INCIDENT REPORT - GAS DISTRIBUTION SYSTEM

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2137-0522. All responses to this collection of information are mandatory. Send comments regarding the burden or any other aspect of this collection of information, including suggestions for reducing the burden to: Information Collection Clearance Officer, PHMSA, Office of Pipeline Safety (PHP-30) 1200 New Jersey Avenue, SE, Washington, D.C. 20590.

INSTRUCTIONS

Important: Please read the separate instructions for completing this form before you begin. They clarify the information requested and provide specific examples. If you do not have a copy of the instructions, you can obtain one from the PHMSA Pipeline Safety Community Web Page at http://www.phmsa.dot.gov/pipeline/library/forms.

2. Specify:

On March 24, 2020 at 03:00 Dominion Energy Utah (DEU) was notified of a damaged gas line near Redwood Road and W 7800 S in West Jordan, Utah. DEU technicians arrived on-site and discovered that a 3rd party contractor had hit a natural gas main with drilling equipment. Company began immediate response to secure the damaged section of main. The damaged section of main was secured at 08:15. DEU engineering performed gas loss estimation calculations based on information obtained on-site. Once the damage hole size was observed at 11:15, DEU determined that gas loss was higher than anticipated and the event met incident criteria. Company reported the incident after determination.

The damaged section of main was cut out and replaced. The natural gas main was located and marked accurately. The contractor did not pot hole to verify location of the facilities prior to drilling.
