PART H - NARRATIVE DESCRIPTION OF THE INCIDENT		
On February 16, 2019 Dominion Energy Utah (DEU) was notified of a h	ouse fire at 9740 Bypass Road, Alta, Utah. DEU sent a	
technician		
to the site. Upon arrival the technician was unable to access the gas meter due to excessive amounts of snow (about 12' of snow from ground level). Later, DEU Dispatch received an updated call from the Fire Department stating that a natural gas explosion may have occurred. Additional resources were sent to assist with securing the service line to the property. Company reported the incident upon discovery and suspected natural gas involvement. After the fire was contained, DEU crews excavated the natural gas meter and found it was damaged. The gas service line to the unit was secured at 02:30 on February 17, 2019.		
A viewing of the meter and riser evidence was conducted with the involved parties and the State of Utah Pipeline Safety on April 23, 2019.		
At this time, the cause of the fire is unknown and the incident is still under investigation. Company and other involved parties are waiting to complete the investigation until the snow and ice on site have melted (early Summer). DEU will update the report accordingly after additional information is provided from the investigation.
