**6. SWITCHED ACCESS SERVICE**

**6.7 RATE REGULATIONS**

**6.7.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES**

C. Nonrecurring Charges (Cont'd)

6. Rearrangement of FGB or FGD Trunks from a Company Access Tandem Route to a Direct Route.

(N)

When the customer requests the rearrangement of existing FGB or FGD trunks from a Company access tandem route to an end office direct route, charges are determined as set forth following.

When the customer has the DTT rating option between the SWC of the customer's premises and the access tandem and is requesting DTT to an end office, a rearrangement charge, as set forth in 6.8.1.D.4., following, is assessed if the following conditions are met.

- The rearrangement charge is assessed in association with the Interface Group, 1, 2, 6 or 9, and is applied per trunk in each direct routed access trunk group. The first trunk in the direct routed access trunk group is charged the "first trunk" charge and each additional trunk is charged the "each additional" trunk charge.
- The same customer premises, service type and Interface Group category are maintained with the exception of a change in Interface Group category and service type as set forth in 6.7.5, following. If the quantity of trunks changing to direct routed access exceeds the number of trunks disconnecting from the Company access tandem, full nonrecurring installation charges will apply for the additional trunks.
- Customers may specify a change in traffic type and direction (i.e., one-way to two-way) at the time the order is received.

Effective: 7/2/2013

**6. SWITCHED ACCESS SERVICE**

**6.7 RATE REGULATIONS**

**6.7.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES**

C. Nonrecurring Charges

6. Rearrangement of FGB or FGD Trunks from a Company Access Tandem Route to a Direct Route. (Cont'd)
  - Customers may specify a change in optional features (except Switched Transport multiplexing) at the time the order is received. If the optional feature has a separate nonrecurring charge, that nonrecurring charge will apply in addition to the rearrangement charge. Requests for a rearrangement from MF to SS7 out of band signaling must be received on a separate access order.
  - All trunks will be rearranged into 24 trunks within a direct routed access trunk group.
  - The order to disconnect the tandem route and to connect the end office DTT shall be placed at the same time. The disconnect date of the tandem route order may be negotiated with the Company not to exceed 30 days from the connect date of the end office DTT order with the exception of a change in service type as set forth in 6.7.5, following.
  - Customer specified rearrangement requests will be cooperatively negotiated with the customer and are subject to the availability of Company switching equipment and other existing facilities.

**6. SWITCHED ACCESS SERVICE**

**6.7 RATE REGULATIONS**

**6.7.1 DESCRIPTION AND APPLICATION OF RATES AND CHARGES**

C. Nonrecurring Charges (Cont'd)

7. Rollover

When a customer meets the rollover conditions , as set forth in (a), following, and is rearranging their facilities, as set forth in (b), following, a rollover charge shall apply to the lower speed facility as specified in 6.8, following. When the requested change does not meet the rollover conditions, then the appropriate nonrecurring charge applies as set forth in this section.

(a) Rollover Conditions

- The EF and/or DTT facilities are provided between the same customer locations as the original facilities, and
- all rollovers are performed at the same Company central office location, and
- all facilities involved in the rollover are provided by the Company.

(b) Rollover Service Rearrangements

- A lower speed Entrance Facility or DTT facility is to be placed on a higher speed facility, or
- moved from one higher speed facility to a different higher speed facility, or
- moved to a different channel on the same multiplexed facility.

If an order is required to rearrange the lines and/or trunks associated with a facility rollover, service rearrangement charges (e.g., Switched Transport per-line or per-trunk nonrecurring charges) may apply as set forth in C.3, preceding in addition to the facility rollover charges.

If an order is required to change the interface group category on the lines and/or trunks associated with a facility rollover, then the terms and conditions as set forth in 6.7.5, following, apply in addition to the facility rollover charge.

If an order is required to change the Switched Access Service type on the lines and/or trunks associated with a facility rollover, then the terms and conditions as set forth in 6.7.5, following, apply in addition to the facility rollover charge.

Effective: 7/2/2013

### 6. SWITCHED ACCESS SERVICE

#### 6.7 RATE REGULATIONS (Cont'd)

##### 6.7.13 DENSITY ZONE PRICING PLAN

###### A. General

The Density Zone Pricing Plan consists of Zones 1, 2 and 3. The Density Zone Pricing Plan applies to EF DS1 and DS3, DTT DS1 and DS3, EF DS1 to VG multiplexing, EF DS3 to DS1 multiplexing, DTT DS1 to VG multiplexing, DTT DS3 to DS1 multiplexing and DS1 to DS3 rollover rates and charges.

For DTT DS1 and DTT DS3 and associated multiplexing equipment provisioned between a Company serving wire center in one zone and a Company Hub, tandem or end office wire center located in a different zone, the zone with the highest mileage rate is the applicable zone rate.

Density zones are designated by wire center in National Exchange Carrier Association, Inc., Tariff F. C. C. No. 4.
