Dear Ms. Paschal:

Enclosed is a revision to AT&T Private Line Services Price List. The purpose of this filing is to grandfather AT&T LD Private Line Service in the Local Channel Services Tariff. The following Price List pages are attached:

| <u>Section</u> | <u>Page</u> | <u>Release</u> |
|----------------|-------------|----------------|
| Section 16     | 1           | 2              |
| Price List     | 11          | 2              |

The requested date of filing is June 25, 2021 with an effective date of June 30, 2021.

If you have any questions or concerns, please call me at (917) 838-8336.

Respectfully,

Patricia Scrocco

ISSUED: June 25, 2021  
EFFECTIVE: June 30, 2021

Section 16  
Page 1

SECTION 16 - AT&T WAVELENGTH PRIVATE LINE (WPL) SERVICE

Effective June 30, 2021, AT&T Wavelength Private Line (WPL) Service will no longer be available for purchase by new or existing customers. In addition, requests to move, add, change, or renew existing service arrangements will not be accepted. Following the expiration of a customer's existing term agreement, service will be provided on a month-to-month basis at the applicable Monthly rates until the service is discontinued. The Company currently plans to discontinue this service on or after October 31, 2022.

16.1 GENERAL

AT&T Wavelength Private Line Service (WPL) is a managed, high-speed, optical transport service that provides custom optical networking solutions for interconnecting customer's locations, data centers and business sites in a Metropolitan Area Network (MAN) environment with the ability to extend the MAN into the Wide Area Network (WAN). AT&T WPL offers inter-connection to other carrier Co-location facilities, carrier hotels, AT&T's IDCs, or other AT&T providers.

AT&T WPL supports the transmission of multiple protocols concurrently on the same fibers.

The supported protocols include:

- 2.5 Gbps Wavelengths
- Gigabit Ethernet
- 10 Gbps Wavelengths
- 10GE LAN/WAN PHY

AT&T WPL utilizes Dense Wavelength Division Multiplexing (DWDM) technologies to allow multiple frequencies or wavelengths of light that can be used to carry up to a maximum of 44 wavelengths (or channels) of data, each up to 10 Gbps. WPL can be designed to traverse both LATAs and state boundaries (Interstate only).

16.2 WPL DESIGN

AT&T WPL is an unprotected, point to point, custom designed service solution based upon specific customer requirements.

16.3 WPL AVAILABILITY

AT&T WPL is a domestic U.S. service and is offered subject to the availability of the facilities and equipment required to provide the service. WPL Service may only be purchased under this tariff by customers whose traffic on the service will be at least 90% intrastate in nature. WPL service can support both intrastate and interstate traffic, and is available for purchase under AT&T's Interstate Service Guide by customers whose traffic on the service will be more than 10% interstate in nature.
