COMPANY-OWNED LINE EXTENSION SERVICE

III. <u>GENERAL PROVISIONS</u> (Continued)

E. The Telephone Company will provide, at its expense, up to \$2,500.00 of metallic (two-wire) circuit or its equal, on existing Company pole leads per applicant. In those circumstances where extension to outside plant facilities exceeds \$2,500.00 per applicant, in addition to any material or labor to be furnished by the customer, the customer will pay in advance one-half of the estimated total cost of the utility's construction as prescribed in R746-360-9(B)(1) and as may be set forth in a contract executed between the utility and the customer. If costs exceed twice the state wide loop investment, as set forth annually by the Division of Public Utilities, pursuant to R746-360-9(B)(1), the customer must bear all remaining costs, except as may be ordered by the Commission.

F. Relocation of Company Facilities

When an applicant, customer, association or other third-party requests a change in the type, location or the relocation of aerial or underground of communications facilities used to provide telephone service, the requestor shall be required to pay the cost incurred by the Company for such change or relocation of facilities to the extent payment does not conflict with federal, state, or local law. Payment for the cost of the change or relocation must be made prior to the change or relocation.
