This filing adds language pursuant to 47 CFR §9.16(b)(1) and (2), pertaining to Kari's Law. Specifically, these revisions add language related to requirements that equipment manufactured after that date be configured to allow callers to dial "911" directly without first dialing an access code. Where applicable, features or calling options that allow configurations that require an access code before reaching the telephone company's network must not be configured as such for 911 calls.

Respectfully submitted,
