INTRASTATE ACCESS SERVICE

2. General Regulations

2.1 – 2.7 General Regulations for this tariff are contained in the following sections of the National Exchange Carrier Association (NECA) Federal Communications Commission (FCC) Tariff Number 5, effective May 5, 2012.

- 2.1 Undertaking of the Telephone Company
- 2.2 Use
- 2.3.1 – 2.3.11(A) and (B), Obligations of the Customer
- 2.3.11 Jurisdictional Report and Certification Requirements

(C)
(N)
|
(N)

The following regulations apply in addition to the regulations referenced in NECA Tariff Number 5.

(C) Jurisdictional Reports – Switched Access

For Switched Access Service, the Telephone Company cannot in all cases determine the jurisdictional nature of customer traffic and its related access minutes. In such cases the customer may be called upon to provide a projected estimate of its traffic, split between the interstate and intrastate jurisdictions. For purposes of determining the jurisdiction of Switched Access Services, the regulations set forth in (1) through (4), below, apply.

(1) Percentage of Interstate Use (PIU)

- (a) For purposes of developing the projected interstate percentage for Feature Group C or Feature Group D, the customer shall consider every call that originates from a calling party in one state and terminates to a called party in a different state to be interstate communications. The customer shall consider every call that terminates to a called party within the same state as the state where the calling party is located to be intrastate communications. The manner in which a call is routed through the telecommunications network does not affect the jurisdiction of a call, i.e., a call between two points within the same state is an intrastate call even if it is routed through another state.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(1) Percentage of Interstate Use (PIU) (Cont'd)

- (b) When the Telephone Company receives sufficient call detail to permit it to determine the jurisdiction of some or all originating and terminating access minutes of use, the Telephone Company will use that call detail to render bills for those minutes of use and will not use PIU factors(s) described in (2), below, to determine the jurisdiction of those minutes of use.

When the Telephone Company receives insufficient call detail to determine the jurisdiction of some or all originating and terminating access minutes of use, the Telephone Company will apply the PIU factor(s) provided by the customer or developed by the Telephone Company as set forth in (2), below, only to those minutes of use for which the Telephone Company does not have sufficient call detail. Such PIU factor(s) will be used until the customer provides an update to its PIU factor(s) as set forth in (2) (f) or (g), below.

For all flat rated Switched Access Services, the Telephone Company will measure the jurisdiction of the element directly to determine the interstate portion and the state originating portion of the service or apply the PIU and/or Adjustment Factor(s) as provided by the customer or developed by the Telephone Company as set forth in (2), below, each month until the customer provides an update to its PIU factor(s) as described in (2) (f) or (g), below.

(C)
|
(C)

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

In cases where terminating state access is Local Transport Restructure (“LTR”) and originating access is non-Local Transport Restructure (“non-LTR”), there will be an additional Adjustment Factor applied to the flat rated Entrance Facilities, Direct Trunked Transport Facilities and Switched Access Service Optional Features and Functions. The Adjustment Factor will reduce the flat rated element by the percent of originating intrastate traffic flowing over the flat rated facility (“Adjustment Factor”). The Adjustment Factor shall be provided by the customer or developed by the Telephone Company as set forth in subsection (2), below.

(N)
|
(N)

(2) Use of PIU Factors

(a) As specified in Section 5.2.1, following, the customer will provide a projected PIU for each Switched Access Service for each end office when placing its order. Such PIU factors are applied to all usage rated elements (including but not limited to Information Surcharge, Local Switching, and Tandem Switched Transport) where the Telephone Company does not receive sufficient call detail to determine the jurisdiction of the usage.

If the customer fails to provide a PIU factor on its order for service, the following provisions apply:

(i) For originating access minutes, when the call detail is adequate to determine the appropriate jurisdiction and when the Feature Group C or Feature Group D access minutes of use are measured, the Telephone Company will develop PIU factor(s) on a monthly basis by end office by dividing the customer’s measured interstate originating access minutes (the access minutes where the calling party is in one state and the called party is in another state) by the customer’s total originating access minutes.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

- (ii) For terminating access minutes, other than as specified in (iii), below, the same data used by the Telephone Company to develop the PIU factor for originating access minutes will be used to develop the PIU factor for such terminating access minutes.
- (iii) For terminating Feature Group D access minutes used in conjunction with Internet Protocol Gateway Access Service (IPG) as described in Section 16, the Telephone Company will apply a default PIU of 50% to the IPG customer's terminating access minutes.

The Telephone Company developed PIU factor(s) described in this section will only be used for minutes of use for which the Telephone Company does not have sufficient call detail to determine the jurisdiction until such time as the customer provides updated PIU factor(s) for these services.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

- (b) Separate PIUs are required for flat rated Entrance Facilities, Direct Trunked Transport Facilities, and Switched Access Services Optional Features and Functions. The PIU factor(s) for use with such flat rated elements will reflect the combination of originating and terminating traffic of all services using such facilities.

If the customer fails to provide a PIU factor on its order for service, the Telephone Company will apply the PIU factor it developed pursuant to (2)(a), above, against the customer's flat rated Switched Access Services to apportion those changes between the jurisdictions.

When the terminating intrastate access is LTR and originating access is non-LTR, the Telephone Company shall develop an Adjustment Factor to reduce the intrastate flat rate elements by the percent of originating intrastate usage. The Telephone Company will calculate the Adjustment Factor by measuring the intrastate originating and intrastate terminating minutes generated by the Customer over a three month period. The Adjustment Factor shall be the ratio of originating intrastate minutes divided by the total number of intrastate minutes of the customer expressed in a whole percentage. The Adjustment Factor shall be calculated by the Telephone Company annually unless the Customer provides an Adjustment Factor.

(N)

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

- (c) When a customer orders Directory Assistance Service, the customer shall, in its order, provide the projected interstate percentage for terminating use.
- (d) When the customer has both interstate and intrastate Operator Services traffic, the percentage interstate usage determined for the customer's FGC or FGD service will be applied to the customer's Operator Services charges.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(2) Use of PIU Factors (Cont'd)

- (e) For each service, the customer may only provide a PIU factor that is in a whole number format, i.e., a number from 0 to 100. When the customer provides the PIU factor, the Telephone Company will subtract the provided PIU from 100 and the difference is the percent intrastate usage. The sum of the interstate and intrastate percentages will equal 100 percent. The customer provided factors will be used by the Telephone Company as described in (1)(b), above, until the customer provides updated PIU factors as required in (2)(f) or (g), below.

For flat rated elements that require an Adjustment Factor, intrastate elements shall be calculated as follows:

- (i) When the customer provides the PIU factor, the Telephone Company will use the inverse of the PIU as the percent intrastate.
- (ii) The intrastate amount is calculated by multiplying the intrastate flat rate by the percent intrastate.
- (iii) The Adjustment Factor shall then be applied to the intrastate billed amount to determine the reduction from the intrastate amount.
- (iv) The amount due from the Customer shall equal the intrastate amount minus the reduction from the Adjustment Factor.
- (f) When the customer adds or discontinues Busy Hour Minutes of Capacity (BHMC), lines or trunks to an existing Switched Access Service group, the customer shall furnish a revised projected interstate percentage for the remaining BHMC, lines or trunks in the end office group. The revised report will serve as the basis for future billing, where applicable, and will be effective on the next bill date. No prorating or back billing will be done based on such revised report.

|
(N)

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)(C) Jurisdictional Reports – Switched Access (Cont'd)(2) Use of PIU Factors (Cont'd)

- (g) Effective on the first of January, April, July and October of each year, the customer shall update its interstate and intrastate jurisdictional report. The customer shall forward to the Telephone Company, to be received no later than fifteen (15) days after the first of each such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June and September, respectively, for each service arranged for interstate use. Such revised report will serve as the basis for the next three month's billing for determining the jurisdiction for Switched Access Services in cases where the Telephone Company does not have sufficient call detail to do so and will be effective on the bill date for that service. No prorating or back billing will be done based on the revised report.

If the customer does not supply the revised reports, the Telephone Company will assume the percentages to be the same as those provided in the last quarterly report. For those cases in which a quarterly report has never been received from the customer, the Telephone Company will assume the percentages to be the same as those provided in the customer's order for service or as developed by the Telephone Company as specified in (2)(a), above.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(3) Maintenance of Customer Records

- (a) The customer shall retain for a minimum of six (6) months call detail records that substantiate the interstate percent provided to the Telephone Company as set forth in (2), above, for Switched Access Services. Such records shall consist of (i) and (ii), below, if applicable.
 - (i) All call detail records such as work papers and/or backup documentation including paper, magnetic tapes or any other form of records for billed customer traffic, call information including call terminating address (i.e., called number), the call duration, all originating and terminating trunk groups or access lines over which the call is routed, and the point at which the call enters the customer's network and;
 - (ii) If the customer has a mechanized system in place that calculated the PIU, then a description of that system and the methodology used to calculate the PIU must be furnished and any other pertinent information (such as but not limited to flowcharts, source code, etc.) relating to such system must also be made available.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(4) Disputes Involving Jurisdictional Reports – Switched Access

- (a) If a billing dispute arises or if a regulatory commission questions the projected PIU factor(s) or Adjustment Factor provided by the customer, the Telephone Company may, by written request, require the customer to provide the data the customer used to determine the projected PIU factor(s). This written request will be considered the initiation of the audit. The customer shall supply the data to an independent auditor or the Telephone Company within thirty (30) days of the Telephone Company request. The customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained as set forth in (3), above, and upon request of the Telephone Company make the records available for inspection at an agreed upon location during normal business hours as reasonably necessary for purposes of verification of the percentages. The Telephone Company will audit data from one quarter unless a longer period is requested by the customer and agreed to by the Telephone Company. (C) (C)

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(4) Disputes Involving Jurisdictional Reports – Switched Access
(Cont'd)

- (b) If the customer does not provide the requested data to the Telephone Company or independent auditor within thirty (30) days of the notice of audit, the customer will be in violation of the Tariff and subject to the provisions specified in Section 2.1.8(A), preceding.
- (c) Audits may be conducted by: (1) the Telephone Company when the customer agrees; (2) an independent auditor under contract to the Telephone Company; (3) a mutually agreed upon independent auditor paid for equally by the customer and the Telephone Company; or (4) an independent auditor selected and paid for by the customer. If the customer selects option (4), where it pays for its own independent audit, the selected auditor must certify that the audit was performed following Commission procedures for measuring interstate traffic as established by Commission Order, and provide the Telephone Company a report with supporting documentation to verify such procedures.
- (d) Verification audits may be conducted no more frequently than once per year except in extreme circumstances. The Telephone Company and customer will attempt to limit the audit to a reasonable time to effectively complete the audit. The Telephone Company and customer shall respond promptly to requests generated during the audit to ensure timely completion of the audit.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)

(C) Jurisdictional Reports – Switched Access (Cont'd)

(4) Disputes Involving Jurisdictional Reports – Switched Access
(Cont'd)

- (e) When a PIU or Adjustment Factor audit is conducted by the Telephone Company or an independent auditor under contract to the Telephone Company, the audit results will be furnished to the customer by Certified U.S. Mail. When a PIU audit is conducted by an independent auditor selected by the customer, the audit results will be furnished to the Telephone Company by Certified U.S. Mail. The Telephone Company will adjust the customer's PIU based upon the audit results. The PIU resulting from the audit shall be applied to the customer's usage for the quarter the audit is completed, the usage for the quarter prior to the completion of the audit, and the usage for the two (2) quarters following the completion of the audit. After that time, the customer may report revised PIU pursuant to (2)(f) or (g), above. If the revised PIU submitted by the customer represents a deviation of 5 percentage points or more from the audited PIU, and that deviation is not due to identifiable reasons, the provisions in (4)(a), above, may be applied. (C)
- (f) Both credit and debit adjustments will be made to the customer's interstate access charges based on the audit results for the specified periods to accurately reflect the interstate usage for the customer's account consistent with Section 2.4.1, following.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)2.3.11 Jurisdictional Report and Certification Requirements (Cont'd)(C) Jurisdictional Reports – Switched Access (Cont'd)(4) Disputes Involving Jurisdictional Reports – Switched Access
(Cont'd)

- (g) If, as a result of an audit conducted by an independent auditor, a customer is found to have over-stated its PIU(s) or Adjustment Factor by 20 percentage points or more, the Telephone Company shall require reimbursement from the customer for the cost of the audit. Such bill(s) shall be due and paid in immediately available funds within 30 days from receipt and shall carry a late payment penalty as set forth in Section 2.4.1, following, if not paid within the 30 days. (C)

2.3.12 Determination of Interstate Charges for Mixed Interstate and Intrastate Switched Access Service

When mixed interstate and intrastate Switched Access Service is provided, all charges (i.e., nonrecurring, monthly and/or usage) including optional features charges, will be prorated between interstate and intrastate. The PIU factor(s) provided by the customer or developed by the Telephone Company as set forth in Section 2.3.11(C)(2), preceding, will serve as the basis for prorating the charges unless the Telephone Company is billing according to sufficient call details as set forth in Section 2.3.11(C)(1)(b), preceding. The percentage of a Switched Access Service to be charged as interstate is applied in the following manner:

- (A) Monthly and Nonrecurring Charges For monthly and nonrecurring chargeable rate elements, multiply the percent interstate use times the quantity of chargeable elements times the stated tariff rate per element.
- (B) Usage Sensitive Charges For usage sensitive (i.e., access minutes and calls) chargeable rate elements, multiply the percent interstate use times actual use (i.e., measured or Telephone Company assumed average use) times the stated tariff rate.

INTRASTATE ACCESS SERVICE

2. General Regulations (Cont'd)

- 2.4 Payment Arrangements and Credit Allowances
- 2.5 Connections
- 2.6 Definitions
- 2.7 The following definitions are in addition to the definitions references in the NECA Tariff Number 5.

A. Customers

Any individual, partnership, association, joint-stock company, trust, corporation, or governmental entity or other entity which orders to the services offered under this tariff, including Local Exchange Carrier(s), Interexchange Carrier(s) (IC's), providers of originating and terminating VoIP-PSTN traffic and End Users(s).

B. Internet Protocol (IP)

The term "Internet Protocol" denotes a packet data-oriented protocol used for communicating call signaling information.

C. Multi-Frequency Signaling (MF)

An in-band signaling method in which call signaling information is transmitted between network switches using the same voiceband channel used for voice.

D. Originating Direction

The use of access service for the origination of calls from an End User Premises to an IC Premises or a Customer's Premises.

E. Public Switch Telephone Network (PSTN)

Public Switch Telephone Network refers to the local, long distance and international phone system which we use every day. In the United States, PSTN refers to the entire interconnected collection of local, long distance and international phone companies, which could be thousands.
