SUMMARY OF APPLICANTS MANAGEMENT TEAM

Andrew (Drew) A. Peterson, President, Marketing Manager

Mr. Peterson began his career in telecommunications in 1994 with Access Long Distance, Inc. as an account executive responsible in selling long distance service to small and medium sized business customers. Mr. Peterson was promoted to the Utah Sales Manager in 1996 and managed a team of account executives and large account managers. He was the top Sales Manager for Access Long Distance for 3 years before being promoted to Corporate Director of Sales. During his Sales Manager tenure, Access Long Distance grew from monthly revenue of less than one million to over 2 million in the Utah region. As Director of Sales, Mr. Peterson managed 6 Sales Managers and their teams. He successfully implemented the Internet products Access Long Distance sold. In 2000, McLeod USA purchase Access Long Distance and promoted Mr. Peterson to a Director/General Manager position. He was responsible for 10 Sales Managers and teams, 2 Executive Account Manager, a team of Administrative employees, and a sales engineering team. With over 110 individuals reporting through Mr. Peterson, he opened the local dial tone and Internet markets in Utah, Idaho, and Montana for McLeodUSA. Drew helped in setting pricing and creating products during this time. Mr. Peterson became the Director of Sales and Strategic Accounts prior to leaving McLeod and was the top Strategic Director of Sales for McLeodUSA in 2002.

Chad J. Bauer, Vice President, Chief Operations Officer (COO)

Mr. Bauer began his career in telecommunications in 1981 as a Provo Branch Manager with National Telecom, a alternative long distance provider. Upon the purchase of National Telecom, Inc. by Tel America, Mr. Bauer continued employment as a sales manger in the Utah County Area, General Manager of the State of Idaho, Sales Manager of the State of Utah, and Corporate Marketing Manager for Tel America. While with Tel America, Mr. Bauer became acquainted and experienced in sales, marketing, computer software, pricing and cost structures, equipment installation, programming and deployment, managing employees, opening sales offices, and running a profitable business. While working in the Corporate headquarters, Mr. Bauer was responsible for creating and implementing competitive products for the states in which Tel America provided service in. Using this experience and knowledge base, Mr. Bauer is now experienced in telephone switch operation, call routing, trouble shooting, developing profitable products, implementation of ideas, Voice over Internet Protocol development and deployment, providing Internet service to individuals and business, billing and collections.

Kevin L. Mayberry, Secretary, Chief Technical Officer (CTO)

Mr. Mayberry began his career in telecommunications in 1982 as a telephone system installer for Maycom Telematics, Inc., he was responsible for cabling, instalation, and programming of PBX telephone systems throughout the Intermountain and Midwest United States for businesses and small motels. In 1986 Mr. Mayberry became partner and co-owner of Central Office

Consultants, Inc., an authorized agent for Mountain Bell at that time, which became US West, and now Qwest. Mr. Mayberry provided consulting services and sold telecommunication service's to large business and governmental agencies. Mr. Mayberry has been instrumental in developing, programming, billing, and maintaining large telecom network infrastructures and well as deploying wireless, LAN, and WAN Internet networks. Mr. Mayberry is instrumental in working through "white papers" for telecom and Internet equipment to determine what the "real" capabilities are. Mr. Mayberry was instrumental in developing a shared tenant telecommunications network to provide off campus student housing with high quality, low cost, easy installation telephone and long distance service.

R. Matthew Ward, Assistant Marketing Manager

Mr. Ward has worked the last 5 years in telecommunications. Mr. Ward was a Major Account Representative for McLeodUSA Communications and was instrumental in selling, servicing, and maintaining business accounts. He was a top account representative during his tenure with McLeodUSA. Mr. Ward is well versed in telecom and developing and supporting products which will benefit consumers. As an Assistant Manager, Mr. Ward is also responsible for the team which maintains the accounts after the have purchased products from Veracity.

Christopher D. Modesitt, Internet Technology Manager

Mr. Modesitt has an extensive background in computer building, programming, and operation. He has been instrumental in maintaining the computer network for Metal West of Utah, prior to being employed with Veracity. Mr. Modesitt has deployed wireless, LAN, WAN, DSL, T-1, MegaCentral, ATM Internet networks. He has been instrumental in the successful development and deployment of Voice over Internet Protocol (VoIP) products. Mr. Modesitt creates, builds, and deploys products which can process local, long distance calls with dynamic Internet bandwidth available to the customer. He has a working understanding of all Microsoft OS's and Linux, and builds and maintains routers and servers using both operating system technology's, getting the best of both.

Lisa Matthews, Customer Service Manager

Ms. Matthews has worked the last 8 years with N.A.C.T., National Applied Computer Technology, a developer and manufacture of telecom switches used by alternative carriers. Ms. Matthews has managed the switch plant for remote company owners all over the world, allowing them to market long distance, calling card, and prepaid services without having to maintain the switch on their site. She has extensive customer service experience in the telecommunications industry, and has spent the past 3 years training purchases of the N.A.C.T. switches how to program, manage, and run their business. She has the understanding, knowledge, personality, and common sense to train and manage customer service representatives to service our customers.
