Re: **Docket No. 22-053-T01**, TARIFF UBTA-UBET Communications Inc.'s Tariff Revisions to reduce or eliminate 8YY originating access charges to comply with the Federal Communications Commission (FCC) 8YY Reform Order.

Recommendation (Approve Tariff Sheets)

The Division of Public Utilities (DPU or Division) has reviewed the tariff filing and recommends the Public Service Commission (PSC or Commission) approve UBTA-UBET Communications Inc.'s (UBTA-UBET or Company) request to revise the 8YY Access Charge Rates. The Division therefore recommends the tariff change become effective on July 1, 2022.

Issue

On June 1, 2022, UBTA-UBET submitted to the Commission, Advice Letter UBTA-UBET Communications Inc./Tariff Filing Docket No. 22-053-T01 including revised tariff sheets, with the purpose to revise the tariff rates as required in the FCC's 8YY Access Charge Reform, Report and Order FCC 20-143, WC Docket No. 18-156, adopted October 7, 2020.¹ Due to an error in the Vertical Feature rate included with the filing, on June 6, 2022, the Company submitted a revised Advice Letter and corrected Revised Tariff Sheet and a redline copy. The Commission issued an Action Request on June 1, 2022, for the Division to investigate the proposed changes and report its findings and recommendation to the

¹ FCC Order 20-143, WC Docket No. 18-156 adopted October 7, 2020.

Commission on June 15, 2022. This memorandum represents the Division's response to the Commission's Action Request.

Background

In October 2020, the FCC adopted an order to modernize rules for toll free (8YY) calling. The order steps down 8YY originating access charges to a bill-and-keep system over a transition period beginning July 1, 2021 and ending July 1, 2023. Originating 8YY transport and tandem switching fees were combined to a single transport service rate capped at \$0.001 per minute effective July 1, 2021. Charges for 8YY database queries will also be transitioned to \$0.0002 over the three-year transition period. Additionally, the order combines separate 8YY transport and tandem switching charges into a single access charge.²

Discussion

The Division reviewed the advice letter and redlined version of the tariff sheets submitted with the Company's filing. An error was found in the Vertical Feature rate, so the Company submitted a corrected copy of the tariff sheet and redline version. As included in the revised filing, the proposed originating access and query rates have been reduced as required by the stepdown reduction plan and appear to comply with the FCC's 8YY Reform Order. No other rates were affected by the order and no other rate changes were proposed.

Conclusion

The Division has reviewed UBTA-UBET's revised filing and has no objections to the proposed revisions. Therefore, the Division recommends the Commission approve the revised filing as submitted, with an effective date of July 1, 2022, as requested.
