It is a pleasure to present to you the Annual Report for fiscal year 2020 of the Public Service Commission of Utah (PSC). This report has been prepared in accordance with Utah Code Ann. § 54-1-10, which requires the PSC to submit to you a report of its activities during the fiscal year ending June 30, 2020.

This annual report highlights the issues and activities the PSC has focused on during the year.

We look forward to your continued support as we serve the citizens of Utah.

Respectfully submitted,

Thad LeVar, Commission Chair

David R. Clark, Commissioner

Ron Allen, Commissioner
### Public Service Commission Personnel – June 30, 2020

HISTORY
OF THE PSC & THE REGULATORY PROCESS

Since its origin under the Public Utilities Act of 1917, the Public Service Commission of Utah (PSC) has served the citizens of Utah through technical and economic regulation of the state’s public utility companies. These privately owned but government regulated companies provide telecommunications, electricity, natural gas, water, and sewer systems through which important services are delivered to Utah households and businesses.

Utility companies are certificated monopolies. With some exceptions in the telecommunications industry, each utility is the sole provider of utility service in a designated geographic area of the State.

Because there is no competition, federal and state law obligates the PSC to promote and protect the public interest by ensuring that public utility service is adequate in quality and reliability, and is available to everyone at just and reasonable prices. The prices, terms, and conditions of utility service affect the quality of the state’s infrastructure.

Organization of the Regulatory Function in Utah Today

Since 1983, when the legislature last reorganized Utah’s public utility regulatory function, the PSC has been an independent entity with a small staff. The PSC consists of a three-member commission, each commissioner appointed by the Governor to a six-year term, an administrative secretary and clerical staff, an executive staff director and technical staff, legal staff, and paralegal staff. Currently the PSC employs sixteen full-time and two part-time employees.

The Division of Public Utilities (DPU), within the Utah Department of Commerce, performs public utility audits and investigations, helps resolve customer complaints, and enforces PSC orders. Since its 1983 reorganization, the DPU has been empowered to represent an impartially-determined, broad public interest before the PSC. The DPU employs a Director and a clerical and technical staff and receives legal assistance from the Office of the Attorney General.

Utah’s utility consumer advocate was first established as the Committee of Consumer Services in 1977 by the Utah Legislature. In 2009 the Utah Legislature reorganized the Committee into the
Office of Consumer Services (OCS). The OCS is staffed with five full-time professionals led by a Director who is appointed by the Governor, with the concurrence of the Committee and consent of the Senate, for a term of six years. The Director, on behalf of the OCS, represents the interests of residential and small commercial consumers. The Committee of Consumer Services is a five-member board that advises the OCS regarding utility rate changes, policy objectives, and other regulatory actions that impact residential, small commercial, and irrigator customers.

**How the PSC Works**

As a regulatory decision-making body, the PSC exercises a delegated legislative power. Each regulatory decision is reached quasi-judicially – the decision must be based on evidence gathered in adjudicative proceedings. These proceedings protect the due process rights of parties.

In the course of a hearing, parties may include the public utility, the DPU, the OCS, and other intervenors. Parties present the sworn testimony and evidence of expert witnesses who are subject to cross examination.

In cases where significant revenue may be at stake or important issues of regulatory policy arise, intervenors may participate, representing interests as diverse as low-income customers, environmental groups, and large commercial or industrial customers. Cases raise issues of law, economics, accounting, finance, engineering, and service quality.

The PSC’s task is reaching decisions that balance the interests of concerned parties in pursuit of outcomes that protect and promote the overall public interest. These decisions can be reviewed by the Utah Supreme Court.

During fiscal year 2020, there were 332 active and opened dockets. The PSC regulated 178 utility companies including gas, electric, telecommunications, water, sewer, and railroads.

</table>
Electric Utilities Overview

The largest electric utility regulated by the PSC is PacifiCorp, who does business in Utah as Rocky Mountain Power. PacifiCorp is an investor-owned utility serving over approximately 935,000 residential, commercial, and industrial customers in Utah. PacifiCorp also serves retail customers in five other Western states and wholesale customers throughout the west. PacifiCorp provides approximately 80 percent of the electricity to Utah homes and businesses. Other Utah customers are served either by municipal utilities, which are not regulated by the PSC, or by rural electric cooperatives or electric service districts, which are subject to minimal state regulation.

Rate Changes

In fiscal year 2020, the PSC approved four rate changes, which resulted in an approximate one-half percent decrease in the annual bill of a typical residential customer (using an average 700 kilowatt-hours of electricity per month). The PSC also approved a one-time energy efficiency-related refund.

1. Energy Balancing Account (EBA)
Following a June 2019 Utah Supreme Court decision related to the applicability of interim rates to PacifiCorp’s EBA, in July 2019 the PSC approved setting the EBA collection rates to zero, effective August 1, 2019. In March 2020, the PSC approved a $22,320 adjustment, slightly reducing PacifiCorp’s requested recovery of $23.9 million. The PSC’s approval of $23.9 million in deferred 2018 EBA costs resulted in an approximate one percent increase in a typical residential customer’s annual bill.

2. Demand Side Management (DSM)
In January 2020, the PSC approved Rocky Mountain Power’s December 2019 proposal to revise Electric Service Schedule No. 194, Demand Side Management (DSM) Credit, to implement a one-time DSM-related refund of $22 million to currently active retail customers subject to Electric Service Schedule No. 193, DSM Cost Adjustment. This resulted in an approximate average credit of $10.66 on residential customers’ February 2020 bills.

3. Renewable Energy Credit (REC) Balancing Account
In May 2020, the PSC approved an interim rate decrease to refund $1.03 million associated with Electric Service Schedule No. 98, REC Revenue Adjustment balancing account, effective June 1, 2020. This rate change resulted in a 0.1 percent decrease in a typical residential customer’s annual bill.
4. PacifiCorp’s Sustainable Transportation & Energy Plan Act Initiatives

In March 2016, the Utah Legislature enacted Senate Bill 115, Sustainable Transportation and Energy Plan Act (STEP). Among other things, STEP establishes a 5-year pilot program authorizing Rocky Mountain Power to allocate, on average, $10 million annually, subject to PSC approval, for the implementation of programs to develop solar resources, improve air quality, expand electric vehicle infrastructure, and to evaluate clean coal technologies, battery storage, and other emerging technologies.

In August 2019, the PSC approved Rocky Mountain Power’s July 2019 request for authorization to refund $3.06 million collected for the Solar Incentive Program (USIP) through a reduction in the Electric Service Schedule No. 196, STEP Cost Adjustment Pilot Program rates, effective November 1, 2019. This rate change resulted in a 0.13 percent decrease in a typical residential customer’s annual bill.

Other Annual Rate Changes

In March 2020, the PSC approved PacifiCorp’s application to lower the interest rate applicable to residential and non-residential deposits, as well as various balancing accounts, from 4.37% to 3.88%, effective April 1, 2020.

In June 2020, the PSC approved PacifiCorp’s proposal to update the valuation of net excess generation credits for large non-residential customers in Schedule 135, Net Metering Service, effective July 1, 2020.

DSM and Electric Energy Conservation

In 2019, PacifiCorp spent approximately $53.3 million on energy efficiency and load management programs. These programs help reduce load and improve energy efficiency in new and existing homes and non-residential buildings and processes, encourage the purchase of energy-efficient appliances, and directly control air conditioners and irrigation pumps. PacifiCorp reported that in 2019 its load management programs saved a maximum of 202 megawatts (MW) of power during a single load-reduction event. In addition, PacifiCorp reported its energy efficiency programs saved approximately 272,385 megawatt hours of energy.

All-Source Request for Proposal

In April 2020, PacifiCorp filed an application (“Application”) requesting approval of its 2020 All-Source Request for Proposal (“AS RFP”) to add up to 1,823 MWs of new solar resources co-located with 595 MWs of new battery energy storage system capacity and 1,920 MWs of new wind resources. In March 2020, as required by Utah Code Ann. § 54-17-203, the PSC hired an independent evaluator to monitor the 2020 AS RFP. Based on comments received, PacifiCorp filed revisions to the AS RFP which the PSC approved in early July 2020.
Planning For Least Cost Reliable Power, Integrated Resource Plan (IRP)

The PSC requires PacifiCorp to file, on a biennial basis, an IRP describing its plan to supply and manage growing demand for electricity in its six-state service territory for the next 20 years. During the intervening year, PacifiCorp files an update to its most recent IRP. In October 2019, PacifiCorp filed its 2019 IRP.

As presented in the 2019 IRP, PacifiCorp will meet its resource needs with new renewable resources, energy storage resources, demand side management resources, and short-term firm market purchases. Over the 20-year planning horizon 2019 through 2038, the preferred portfolio includes cumulative supply additions of 1,872 MW of new gas-fired capacity, 3,029 MW of new stand-alone wind resources, 81 MW of new wind resources that include storage, approximately 5,745 MW of new solar resources that include storage, approximately 1,365 MW of battery storage, 2,315 MW of incremental energy efficiency, 444 MW of new direct load control resources, and, on average through the 20-year horizon, 1,044 MW of unspecified annual firm power purchases.

The 2019 IRP preferred portfolio includes the early retirement or repowering of 2,043 MW of existing coal resources, the end-of-life retirement of 3,036 MW of thermal resources, and retirement of 282 MW of hydro, 40 MW of wind, and 33 MW of other resources. The preferred portfolio also includes the expiration of 1,284 MW of existing wind Power Purchase Agreements (PPAs) and 1,399 MW of existing solar PPAs.

In May 2020, the PSC issued an order acknowledging that the 2019 IRP substantially complies with the PSC’s IRP Standards and Guidelines. The PSC, however, declined to acknowledge or approve the 2019 IRP’s Action Plan due in part to inadequate evaluation of transmission alternatives.

PacifiCorp’s 2020 Protocol for Cost and Revenue Allocation

PacifiCorp, a multi-jurisdictional utility operating in Utah, Wyoming, Idaho, Washington, Oregon, and California, must recover its costs in a manner sufficient to operate as a fully merged and integrated system. In 2016, the PSC approved a method for apportioning PacifiCorp’s costs and revenues among its various jurisdictions and for determining PacifiCorp’s Utah revenue requirement. That method expired at the end of 2019.

In December 2019, PacifiCorp filed an application requesting approval of a new agreement, the 2020 PacifiCorp Inter-Jurisdictional Allocation Protocol (“2020 Protocol”) executed by more than 20 government agencies, customer associations, conservation groups, and individual large customers.

Among other things, the 2020 Protocol includes time frames and effective periods for implementation and resolution of certain issues. The actions in the 2020 Protocol are intended to result in a new allocation methodology for PacifiCorp’s six states. The PSC approved the 2020 Protocol in April 2020.
Energy Service Contracts

In October 2019, PacifiCorp filed an application with the PSC requesting approval of its Renewable Energy Service Contracts with Salt Lake City Corporation, Park City Municipal Corporation, Summit County, Utah, Utah Valley University, VR CPC Holdings, Inc., and Deer Valley Resort Company, LLC in accordance with Utah Code Ann. § 54-17-806 and Electric Service Schedule No. 34, Renewable Energy Purchases for Qualified Customers – 5,000 kW and Over (“Schedule 34”). PacifiCorp sought approval of the contracts as part of its ongoing efforts to help these customers meet all or a portion of their energy needs with new renewable resources acquired on their behalves. Following minor corrections, in February 2020, the PSC approved the contracts concluding that their prices, terms, and conditions were consistent with applicable law, relevant PSC orders, and Schedule 34.

Update of Depreciation Rates

In September 2018, PacifiCorp proposed to change its depreciation rates effective January 1, 2021. PacifiCorp’s proposed rates would increase Utah’s annual depreciation expense by approximately $100.1 million. In addition, the proposed termination of excess reserve amortizations would increase depreciation expense by approximately $28.0 million. In March 2020, parties to this docket agreed to a Stipulation.

As proposed in the Stipulation, PacifiCorp’s annual depreciation expense would increase by approximately $61.6 million with rates becoming effective on January 1, 2021, while the excess reserve amortization would remain at $28.0 million. The PSC approved the Stipulation in April 2020.

Request for a Deferred Accounting Order – Costs Due to the COVID-19 Pandemic

In April 2020, PacifiCorp filed an application requesting the PSC authorize an accounting order to record a regulatory asset associated with costs incurred as part of its response to the COVID-19 public health emergency. This case continued into FY 2021.

2020 General Rate Case Filing

In May 2020, PacifiCorp filed an application requesting authority to increase its retail rates by $95.8 million, an approximate 4.8 percent increase in Utah revenues. Among other things, capital investment in repowered wind resources, new wind resources, transmission projects, and increased depreciation expense were listed as the driving factors behind the proposed increase. This case continued into FY 2021.
Utility Facility Review Board

The Utility Facility Review Board Act (“Act”), as defined by Utah Code Ann. § 54-14, provides for a Utility Facility Review Board (“Board”) to resolve disputes between local governments and public utilities regarding the siting and construction of facilities. In January 2020, PacifiCorp filed a petition before the Board concerning PacifiCorp’s efforts to construct a new double circuit 46kV and 138kV transmission line (the “Project”) located in Midway City, Heber City, and parts of unincorporated Wasatch County. The Petition is concerned with the approximately one-mile segment of the Project to be located in Midway City (“Midway Segment”) and a conditional use permit (“CUP”) Midway City issued to PacifiCorp to construct and operate the Project. The CUP expressed Midway City’s intention to require PacifiCorp to install the Midway Segment underground with the understanding that Midway City would pay the difference between the cost of overhead lines and the cost of underground lines. However, Midway City disputed the cost estimates and the schedule put forward by PacifiCorp for the underground installation of the Midway Segment.

The Board determined the Project, including the Midway Segment, is needed by PacifiCorp to provide safe, reliable, adequate, and efficient service to its customers. The Board found that construction of the Project and the Midway Segment must commence by November 2020 to avoid significant risk of impairment to safe, reliable, and adequate utility service, and established the actual excess costs Midway City must pay to proceed with underground construction.

PSC-Related 2020 Legislative and Rule Changes

During the 2020 General Session, the Utah Legislature passed and Governor Herbert signed:

House Bill 66: This bill enacts and modifies provisions relating to wildland fire planning and cost recovery in Utah Code Ann. §§ 54-24-101 to -203, Wildland Fire Planning and Cost Recovery Act. Among other things, this Act: requires the PSC to make rules to implement the requirements of HB 66; requires a qualified utility and an electric cooperative to prepare and submit for approval a wildland fire protection plan and specifies the information that is required to be included in a wildland fire protection plan; and requires a qualified utility to report annually on certain capital investments and expenses incurred for the implementation of a wildland fire protection plan to the PSC.

House Bill 396: This bill requires the PSC to authorize a large-scale electric utility to establish a vehicle charging infrastructure program that allows for a $50,000,000 initial investment and authorizes the PSC to allow a large-scale electric utility to recover its investment in vehicle charging infrastructure and services.
Rule Changes

- On April 3, 2019, the PSC initiated Docket No. 19-R314-01, Proposed Rulemaking Concerning Utah Code Ann. §§ 54-17-901 to -909, Community Renewable Energy Act. In November 2019, the PSC filed a proposed new rule that was based on a consensus among all stakeholders. This rule was made effective January 8, 2020.

- On April 30, 2020, the PSC initiated Docket No. 20-R001-01, Proposed New Rule Utah Admin. Code R747-1, Utility Facility Review Board Rule. The proposed rule establishes the Board’s authority to schedule electronic meetings and the opportunity for interested parties to request electronic meetings.

Other Activities

During FY 2020, the PSC completed its review of tariff filings from three electric cooperatives for compliance with Utah Code Ann. § 54-7-12(7), evaluated two electric cooperative applications for authority to issue securities, one request for a PSC determination related to the PSC’s jurisdiction over a water user association’s operation of power plants and the sale of power from those plants, and one electric cooperative’s request for out-of-state distribution electric cooperative exemption from PSC jurisdiction.
ELECTRIC TECHNICAL CONFERENCES

The PSC sponsored the following technical conferences during fiscal year 2020:

**Docket No. 19-035-02**: PacifiCorp’s 2019 Integrated Resource Plan

**Docket No. 19-035-18**: Rocky Mountain Power’s 2019 Avoided Cost Input Changes Quarterly Compliance Filing and **Docket No. 20-035-T04**: Rocky Mountain Power’s Proposed Tariff Revisions to Electric Service Schedule No. 37, Avoided Cost Purchases from Qualifying Facilities
- May 8, 2020: Rocky Mountain Power presented information and addressed questions pertaining to routine and non-routine changes to its Third Quarter 2019 quarterly avoided cost filing.

**Docket No. 19-035-19**: Rocky Mountain Power’s Service Quality Review Report
- August 12, 2019: Rocky Mountain Power presented information and addressed questions related to its Wildfire Mitigation Plan.

**Docket No. 19-035-42**: Application of Rocky Mountain Power for Approval of the 2020 Inter-Jurisdictional Cost Allocation Agreement
- January 23, 2020: Rocky Mountain Power presented information and addressed questions pertaining to the 2020 Inter-Jurisdictional Cost Allocation Agreement.

**Docket No. 19-R314-01**: Proposed Rulemaking Concerning Utah Code Ann. §§ 54-17-901 to -909, Community Renewable Energy Act
- November 21, 2019: Stakeholders involved in the rulemaking process presented and discussed the details of their proposed draft rules.

Natural Gas Utilities Overview

Dominion Energy Utah (DEU) provides natural gas distribution services to over one million customers and is the only natural gas utility regulated by the PSC for ratemaking purposes. DEU owns or has access to natural gas production resources (i.e., “cost-of-service gas”) to meet a portion of its residential, commercial, and industrial sales customers’ gas demand. In addition, DEU provides other services related to natural gas, such as the transportation of customer-acquired gas commodities through DEU’s distribution system, and the sale of compressed natural gas for use in natural gas vehicles (NGV).

Rate Mechanisms

During rate cases, the PSC evaluates system costs, excluding those for gas supply and transportation, DEU incurs to provide service to its retail customers. At the conclusion of these proceedings, the PSC sets distribution non-gas (DNG) rates to cover DEU’s costs and to provide a fair rate of return on its investments. DEU’s most recent general rate case concluded in February 2020.

DNG rates are set to include recovery of costs associated with DEU’s U.S. Department of Transportation-required pipeline integrity management program, currently estimated at over $10 million per year. Under this program, DEU is required to conduct ongoing assessments of pipeline integrity and associated risks, collect and analyze pipeline data, and implement preventive and contingent measures to ensure pipeline safety. When integrity management costs actually incurred vary from those projected, the difference is maintained in a balancing account.

DEU also collects revenue through a variety of other PSC-approved rate mechanisms. At least twice annually, DEU files a “pass-through” application to adjust its rates to recover the costs of producing its own gas and purchases from others (the gas commodity rate element), and the costs associated with gas gathering, storage, and interstate transportation (the supplier non-gas, or SNG, rate element). When actual costs vary from those projected, the difference is maintained in a balancing account. Most recently, in May 2020, DEU’s pass-through application reflected commodity and SNG costs of $428.4 million for Utah customers — commodity and SNG costs currently represent the majority of the costs of providing natural gas service to DEU’s customers. The rates set in this proceeding reflected an incremental decrease of approximately $10.5 million compared to DEU’s previous semi-annual pass-through filing.

Since 2006, the PSC has approved the use of several other balancing accounts. These balancing accounts track costs and revenues associated with: the Conservation Enabling Tariff (CET), allowing DEU to collect a fixed revenue-per-customer on a monthly basis in exchange for
promoting customer energy efficiency programs; the Energy Efficiency (EE) program; and the energy assistance (EA) program for qualified low-income customers.

In June 2010, the PSC approved DEU’s Infrastructure Tracker (IT) Pilot Program that allows DEU to track and recover costs it incurs between general rate cases directly associated with replacement of certain aging infrastructure. These costs are recovered through a surcharge included in all of DEU’s published rate schedules. In November 2019, DEU filed its 2020 Replacement Infrastructure Annual Plan and Budget indicating its plans to replace high pressure feeder line segments in Weber, Davis, and Salt Lake Counties, as well as several intermediate-high pressure belt line segments in Davis and Salt Lake Counties, at an estimated cost of $80 million.

A. Traditional Rate Changes

2019 General Rate Case

On July 1, 2019, DEU filed a general rate case seeking approval to allocate to its customer classes a $19.2 million incremental increase in required retail revenues, for approval of its proposed base DNG rate design, continuation and expansion of its IT Pilot Program, and various substantive and administrative Tariff modifications.

DEU’s rate case concluded in February 2020: the PSC approved a $2.7 million increase in required retail revenues. The total increase was approved to be implemented in a series of three steps over time: the first occurred on March 1, 2020; the second and third steps are set to occur in the early fall of 2020 and 2021, respectively.

Pursuant to the PSC’s February 2020 Report and Order in DEU’s 2019 General Rate Case docket, the PSC established Docket No. 20-057-11 in May 2020 to consider cost of service and rate design issues. PSC evaluation of this docket continues into FY 2021.

Non-DNG Rate Changes

In FY 2020, DEU filed eleven rate change applications, all of which the PSC approved. The following information presents the effective dates of the approved rate changes, the PSC-approved revenue changes and, in parentheses, the associated percent change in a typical residential customer’s annual bill, assuming 80 dekatherms per year of natural gas.

On August 30, 2019, DEU implemented an approximate $16.4 million (1.84 percent) rate increase reflecting the following elements: 1) an $11.4 million (1.32 percent) rate increase associated with the gas pass-through balancing account; 2) a $2.0 million (0.14 percent) rate increase associated with the IT Pilot Program; 3) a $3.0 million (2.34 percent) rate increase associated with the CET account balance; and 4) a $0.02 million (0.01 percent) rate decrease associated with the low-income energy assistance program account balance.
Effective November 1, 2019, DEU implemented an approximate $3.0 million (0.41 percent) rate increase reflecting the following elements: 1) a $2.9 million (0.31 percent) rate increase associated with the IT Pilot Program and a $0.1 million increase (0.10 percent) associated with the EE program.

Effective May 1, 2020, DEU implemented a $10.5 million (1.28 percent) rate decrease associated with the gas pass-through balancing account.

**B. Other Administrative Rate Changes**

**Transportation Imbalance Charge**

In September 2019 and May 2020, DEU filed applications to update the Transportation Imbalance Charge (TIC). For customers taking transportation service under DEU’s transportation service rate schedules, the TIC is applicable to volumes in excess of a plus or minus five-percent tolerance threshold. Effective October 1, 2019 was a PSC approved increase to the TIC from $0.08323 to $0.08489 per decatherm. Effective June 1, 2020, the PSC approved DEU’s application for a TIC rate decrease to $0.07834 per Dth.

**Carrying Charge**

By March 1 of each year, DEU calculates an annual carrying charge and files a letter with the PSC reflecting that rate. This charge becomes effective on April 1 for the subsequent year, and is applied to DEU accounts 182.3, 182.4, 191.1, 191.8, 191.9, and 235.1. The PSC approved an updated Carrying Charge of 3.88 percent from April 1, 2020 through March 31, 2021.

**Third-Party Billing Rates**

DEU’s Tariff Section 8.08 provides that any eligible third party seeking to utilize the Dominion Energy Utah utility bill to charge customers must pay a per-line rate (based on the total cost to produce a bill divided by the minimum number of lines on a bill to calculate the cost per line). The Tariff also directs DEU to calculate the per-line rate and file a letter with the PSC reflecting that rate by March 1 of each year. The approved charge becomes effective on April 1 for the subsequent year, is applied to a minimum of eleven lines, and includes a rate charged for each line above the eleven line minimum. The PSC approved an effective minimum charge per bill of $0.16531, and an effective charge of $0.01503 for each line above the minimum, effective through March 31, 2021.

**Rate Changes Pertaining to the 2017 Tax Cuts and Jobs Act**

In December 2017, the PSC opened Docket No. 17-057-26 to investigate the revenue requirement impacts to DEU of federal tax legislation (”Tax Reform Act”) enacted on December 22, 2017. Among other things, the Tax Reform Act reduced the federal income tax rate from 35

---

1 The total cost to produce a bill includes depreciation, operation and maintenance, supplies, postage, and return on investment.
percent to 21 percent. Since then the PSC has approved various settlement stipulations between DEU, the DPU, the OCS, and UAE. The stipulations identify the level and timing of certain tax surcredits and other related ratemaking issues:

Tax Reform Surcredit 1: Approved in mid-2018 as a means to return corporate income taxes collected through revenues, DEU established a $14.5 revenue requirement reduction.

Tax Reform Surcredit 2: Effective mid-2018, DEU implemented a $9.5 million rate decrease to return to customers excess federal income taxes collected between January 1, 2018 and May 31, 2018, plus interest.

Tax Reform Surcredit 3: Effective June 1, 2019, DEU implemented a $5.0 million rate decrease related to the 2018 excess deferred income tax (EDIT) amortization. With the February 2019 General Rate Case Report and Order approved, the PSC approved an extension of the Tax Reform Surcredit 3 by 12 months, from May 31, 2020 to May 31, 2021, which implements an approximate $3.6 million refund to customers.²

Resource Planning

A. Integrated Resource Planning

The PSC requires DEU to prepare and file an annual integrated resource plan (IRP) which is used by DEU as a guide for meeting its natural gas requirements on both a day-to-day and long-term basis. The IRP is based on a 20-year planning horizon, emphasizing the near-term future. During FY 2020, the PSC concluded its evaluation of DEU’s IRP for the plan year of June 1, 2019 - May 31, 2020 (2019 IRP) and commenced review of DEU’s IRP for the plan year of June 1, 2020 - May 31, 2021 (2020 IRP), filed in June 2020.

B. Natural Gas Conservation and Energy Efficiency Planning

The PSC reviews and approves DEU’s annual plan and budget for EE activities and the Market Transformation Initiative. This plan addresses programs proposed by DEU, meant to encourage residential and commercial customers to conserve energy through education of and incentives for energy-efficient products, appliances, and construction methods. In CY 2019, DEU spent $23.6 million on its EE programs, or 92 percent of its PSC-approved $25.4 million 2019 ThermWise® budget. According to DEU, in 2019 there were approximately 79,420 participants in the various ThermWise® rebate, low income efficiency, and energy plan programs, with the energy comparison report being distributed to 224,400 customers. This participation resulted in an estimated annual natural gas savings of over 960,178 Dths.

² But for the PSC’s approval set forth in its 2019 GRC Order, the Tax Reform Surcredit 3 was set to expire on May 31, 2020.
In December 2019, the PSC approved DEU’s proposed 2020 EE programs and market transformation initiative budget of $26.4 million. DEU estimated an annual savings of 1,139,452 Dths (five percent below the 2019 EE programs savings estimate). The energy savings are approximately equivalent to the average annual natural gas consumption of almost 14,250 residential homes served by DEU, assuming an annual average consumption of 80 Dths.

In 2019, DEU will continue to offer EE programs and initiatives associated with the 2019 EE Program Budget, with minor changes. These programs are: ThermWise® Appliance Rebates, ThermWise® Builder Rebates, ThermWise® Business Rebates, ThermWise® Weatherization Rebates, ThermWise® Home Energy Plan, Low Income Efficiency, ThermWise® Energy Comparison Report, and a comprehensive Market Transformation initiative. These programs offer rebates, fund training and grants, and provide information to DEU customers, with the goal of decreasing energy consumption.

C. **Infrastructure Expansion Related Issues**

**Natural Gas Amendments (Utah House Bill 129 of the 2020 General Legislative Session) to the Energy Procurement Act and DEU’s Attendant Request to Extend Natural Gas Service to Eureka, Utah**

Based on legislation enacted in 2018 and 2020, DEU requested: 1) to expand rural natural gas facilities to Eureka, Utah and surrounding communities, and 2) to implement a rate for installation of service lines throughout Eureka, Utah. The PSC’s evaluation of DEU’s Rural Expansion Facilities docket continues into FY 2021.

D. **Renewable Natural Gas (RNG) Related Issues**

**Rawhide Leasing, LLC for Compressed Natural Gas Service**

In September 2019, in Docket No. 19-057-23, DEU requested PSC approval of the Compressed Natural Gas Tank Filling Service Agreement between DEU and Rawhide Leasing, LLC. Following the submission of a settlement stipulation, the PSC approved the agreement in October 2019.

**GreenTherm℠ Renewable Energy Program**

In early 2019, DEU filed a request for approval of a new renewable energy program, known as GreenTherm℠, and a related accounting order as a means to provide DEU customers an opportunity to voluntarily contribute to a fund that would be used to purchase RNG, to fund projects designed to promote RNG and energy efficiency projects, and to cover GreenTherm’s℠ administrative costs. The PSC approved a settlement stipulation in July 2019.
E. Sustainable Transportation and Energy Plan (STEP) Act Related Issues

In December 2019, DEU filed requests for approval of 1) a Combined Heat and Power (CHP) Natural Gas Clean Air Project; 2) $800,000 per year for three years (totaling of $2.4 million) in funding to the University of Utah’s Intermountain Industrial Assessment Center (IIAC) for the provision of research, analysis, and input for conducting energy assessments at manufacturing facilities, such as the CHP project DEU concurrently proposes, which was identified by the IIAC; and 3) implementation of a regulatory balancing account attendant to these requests. The PSC’s consideration of this program continues into FY 2021.
NATURAL GAS TECHNICAL CONFERENCES

The PSC sponsored the following technical conferences during fiscal year 2020:

**Docket No. 19-057-02: Application of Dominion Energy Utah to Increase Distribution Rates and Charges and Make Tariff Modifications**
- **August 14, 2019:** The purpose of the technical conference was for DEU to address the questions submitted by the parties regarding revenue requirement.
- **September 12, 2019:** The purpose of the technical conference was for DEU to present information regarding cost of service and rate design and to address the questions submitted by the parties.

**Docket No. 19-057-30: Dominion Energy Utah’s Replacement Infrastructure 2020 Annual Plan and Budget**
- **June 23, 2020:** DEU presented an update to the PSC and stakeholders regarding the status of its infrastructure replacement program.

**Docket No. 19-057-31: Request of Dominion Energy Utah to Extend Natural Gas Service to Eureka, Utah**
- **January 21, 2020:** DEU presented information and answered questions concerning its proposal to extend natural gas service to Eureka, Utah.

**Docket No. 19-057-32: Application of Dominion Energy Utah for Approval to Implement a GSE Rate to Provide Service Lines to Customers in Eureka, Utah**
- **January 21, 2020:** DEU presented information and answered questions concerning its proposal to extend natural gas service to Eureka, Utah.

**Docket No. 19-057-33: Application of Dominion Energy Utah for Approval of a Natural Gas Clean Air Project and Funding for the Intermountain Industrial Assessment Center**
- **February 5, 2020:** The purpose of this technical conference was for DEU to present information and answer questions regarding DEU’s proposals for a natural gas clean air project and funding for the Intermountain Industrial Assessment Center.

**Docket No. 20-057-02: Dominion Energy Utah’s Integrated Resource Plan (IRP) for Plan Year: June 1, 2020 to May 31, 2021**
- **March 9, 2020:** DEU presented information and answered questions pertaining to: the IRP Standards and Guidelines, the PSC’s 2019 order regarding IRP LNG project update, and an update on sustainability initiatives.
- **April 23, 2020:** DEU presented information and answered questions pertaining to: 2019/2020 heating season review, update on system integrity, review of fuel line issue, update on Wexpro matters (confidential), and RFP review (confidential).
- **May 12, 2020:** DEU presented information and answered questions pertaining to: IRP project detail discussion, long-term planning, future rural expansion update, and future STEP project update.
- **June 30, 2020:** DEU provided a summary of and answered questions pertaining to its 2020 IRP filed in mid-June 2020.

Telecommunications Utilities Overview

In fiscal year 2020, Utah’s ILECs served approximately 250,000 traditional landline telephone accounts, while CLECs served approximately 360,000. Wireless carriers served about 2.7 million accounts/customers. In addition, an unknown, but likely increasing, number of customers are choosing to use voice-over-internet-protocol (VoIP) for voice service. Overall, local exchange and voice service in Utah is characterized by intra-industry competition among local exchange companies, wireless telecommunications providers, and VoIP companies. As a result of consumers having these options, the total number of traditional landline accounts in Utah has declined from a peak of 1.2 million in 2001, to 0.61 million currently, even as the state has seen increases in population, households, and businesses.

CenturyLink QC (“CenturyLink”) is the largest certificated telecommunications provider in Utah, and is the largest ILEC in the state serving most urban and suburban areas. It operates under state pricing flexibility rules and faces both intra- and inter-industry competition.

Currently, the PSC sets UUSF distributions through regulation using a statutory framework for the seventeen Rural Incumbents. These Rural Incumbents generally do not face competition from CLECs but, like CenturyLink, they compete with both wireless and VoIP providers. Many of these companies are part of larger corporate entities that also compete in the wireless, internet, video, and VoIP markets. The PSC does not regulate the rates or service quality of wireless providers, toll resellers, video providers, internet service providers, or VoIP companies.

The other major providers of telephone service are the CLECs. Since 1995, the PSC has received 342 applications from CLECs for Certificates of Public Convenience and Necessity (CPCN), and has granted 264 (some of which have been canceled or withdrawn). In fiscal year 2019, there were 162 currently certificated CLECs. Of these, 147 made at least one payment into the UUSF during FY 2020.

Most of Utah’s active CLECs provide service exclusively to business customers. Most CLECs use at least some network elements of CenturyLink’s public telephone network.

CLEC – Competitive Local Exchange Company. These carriers compete directly with CenturyLink.

ETC – Eligible Telecommunications Carrier. A carrier that has been granted ETC status (for either the Federal or State Lifeline programs) by the PSC.

ILEC – Incumbent Local Exchange Carrier. These are the legacy phone companies that have an obligation to serve. This category includes CenturyLink and the Rural Incumbents.

Lifeline – A low income assistance program where qualifying recipients receive either a discount off of their monthly bill or, in the case of some wireless providers, a complete basic service.

Rural Incumbent – A legacy ILEC with an obligation to serve within its defined service territory. These carriers serve populated areas of the state not served by CenturyLink.

UUSF – Utah’s Universal Public Telecommunications Service Support Fund.
Historical Context and Current Policy

The UUSF is a program under which the PSC distributes funds from surcharges collected from customers and paid into the UUSF by Utah telephone providers. The statutory purpose of the UUSF is to provide a mechanism for a qualifying carrier of last resort to obtain specific, predictable, and sufficient funds to deploy and manage networks capable of providing end-user services including access lines, connections, or wholesale broadband internet access service. The UUSF also funds a low income Lifeline program for telephone customers. The Legislature has charged the PSC with establishing the UUSF contribution method, which must be both nondiscriminatory and competitively neutral.

The Federal Communications Commission (FCC) continues to support the build-out of broadband facilities in un-served or under-served areas of the country. Utah policy facilitates the same objectives by permitting reimbursements from the UUSF for reasonable costs that (a) are incurred by a Rural Incumbent provider in deploying a broadband fiber-to-the-home network; and (b) cannot reasonably be recovered through rates.

In FY 2020 the UUSF receipts grew at a faster rate than projected as the number of connections subject to the charge grew faster than anticipated. The PSC opened a rulemaking proceeding in May 2020 to decrease the monthly UUSF surcharge from $0.60 to $0.54 per connection, effective July 8, 2020.

During the 2020 Utah Legislative Session Senate Bill 225 (“SB 225”) was enacted related to charges imposed on prepaid wireless telecommunications service to support the UUSF. SB 225 imposes a UUSF prepaid wireless telecommunications service charge of 1.2% of the sales price transaction.
The PSC provided the following disbursements through the UUSF to the Rural Incumbents.

<table>

</tr>
</tbody>
</table>

The UUSF also paid the following amounts to the state’s ETCs for Lifeline support. ETCs are carriers that either provide low income customers: 1) a discount on telephone service (typically the ILECs); or 2) no-cost, or low cost, wireless service. ETC status is granted by the PSC and allows participation in the Federal Lifeline program, and may allow participation in the UUSF Lifeline program as well.

Certificates of Public Convenience and Necessity and Interconnection Agreements

During FY 2020, Utah continued to experience interest from potential entrants into the telecommunications sector. The PSC approved five CPCN applications, canceled two existing CPCNs, approved the discontinuation of service for two providers, and acknowledged thirteen interconnection agreements (new and amendments) between CLECs and ILECs. At the end of FY 2020 there were three CPCN applications in process.

Eligible Telecommunications Carriers

During FY 2020 the PSC received and granted twelve requests either to be designated as an ETC or to amend an existing designation, in order for the applicant to be able to participate in various federal or state universal service or lifeline programs. At the end of FY 2020 there were two applications undergoing PSC review, one Federal ETC application, and one application to participate in the Utah Lifeline fund.

Telecommunications Dockets Summary

The PSC addressed approximately 163 telecommunications dockets in FY 2020. Most involved setting UUSF support levels; tariffs; price lists; complaints; and the entry, exit, or reorganization of CLECs. Of the remainder, 13 dealt with the interconnection between carriers, and 14 dealt with requests from carriers to participate in either the federal or state Lifeline programs. The PSC addressed changes to UUSF disbursements for all rural carriers.

Telecommunications Relay Service & Equipment Distribution Program

The PSC began administering the Relay Utah program in 1987 with the goal of providing telecommunications access and equipment to those who are deaf, hard of hearing, and speech challenged. Through the Relay Utah program, those with hearing or speech challenges have multiple service and equipment options including video relay, internet protocol relay, captioned telephones, application software, amplified telephones, and wireless devices. Relay services have expanded to include Spanish language, Speech-to-Speech, Voice Carry Over (VCO), Captioned Telephone (CapTel), and Hearing Carry Over (HCO).

Funding

The PSC uses funds from the UUSF to administer the Relay Utah program. Expenditures for FY 2020 totaled $879,067 and were used for the following purposes:

1. Purchase and distribution of telecommunications devices.
2. Providing Telecommunications Relay Services (TRS) and Captioned Telephone Services (CTS) for individuals who are deaf, hard of hearing, or speech challenged.
3. General program administration.
4. Training individuals as certified sign language interpreters.

Consumer Education

The PSC collaborates with Penna Powers for marketing, outreach, public relations, education, and grassroots activities for relay services and equipment distribution. Each year, Penna Powers and the PSC utilize print, television, and social media advertising to raise awareness of Relay Utah. The PSC contracts with Sprint Relay for its TRS and CTS. Sprint Relay provides a full-time in-state coordinator who provides outreach and education concerning relay services and equipment.
Outreach Activities

Outreach events provide educational and outreach information concerning equipment and service options.

Highlight of Outreach Activities

08/24/2019 Be Well Utah Family Health Fair
08/27/2019 Mountainland Continuum of Care Presentation
08/27/2019 Taylorsville Senior Center Health Fair
09/12/2019 Mountainland Senior Health Fair
09/18/2019 UHCA Fall Showcase (64 packets, 64 brochures)
09/18/2019 Millcreek Senior Health Fair (7 applications, 56 brochures)
09/25/2019 West Jordan Chamber of Commerce Best of the West
09/26/2019 South Jordan Senior Center Health Fair
09/28/2019 Tooele County Senior Expo
10/09/2019 Hyrum Senior Center Health Fair
10/10/2019 Senior Expo
10/19/2019 Sanderson Center Technology Fair
11/02/2019 Caregiver Conference (11 applications, 8 wireless, 107 brochures)

Equipment Training and Distribution

The PSC employs one full-time and three (3) part-time employees who provide equipment distribution, training, repairs, and outreach throughout Utah. To provide effective services, employees respond to requests by phone, email, and text regarding questions on equipment and training. This approach has improved customer service and reduced unnecessary on-site visits.

The Relay Utah equipment and training distribution program provided telecommunications equipment distribution, troubleshooting, and training for 72 clients in FY 2020. Deliveries were suspended in March 2020 because of the COVID-19 pandemic, but device shipments continued.
Sign Language Interpreting Training

Utah law states, “an individual is required to be certified as a certified interpreter if that individual provides interpreter services” (Utah Code Ann. § 35A-13-605). The PSC is contracted with Utah State University to train individuals as certified sign language interpreters. The goal is to train up to 150 interpreters over the term of the contract.

Community Feedback

Utah Code Ann. § 54-8b-10(7) states, “The [PSC] shall solicit advice, counsel, and physical assistance from deaf, hard of hearing, or severely speech impaired individuals and the organizations serving [them] in the design and implementation of the program.” The PSC attends quarterly meetings with the Relay Utah Consumer Council (RUCC). The RUCC is comprised of representatives of different groups or organizations including individuals who are deaf, hard of hearing, or speech challenged; and individuals who use the services provided by the PSC. The RUCC meetings are held in conjunction with Sprint Relay for members to actively provide feedback and ideas of how to best meet the needs of Relay consumers in Utah.

Mobile Device Pilot Program

The Mobile Device Pilot Program was discontinued February 10, 2020 as a result of legislative changes related to state UUSF support for lifeline phones. Four devices were distributed during FY 2020.

Relay Utah Website

Relay Utah released an updated website in February 2020. The website can be found at relay.utah.gov. The website includes information on qualifying and applying for telecommunications equipment. Relay Utah also maintains a Facebook page.

Relay Utah Demo Room

To assist individuals with hearing issues, the Relay Utah office, located at 168 N. 1950 W., Salt Lake City, has a demo room that contains an induction audio loop system that assists individuals who use hearing aids or cochlear implants with telecoil (t-coil) capability. The demo room is open to the public and has different types of phones for individuals with hearing loss available for testing. During FY 2020, 59 visits were accommodated in the demo room. The Robert G. Sanderson Community Center in Taylorsville and its satellite office in St. George also have demo rooms.
Water Utilities Overview

Most Utah residences and businesses receive culinary water from municipal systems, quasi-governmental special improvement districts, or water districts, none of which are subject to PSC regulation. Similarly, the PSC does not regulate irrigation water that is delivered by irrigation cooperatives in Utah. However, the PSC is charged by the legislature with regulating private water companies to ensure their customers have access to safe and reliable water service at just and reasonable rates.

Water Companies

Most private water companies are established as non-profit cooperatives, with control and ownership of the company transferring to the lot owners as the lots are sold. As long as a developer retains effective voting control of the water company, the water company is subject to the PSC’s jurisdiction. Once the lot owners/water users attain voting control, the PSC no longer retains jurisdiction.

The PSC adjudicates the status of a water company informally unless that status is contested. While a company is subject to PSC jurisdiction, it is required to hold a Certificate of Public Convenience and Necessity (CPCN), to maintain a tariff, and to obtain approval from the PSC for all rates. A company that is verified to be a customer-owned and operated cooperative is issued an informal letter of exemption.

PSC Jurisdiction

As with other utilities, the PSC exercises regulatory jurisdiction over rates and changes in water company tariffs. Water company rate cases are relatively infrequent and are usually resolved collaboratively. The PSC also adjudicates consumer complaints regarding water companies, as it does with other utilities.

FY 2020 Activities

During FY 2020, the PSC continued its examination of issues related to complaints against South Duchesne Culinary Water, Inc. (SDCW) and ordered SDCW to file a general rate case on or before October 1, 2020 (Docket No. 18-2372-01). In May 2020, SDWC filed a request that the PSC cancel its CPCN because SDWC is now wholly owned by the two homeowners associations it serves. The docket continued into FY 2021.
Requests for rate changes were made by WaterPro Inc. and Pineview West Water Company and were filed in March and April 2020, respectively. These dockets are undergoing PSC review with final orders anticipated to be issued in FY 2021.

Complaint Resolution

The Role of the Division of Public Utilities

A dissatisfied customer who cannot resolve utility service issues through contact with the utility can seek assistance from state regulators. Utility consumers may contact the DPU (dpu.utah.gov) through an informal complaint process. DPU staff construct a factual statement through discussions with the complainant and the utility regarding the problem. Often this step resolves the dispute. At times, a customer facing service difficulties may also request the assistance of the OCS. Through following the same sort of process the DPU does, if the OCS learns that other customers are experiencing similar utility service issues, it may petition the PSC for action in a matter having wider applicability.

 Formal Complaints

If the informal process does not yield satisfactory results for either party, the complaint can be escalated to the PSC as a formal complaint requesting review and a hearing. By far, most customer complaints are resolved during the informal process. Complaints that are escalated to a formal process create a PSC docket.
