Connections:

- 2.1 To what extent is each lot “connected” to the water system? For example, is the water main running in front of the lot, is there a stub from the water main to the lot property line, is there a meter installed on each lot, or all or a combination?
- 2.2 Depending on your answer above, if each lot has a meter installed, how much did the average connection cost the developer to install the meter, including materials and labor?

Or

If each lot is not fully connected, how much does the developer project its costs to be to connect each lot to the water main and install a meter, including materials and labor?

Projected Expenses:

- 2.3 Insurance: The projected insurance line item is for liability. Bumblebee’s estimate of \$150 to \$168.75 appears low. Please provide at least two estimates for insurance that adequately covers liability for the water system.
- 2.4 Chemicals: Typically, but not always, water is required to be treated with chemicals. If this is the case, please provide an estimated chemical expense amount.
- 2.5 Transfers Out: What is the \$4,000 transfer projected for 2016 and 2017?
