal, state and local laws and regulations regarding air and water quality, renewable portfolio standards, climate change, hazardous and solid waste disposal, protected species and other environmental matters that have the potential to impact PacifiCorp's current and future operations. In addition to imposing continuing compliance obligations, these laws and regulations provide authority to levy substantial penalties for noncompliance including fines, injunctive relief and other sanctions. These laws and regulations are administered by the EPA and various other state and local agencies. All such laws and regulations are subject to a range of interpretation, which may ultimately be resolved by the courts. Environmental laws and regulations continue to evolve, and PacifiCorp is unable to predict the impact of the changing laws and regulations on its operations and consolidated financial results. PacifiCorp believes it is in material compliance with all applicable laws and regulations. Refer to "Future Uses of Cash" for discussion of PacifiCorp's forecasted environmental-related capital expenditures.

There have been no material changes to environmental laws and regulations subsequent to those disclosed in Item 7 of PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009. Refer to Note 8 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q and Item 7 of PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009 for additional information regarding certain environmental laws and regulations affecting PacifiCorp's operations.

Credit Ratings

PacifiCorp's senior secured and senior unsecured debt credit ratings are as follows:

	<u>Fitch</u>	<u>Moody's</u>	<u>Standard & Poor's</u>
Senior secured debt	A-	A2	A
Senior unsecured debt	BBB+	Baa1	A-
Outlook	Stable	Stable	Stable

Debt and preferred securities of PacifiCorp are rated by the credit rating agencies. Assigned credit ratings are based on each rating agency's assessment of PacifiCorp's ability to, in general, meet the obligations of its issued debt or preferred securities. The credit ratings are not a recommendation to buy, sell or hold securities, and there is no assurance that a particular credit rating will continue for any given period of time.

PacifiCorp has no credit rating downgrade triggers that would accelerate the maturity dates of outstanding debt, and a change in ratings is not an event of default under the applicable debt instruments. PacifiCorp's unsecured revolving credit facilities do not require the maintenance of a minimum credit rating level in order to draw upon their availability. However, commitment fees and interest rates under the credit facilities are tied to credit ratings and increase or decrease when the ratings change. A ratings downgrade could also increase the future cost of commercial paper, short- and long-term debt issuances or new credit facilities. Certain authorizations or exemptions by regulatory commissions for the issuance of securities are valid as long as PacifiCorp maintains investment grade ratings on senior secured debt. A downgrade below that level would necessitate new regulatory applications and approvals.

In accordance with industry practice, certain agreements, including derivative contracts, contain provisions that require PacifiCorp to maintain specific credit ratings on its unsecured debt from one or more of the major credit ratings agencies. These agreements, including derivative contracts, may either specifically provide bilateral rights to demand cash or other security if credit exposures on a net basis exceed specified rating-dependent threshold levels (“credit-risk-related contingent features”) or provide the right for counterparties to demand “adequate assurance” in the event of a material adverse change in PacifiCorp’s creditworthiness. These rights can vary by contract and by counterparty. As of March 31, 2010, PacifiCorp’s credit ratings from the three recognized credit rating agencies were investment grade. If all credit-risk-related contingent features or adequate assurance provisions for these agreements, including derivative contracts, had been triggered as of March 31, 2010, PacifiCorp would have been required to post \$238 million of additional collateral. PacifiCorp’s collateral requirements could fluctuate considerably due to market price volatility, changes in credit ratings or other factors. Refer to Note 6 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q for a discussion of PacifiCorp’s collateral requirements specific to PacifiCorp’s derivative contracts.

New Accounting Pronouncements

For a discussion of new accounting pronouncements affecting PacifiCorp, refer to Note 2 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q.

Critical Accounting Estimates

Certain accounting measurements require management to make estimates and judgments concerning transactions that will be settled several years in the future. Amounts recognized on the Consolidated Financial Statements based on such estimates involve numerous assumptions subject to varying and potentially significant degrees of judgment and uncertainty. Accordingly, the amounts currently reflected on the Consolidated Financial Statements will likely change in the future as additional information becomes available. Estimates are used for, but not limited to, the accounting for the effects of certain types of regulation, derivatives, pension and other postretirement benefits, income taxes and revenue recognition – unbilled revenue. For additional discussion of PacifiCorp’s critical accounting estimates, see Item 7 of PacifiCorp’s Annual Report on Form 10-K for the year ended December 31, 2009. There have been no significant changes in PacifiCorp’s assumptions regarding critical accounting estimates since December 31, 2009.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For quantitative and qualitative disclosures about market risk affecting PacifiCorp, see Item 7A of PacifiCorp’s Annual Report on Form 10-K for the year ended December 31, 2009. PacifiCorp’s exposure to market risk and its management of such risk has not changed materially since December 31, 2009. Refer to Note 6 of Notes to Consolidated Financial Statements in Item 1 of this Form 10-Q for disclosure of PacifiCorp’s derivative positions as of March 31, 2010.

Item 4. Controls and Procedures

At the end of the period covered by this Quarterly Report on Form 10-Q, PacifiCorp carried out an evaluation, under the supervision and with the participation of PacifiCorp’s management, including the Chief Executive Officer (principal executive officer) and the Chief Financial Officer (principal financial officer), of the effectiveness of the design and operation of PacifiCorp’s disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended). Based upon that evaluation, PacifiCorp’s management, including the Chief Executive Officer (principal executive officer) and the Chief Financial Officer (principal financial officer), concluded that PacifiCorp’s disclosure controls and procedures were effective to ensure that information required to be disclosed by PacifiCorp in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and is accumulated and communicated to management, including PacifiCorp’s Chief Executive Officer (principal executive officer) and Chief Financial Officer (principal financial officer), or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. There has been no change in PacifiCorp’s internal control over financial reporting during the quarter ended March 31, 2010 that has materially affected, or is reasonably likely to materially affect, PacifiCorp’s internal control over financial reporting.

PART II

Item 1. Legal Proceedings

For a description of certain legal proceedings affecting PacifiCorp, refer to Item 3 of PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009. Refer to Note 8 of Notes to Consolidated Financial Statements in Part I, Item 1 of this Form 10-Q for material developments since those disclosed in Item 3 of PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009.

Item 1A. Risk Factors

There has been no material change to PacifiCorp's risk factors from those disclosed in Item 1A of PacifiCorp's Annual Report on Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. (Removed and Reserved)

Item 5. Other Information

Not applicable.

Item 6. Exhibits

The exhibits listed on the accompanying Exhibit Index are filed as part of this Quarterly Report.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

AWARENESS LETTER OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

PacifiCorp
Portland, Oregon

We have reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the unaudited consolidated interim financial information of PacifiCorp and subsidiaries for the periods ended March 31, 2010 and 2009, as indicated in our report dated May 7, 2010; because we did not perform an audit, we expressed no opinion on that information.

We are aware that our report referred to above, which is included in your Quarterly Report on Form 10-Q for the quarter ended March 31, 2010, is incorporated by reference in Registration Statement No. 333-148662 on Form S-3ASR.

We also are aware that the aforementioned report, pursuant to Rule 436(c) under the Securities Act of 1933, is not considered a part of the Registration Statement prepared or certified by an accountant or a report prepared or certified by an accountant within the meaning of Sections 7 and 11 of that Act.

**CERTIFICATION PURSUANT TO
SECTION 302 OF THE
SARBANES-OXLEY ACT OF 2002**

I, Gregory E. Abel, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of PacifiCorp;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: May 7, 2010

/s/ Gregory E. Abel

**CERTIFICATION PURSUANT TO
SECTION 302 OF THE
SARBANES-OXLEY ACT OF 2002**

I, Douglas K. Stuver, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of PacifiCorp;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
SECTION 906 OF THE
SARBANES-OXLEY ACT OF 2002**

I, Gregory E. Abel, Chairman of the Board of Directors and Chief Executive Officer of PacifiCorp (the "Company"), certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350, that to the best of my knowledge:

- (1) the Quarterly Report on Form 10-Q of PacifiCorp for the quarterly period ended March 31, 2010 (the "Report") fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m or 78o(d)); and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of PacifiCorp.
