RE: Activation of Codes

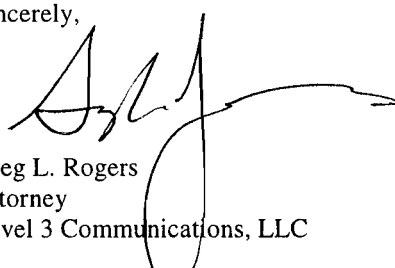

Dear Chairman Mecham:

On December 4, 2000 I wrote a letter on behalf of Level 3 Communications, LLC ("Level 3") requesting the grant of an extension of time in which to place certain NPA codes into service. As of today's date, Level 3 has been able to activate five (5) of the total of six (6) codes that were the subject of the previous letter.

Level 3 has requested and been assigned six NPA codes in Utah by NANPA Code Administration. They are 435-213, 435-214, 435-215, 801-783, 801-784 and 801-788. Each of these six codes had an in-service due date of December 13, 2000. Because of a myriad of factors relating to the fact that Level 3 is building an entirely new network from the ground up, Level 3 was unable to activate its codes by the in-service due date. Level 3 has continued to work diligently to activate these codes as quickly as possible. I am writing to inform the Commission that Level 3 has successfully activated all but one of the codes above today. Level 3 anticipates activating the remaining code, 435-215, in the coming days.

Thank you for your attention to and consideration of this matter. A copy of this letter is being sent to Anthony Davi at Nuestar, Inc. to inform them of this development. Further, I will immediately notify the Commission and NANPA when the remaining code 435-215 is activated. At this time, Level 3 will proceed on the assumption that it will not have its codes reclaimed and will continue to use them as we have planned. If you have any questions or concerns, please feel free to contact me.

Sincerely,

Greg L. Rogers
Attorney
Level 3 Communications, LLC
