If a custom role is added by PacifiCorp in the Rivermine application, Rivermine Customer Support is required to be contacted to add the custom role in the Clarity reporting module. Automatic synchronization for custom roles does not yet exist between the Rivermine application and the Clarity reporting module.

If PacifiCorp requires a change to the reports that an out of the box user role can access, Rivermine Customer Support is required to be contacted. Customer Support will make the security change in the Clarity reporting module. Automatic synchronization for custom roles does not yet exist between the Rivermine application and the Clarity reporting module.

**Exhibit C - Implementation
IMPLEMENTATION**

Rivermine will provide consultants to assist PacifiCorp's staff with the implementation related to the Software Modules. Rivermine will document PacifiCorp specific requirements during requirement workshops and implement each module based on a set of configurable templates and parameters inherent to the tool. PacifiCorp will be trained to configure and administer the product. Configuration is limited to the product capabilities outlined in the current version of Rivermine manuals and documentation.

In addition Rivermine will provide the following services to PacifiCorp:

- Ongoing system to system invoice loading services that will include but not be limited to EDI and CABS formats as set forth in the Invoice Loading Statement of Work. (See Appendix C to Exhibit B)
- Moving of the invoice feeds from PacifiCorp's current provider to the new service. (PacifiCorp will facilitate necessary communication and information)

Rivermine will install, integrate and setup all applicable modules noted in this Exhibit C according to the following module-specific scope by executing the implementation methodology outlined in Appendix A to this Exhibit C. Any additional configurations, outside the scope defined herein, can be performed by:

1. Rivermine Professional Services on a time and materials basis under a separate Change Request,
2. PacifiCorp upon the purchase and completion of Rivermine Configuration Training.

Service Order Manager/Circuit Inventory Engine

Rivermine will install and configure the Service Order Manager and Circuit Inventory Engine during the Project.

Order/Inventory Templates

Order/Inventory templates represent on-line forms used to capture, default and validate specific information required to successfully process and manage telecom orders and circuit inventory. Rivermine will install one template for each of the following service types. Additional configuration and/or creation of new inventory templates are out-of-scope.

<ul style="list-style-type: none">• ATM Port• ATM PVC• Calling Cards• Conferencing: Audio• Conferencing: Video• Cell Phone• DDS• DSL	<ul style="list-style-type: none">• Ethernet• Frame Relay Port• Frame Relay PVC• Internet• ISDN BRI• ISDN PRI• Long Distance• MPLS• OCx: Channelized	<ul style="list-style-type: none">• OCx: Point-to-Point• Pager• T1: Channelized• T1: Point-to-Point• T3: Channelized• T3: Point-to-Point• Toll Free• Voice Circuit/POTS
---	--	--

Billing/Location Templates

Billing and location templates are forms used to capture specific information related to PacifiCorp's billing account hierarchy and physical site locations, respectively. Rivermine will provide one base billing and location template at the time of installation. PacifiCorp specific data attributes can be added to these templates and will be documented during the Requirement Workshops.

Order E-mail Templates

Order e-mail templates are forms used to generate e-mails to PacifiCorp's service providers containing order information captured on the order/inventory templates. Rivermine will install one generic email template used by all service types. Service type and/or vendor specific email templates are out-of-scope for this implementation but can be performed on a time and material basis. Rivermine will configure the email template to pre-populate the e-mail distribution list for each vendor contact provided during the Requirements Workshops.

Milestone Templates

Milestone templates define the order steps and expected duration that an order must progress through from order creation to order completion. Rivermine will install four base milestone templates used by all in-scope service types for the following order actions: Add, Change, Move, and Disconnect. Service type and/or vendor specific milestone templates are out-of-scope for this implementation.

Order Approval Workflow

Order approval workflow enables PacifiCorp to define a conditional path to route orders for authorization prior to submission to the vendor for fulfillment. The configuration of order approval functionality is not within scope.

Telco Interface

Rivermine will install and configure the Telco Interface during the Project.

Rivermine will configure the Telco Interface to replicate the order/inventory templates installed during the implementation of Service Order Manager in order to provide PacifiCorp vendors visibility into the configured order form. In addition, Rivermine will setup vendor accounts and configure the application to direct orders to the vendors who have agreed to utilize the interface.

It will be PacifiCorp's responsibility to obtain vendor acceptance of this interface as well as manage the on-going relationship with the vendor to maintain use of the interface.

Equipment Inventory Engine

Rivermine will install Equipment Inventory Engine during the Project.

Equipment Templates

Equipment templates are on-line forms used to capture, default and validate specific information required to manage network equipment inventory as well as build relationships to circuit inventory. Rivermine will install one template for each of the following equipment types. Additional configuration and/or creation of new equipment templates is out-of-scope.

- Routers
- PBX
- Switch
- Servers
- Modems

Finance Manager

Rivermine will install and configure Finance Manager during the Project.

Invoice Templates/Readers

Invoice Readers are used to load and parse electronic bills received from service providers into Rivermine invoice templates for on-screen presentment and auditing charges. Rivermine will install Financial Manager with pre-configured settings including vendor specific invoice templates derived from our best practices during the Project. Out-of-the-box invoice readers will be implemented to import vendor invoices received in an electronic format. Paper invoices that cannot be converted to an electronic bill format can be manually entered into Rivermine using a pre-configured generic template.

Deployment of any electronic invoice reader is dependent on the ability of PacifiCorp to consolidate and receive electronic formats within the project timeline. It is recommended that PacifiCorp begin working with vendors to start the bill format conversion process prior to the project start date where applicable.

Based on the current billing formats provided by PacifiCorp, Rivermine will install and test the following electronic invoice readers.

Invoice Reader Table			
Service Provider	Electronic CD/Portal	Electronic EDI	Billing Formats
AT&T		X	DCS
AT&T Wireless	X		Navigator
PacBell		X	SBC EDI
Qwest		X	Qwest EDI
Verizon		X	Verizon EDI
Multiple Carriers		X	CABS
Multiple Carriers	X		RIVERMINE XLS

If PacifiCorp requires additional invoices readers above and beyond those listed above, Rivermine will install and test the first supported reader at no charge, additional readers will be provided on a Time and Materials basis and will provide an estimate under a separate Statement of Work at that time. Unsupported invoice readers can be developed and installed by Rivermine on a Time and Materials basis or could be developed as standard supported product should there be market demand.

Invoice Approval Workflow

Invoice approval workflow enables PacifiCorp to define a conditional path to route invoices for approval prior to submission to the financial system for payment. The configuration of invoice approval functionality will be based on PacifiCorp requirements.

Cost Allocation

Rivermine will configure the cost allocation templates to associate General Ledger (GL) information to the location, account and/or circuit entities within PacifiCorp installation. PacifiCorp will be responsible for providing the accounting strings and percentages, where applicable, in an agreed upon format. Rivermine will upload the agreed upon data for calculating the General Ledger feed during the Inventory Build.

Rivermine will develop the cost allocation algorithm to generate the General Ledger feed to PacifiCorp's Financial application according to PacifiCorp requirements. The allocation of invoice charges is limited to account, location or circuit levels. Allocations performed against sub-line item charges (i.e. USOC) are specifically out of scope for this implementation.

Both Parties have caused an individual with the requisite authority to acknowledge this and each page of this Contract prior to execution.

Interface Type	Source Target System	Interface Type	Comment
Outbound AP/GL	Rivermine/ PacifiCorp Financial System	Batch	Transmits approved invoices for payment and allocation from Rivermine's Financial Management module to PacifiCorp's Financial System (e.g. invoice #, account #, pay amount, gl string, allocation amount).
Inbound AP	PacifiCorp Financial System/ Rivermine	Batch	Transmits payment detail from PacifiCorp's Financial System to PacifiCorp's Financial Management (e.g. check number, payment date, payment amount). PacifiCorp will utilize Standard Interface file provided by Rivermine
Inbound HR	PacifiCorp HR System/ Rivermine	Batch	Transmits employee information from HR application (e.g. employee id, managers) to Rivermine) for association to circuits and services. PacifiCorp will utilize Standard Interface file provided by Rivermine

Contract Manager

Contract Manager enables PacifiCorp to enter service provider contract information in order to validate contracted rates against invoices loaded into the software. Rivermine will enter facility rates and contract header details into the system for one service provider master contract that PacifiCorp receives electronic billing. If the master contract contains multiple sub contracts, then the master header information will be entered along with the rates for one sub contract. PacifiCorp is responsible for validating the contract rates to be entered into the system prior to Rivermine importing the detail.

Clarity

Rivermine will install and configure the Clarity business intelligence engine during the Project. Rivermine will install Clarity with 40 standard reports for PacifiCorp. The availability of any standard report is dependent on data accuracy and completeness stored in PacifiCorp's inventory and/or provided on a carrier's bill.

Rivermine will configure Clarity's ad-hoc reporting capabilities to include PacifiCorp specific data attributes that were added during the Service Order and Inventory Engine installation. In addition, Rivermine will configure up to 5 new reports based on requirements captured during the Requirement Workshops.

External System Interfaces

Rivermine will develop three external system interfaces with PacifiCorp's Financials application to transmit allocation and payment information with PacifiCorp systems. The definition of file layouts, transmission methods and transmission frequencies will be defined during the Requirement Workshops.

Inventory Build

The effort to compile and load inventory is a joint process between Rivermine and PacifiCorp. During the Data Requirement Workshop, the team will first identify the best sources of billing account, location and inventory data using existing systems, databases, vendor data, and/or invoices. Once the sources are identified, PacifiCorp is responsible for gathering and compiling data into Rivermine batch templates. Upon completion, Rivermine will upload the files using the software's batch tools. Historical orders will not be loaded during this effort and the mapping of circuit-to-circuit and/or circuit-to-equipment relationships is the responsibility of PacifiCorp after the initial inventory load is complete.

Training

Rivermine will provide several types of training sessions during the Project. The timing and content of the training will be acceptable to PacifiCorp and structured to enable users to be able to participate in the configuration of their Rivermine installation and then be able to use it to best effect. This training provides familiarity and specific skills necessary to participate in the implementation process as well as efficiently use and support the administration of the software upon deployment.

Rivermine will conduct training sessions over the course of 4 days to cover the following topics:

- End User: Service Order/Inventory Management Training
- End User: Financial Management Training
- End User: Clarity Training
- System Administration Training

For each session, Rivermine will conduct training for up to 10 users at one PacifiCorp location.

Project Schedule

Rivermine suggests deploying core TEM software functionality in one phase estimated to take approximately 3 months as outlined in the GANTT chart below. Schedule is dependent on PacifiCorp's ability to (1) provide interface requirements in a timely manner, (2) compile inventory into Rivermine templates and (3) execute User Acceptance Test activities.

A draft work plan will be provided within 1 week of the project start date. The detailed project plan is subject to modification during the project with the agreement of both PacifiCorp and Rivermine.

Rivermine Resources

The Rivermine implementation team is staffed with a minimum of 4 Rivermine resources representing a breadth of industry knowledge and technical skill sets. Additional resources may be added during the project to (1) utilize specific domain or technical skill set and/or (2) to accelerate a project with more manpower when applicable. The roles and responsibilities are defined in the table below:

Appendix A to Exhibit C – Implementation Statement of Work

Implementation Approach Overview

All Rivermine software deployment projects are executed using Rivermine’s proprietary implementation methodology which defines the methods and procedures used to plan for, manage, and execute installations.

The basis of the methodology states that the software implementation will be executed in five stages: Analysis, Design, Configuration/Development, Testing, and Deployment. These stages may differ from project to project depending on (1) PacifiCorp’s need for module functionality and, (2) their business requirements which drive the extent of all design and configuration activities. The highlighted green area, in the diagram above, illustrates a complete lifecycle of a Rivermine implementation. Depending on PacifiCorp’s business objectives and priorities, the five stages can be executed in a cyclical fashion to deploy functionality, modules and/or data in multiple phases.

To minimize unexpected outcomes and user adoption issues upon deployment, several checkpoints are embedded throughout the implementation to validate requirements, design and progress with the core project team. These checkpoints are performed at the conclusion of the Analysis, Design and Testing phases. At these junctures, PacifiCorp must review appropriate deliverables/progress and provide signoff acknowledging acceptance so the project can proceed to the next stage of the life cycle.

In addition, up to four work streams occur in parallel with the five implementation stages depending on the needs of the project. These work streams include: Project Management/Administration, Inventory Build, Training, and Hosting/Technical Environment Setup. Each work stream brings focused attention to specific on-going activities throughout the duration of the project.

SOFTWARE IMPLEMENTATION

General Software Implementation Overview

For each defined phase of the project, the five Project Lifecycle stages will be executed: Analysis, Design, Configuration/Development, Testing, and Deployment.

Analysis Stage

During this stage, Rivermine will lead PacifiCorp through requirement workshops designed to gather user preferences for the configurable components of the software. These workshops focus on discussions regarding order management, inventory management, financial management, contract management, reporting, data, and interface requirements. At each workshop, requirements will be gathered, prioritized, documented and delivered in the System Requirements document. Any requirement that cannot be supported by base Rivermine functionality will be flagged and communicated as a gap. Each gap will be reviewed during follow-up workshops to determine business impacts. If the impact is substantial, Rivermine and PacifiCorp will jointly devise short and long term workarounds where feasible. All gaps and workarounds will be highlighted in the System Requirements document.

At the conclusion of the Analysis phase, Rivermine will conduct an executive review of the final System Requirements document with PacifiCorp's executive-level steering committee responsible for the success of the project. This review will ensure proper buy-in into the direction of the project and obtain formal agreement on the requirements through an official sign-off between PacifiCorp and Rivermine. This checkpoint will authorize the team to move forward with Design once sign-off occurs.

Design

Once the Analysis phase is complete, the Rivermine team will commence configuration and interface design activities driven by the agreed upon software requirements.

Configuration design activities will model and document the complex system configurations necessary to implement Rivermine software for PacifiCorp business needs. These types of configurations cannot be performed using the general system administration tools provided by the base product and require the use of JAVA code or more advanced configuration knowledge to implement. For example, the following types of configurations will require a formal design: developing order/invoice automated workflows, enhancing invoice reader capabilities, developing new invoice audits/exceptions, and defining cost allocation/chargeback logic. The Configuration Design deliverable will address technical design specifications for these complex software configurations through the use of pseudo code, screen shots, and file names where applicable. This document will be useful for Rivermine PacifiCorp Support and/or PacifiCorp's Rivermine System Administrator for maintaining the application once deployed.

Interface Design activities will model and document the detailed design of each interface between Rivermine and PacifiCorp's existing systems. For each interface, the Interface Design deliverable will cover the physical data flow, file types and layouts, scheduling timeframes, data extraction and/or preparation logic, error handling and interface dependencies. Potentially, Rivermine could interface with PacifiCorp's existing ordering, inventory management and/or accounts payable applications.

A walkthrough of the design documentation will occur to ensure PacifiCorp expectations and documented system requirements have been met. This will also allow Rivermine and PacifiCorp to identify any additional gaps that need to be addressed. The final review will result in another key checkpoint requiring design sign-off. This allows Rivermine and PacifiCorp to proceed with configuring the solution.

Configuration/Development

Upon design sign-off, the Rivermine team will complete configuration activities utilizing the requirements and design documentation as the basis for development. During this period, Rivermine will conduct a minimum of 1 and a maximum of 3 structured review sessions to confirm that the application is being configured to PacifiCorp expectations and requirements. These configuration checkpoints will be scheduled at the onset of the project and documented in the project plan.

Testing

Once configuration and data conversion is complete, a series of testing activities will commence. First, Rivermine will conduct system test and quality assurance activities to ensure the software is operating properly and according to defined PacifiCorp requirements. Rivermine utilizes generic system test plans that have been developed by the Rivermine Quality Assurance group for testing purposes. Each test plan is reviewed prior to execution to document any additional test cases that are needed to address PacifiCorp specific requirements. Any test problems or fallout will be documented and resolved by the team.

After system test is complete, PacifiCorp will execute user acceptance testing. Any issues that result from the test will be documented and prioritized for resolution. Critical issues that prevent the rollout of the software will receive proper attention by the Rivermine staff to minimize the risk of deployment delays. If all requirements are met, PacifiCorp sign-off is obtained to indicate their acceptance of the software as configured by Rivermine. This is a critical checkpoint prior to moving into production.

Deployment

Upon successful completion of the Testing stage, Rivermine will prepare the production environment to deploy the software to PacifiCorp's user community with assistance and support from Rivermine. Once data and software configuration are migrated to the production environment, the software is ready for go-live.

Exhibit E - INVOICE LOADING SERVICES

Service Scope

The following section details the scope of Invoice Loading Service (collectively, the "Services") to be provided pursuant to this Statement of Work:

Initial Setup:

PacifiCorp is responsible for making the initial contact with each telecom carrier to redirect invoices. PacifiCorp will provide the necessary contact information to Rivermine and inform each telecom carrier to work with Rivermine to redirect invoices. For EDI, Rivermine will require thirty (30) days for the initial setup to allow for telecom carrier redirects, setup and validation of invoices and associated tasks and for CABS, Rivermine will undertake to conclude the initial set up as soon as commercially reasonably possible.

Loading Invoices:

Electronic invoices will be loaded with circuit and sub-line item detail when the telecom carrier provides such detail within their bill format. Any bill format discrepancies will be researched and resolved by Rivermine and the telecom carrier.

Invoice loading services will be provided for the invoices listed in the Invoice Reader Table of Exhibit C.

Ordering Future Electronic Feeds:

After the initial setup and after all appropriate telecom carrier forms needed to perform the Services hereunder are signed, PacifiCorp will be responsible for contacting telecom carriers to allow Rivermine to arrange electronic formats for new loads when an electronic format is available.

Missing BAN Management:

Rivermine is responsible for contacting telecom carrier if an invoice is not received. Rivermine will provide PacifiCorp with a regular status report, listing the BANs that have issues and the statuses of the issues (Report can be executed on demand by PacifiCorp through the Platform Services).

Reconfiguration of EDI feeds:

Rivermine is responsible for the reconfiguration of feeds caused by changes made by the telecom carrier supplying the feed provided that the new electronic feed from the carrier is a standard and supported electronic format.

Parallel Process

Parallel process to begin with the first day of the month following Go Live. For example: If Go Live is on September 17th, Parallel process will begin on October 1. It also assumes that the MRC starts with Parallel process regardless of how long parallel process lasts.

Rivermine will also only load one month's invoice for each account during implementation. I.e., if Rivermine loads the August 1 invoice during implementation and parallel process starts October 1. There will be no invoices loaded for September.

THE FOLLOWING OFFERINGS ARE NOT INCLUDED IN THE SCOPE OF WORK OF THIS STATEMENT OF WORK:

Providing VANs:

Rivermine is not responsible for initializing and signing contracts with any Value Added Network ("VAN") if required to process EDI based invoices, implementing a VAN, or any fees associated with a VAN. If PacifiCorp wishes to provide a VAN or already use an existing VAN, Rivermine will use the VAN to load the electronic invoices.

Invoice Analysis and Disputes:

Rivermine is not responsible for analyzing invoices and contacting telecom carriers about invoice disputes. PacifiCorp will analyze, review, and approve all invoices in the system. When there is a dispute on an invoice, PacifiCorp will contact the telecom carrier to rectify the dispute and when applicable, ensure a credit is received. PacifiCorp acknowledges that it shall be solely responsible for resolving any disputes regarding any disputed amounts invoiced by PacifiCorp's telecom carriers/suppliers.

In the event that PacifiCorp is interested in expanding the scope of this service to include the above mentioned offerings, or any other offering not discussed herein, the parties shall mutually agree to a change by following the procedures outlined in the Agreement.

EXHIBIT F - PacifiCorp Travel Guidelines

To ensure that all your expenses are paid in full, please take a moment to review the detailed expense guidelines below.

- **Airfare and lodging** -- All travel to be reimbursed should be approved prior to booking.
- **Long-term assignment travel:** Contract firms should make their own arrangements for air travel, rental car and hotel stays, but expenses must meet these guidelines. PacifiCorp will reimburse for coach class travel only. Charges in excess of a coach ticket are the responsibility of the contract firm. Booking flights less than 7 days prior to departure is strongly discouraged. PacifiCorp will only reimburse for standard hotel rooms and prefers that contractors use hotels where negotiated discounts are available. For example, PacifiCorp has discounted rates at the following hotels: in Portland the Lloyd Center DoubleTree. Embassy Suites is available in Salt Lake City.
- A discounted rate is also available with Enterprise for car rentals. You are welcome to utilize PacifiCorp or your own corporate discounts.
- Short-term assignment travel: While on assignment with PacifiCorp, arrangements for business travel, including air travel and hotel stays, may be routed through our corporate agency, Murdock Travel, or Rivermine's firm of choice. You can contact them internally via email at Travel Requests or through your department administrator. All travel will be coach class.
- While traveling, PacifiCorp will reimburse for reasonable phone calls home and for business related dial-up charges. To help reduce costs, we require the use of calling cards or pre-paid phone cards, rather than direct calls from hotels.
- **Rental cars/ ground transportation:** Please use shuttle services provided by local hotels to/from the airport. If you are working at a single location near PacifiCorp, please select a hotel that is within walking distance to your work location. Contractors are required to provide appropriate automobile insurance coverage at their own expense. PacifiCorp may require proof of insurance.
- In Portland, effective 11/18/02, many downtown hotels are discontinuing their Airport Shuttle service. This is a result of the new Airport MAX Light Rail service.

To catch the MAX from the airport: Go to the baggage claim area and take and take a right once you've gotten off the escalators. Follow the signs to the Airport MAX which is directly outside to the right. The trains come about every 15 minutes, and from the airport the first one departs at 4:25am and the last one leaves at 11:35pm. To get to the DoubleTree, take the RED line (which is the only train at the airport) to the NE 11th Ave./Lloyd Center exit which takes approximately 25 minutes and drops you off directly across the street from the entrance.

There are no train changes needed and the cost is \$1.65 each way. Getting to the airport is the same in reverse; just make sure to catch the RED line.

If you any questions regarding the MAX line contact: Tri-Met directly at (503) 238-5811
www.tri-met.org.

- PacifiCorp will reimburse shuttle, cab or mileage expense for one trip to and one trip from the airport (i.e., round trip) to a maximum of \$50, for each business trip. If you park at the airport, PacifiCorp will reimburse for economy parking only. Receipts for all ground transportation, parking and mileage are required. Mapquest.com is a good source of documentation for mileage.
- **Meals:** PacifiCorp will reimburse for breakfast, lunch and dinner for each day of contract work for non-local contractors. The standard meal reimbursement should not exceed \$45 per day. However, this is not a per diem amount that is automatically paid for each day of work. PacifiCorp will not reimburse for any meals that the contractor (or contracting agency) purchases for PacifiCorp employees, such as team lunches/dinners.
- PacifiCorp will only reimburse for meal gratuities @ 15%. All other gratuities not reimbursable (e.g. taxis, porters, Bellhops, maid service or hotel staff).
- **Non-Reimbursable Expenses:** The following is a listing, though not all-inclusive, of expenses that will not be reimbursed:
 - ❖ Business Gifts.
 - ❖ Expenses for non-business purposes.
 - ❖ Fines (parking, traffic violations).
 - ❖ Annual Fees for personal Credit Card.
 - ❖ Laundry Service.
 - ❖ Barber and beautician services.

- ❖ Travel time.
- ❖ General Office Supplies.
- ❖ Personal entertainment or recreation (in-room movies, health club fees).
- ❖ Expenses incurred by contractor family members. For example, we will reimburse for a contractor's meal, but not for a spouse's meal.
- ❖ Expenses more than \$25 not supported with a valid receipt.
- ❖ Alcoholic Beverages.
- ❖ Expenses for clothing, umbrellas, briefcases, etc.
- ❖ Expenses associated with interim stopovers (incremental transportation costs, hotel, meals, etc.).
- ❖ Personal hygiene products (shampoo razor blades, toothbrush, etc) *unless part of lost luggage.
- ❖ Parking for local contractors

- **Expense report paperwork:** Accurate expense reports submitted in a timely manner substantially reduce the invoice processing time. Reports include a worksheet or listing of each expense, with date, type of expense and amount noted. You can use a standard form from your PacifiCorp or use one provided by PacifiCorp. Please see the sample entry below if you are creating your own worksheet.
