Your support made a big difference in 2012!

Supporting the Blue Sky renewable energy program means making a difference by building a market for renewable energy and helping bring new renewable energy facilities on-line. Last year, our community of nearly 88,000 Blue Sky customers supported more than 604 million kilowatt-hours of renewable energy.

Utah Transit Authority's new TRAX line goes solar

Thanks to Blue Sky customers, Salt Lake County's newest light rail line, Airport TRAX, will feature renewable energy at nearly every stop. The Utah Transit Authority was awarded Blue Sky community project funding in 2011 to help install a 64-kilowatt solar project on the new line. The project consists of 16-kilowatt solar arrays atop four station canopies along the line, featuring a total of 288 panels.

Uinta Brewing Company brews up sustainability

Uinta Brewing Company embarked upon its mission of brewing world class, full-flavored, craft-brewed beer in 1993. This Blue Sky business partner has supported Blue Sky renewable energy for almost a decade and their participation has equivalent environmental impacts to avoiding over 180,000 pounds of CO₂ emissions every year. That's like taking 15 cars off the road every year or planting more than 2,000 trees!
