Dear Blue Sky Business,

Thank you for choosing to support renewable energy through our Blue SkySM program. Your commitment to the program makes a positive impact on the environment and it helps encourage more renewable energy development in the region.

Your company made a difference in 2008

On the back of this letter you will find your current purchase levels and environmental impacts through the Blue Sky program for your multiple locations. Also enclosed is a certificate that highlights the equivalent environmental benefits associated with your Blue Sky purchase in 2008. Thanks again for your participation.

You and 67,000 Blue Sky customers across our service area supported more than 490 megawatt hours of renewable energy – a 28 percent increase over 2007 – the equivalent of the output of 107 utility-scale wind turbines.

Small-scale renewable energy projects

Did you know that over the past three years, Blue Sky customers have helped fund 35 community-based renewable energy projects throughout the company's service area to help advance renewable energy technology? Visit rockymountainpower.net/blueskyprojects to learn more.

Supporting business relationships

The Blue Sky program has been proud to cultivate many partnerships with businesses and organizations who want to encourage their customers to choose renewable energy. Every relationship looks different and the possibilities are endless. If you have any ideas for ways we can work together, write to us at bluesky@pacificorp.com.

Green-e Energy certified

In 2008 the Blue Sky program was Green-e Energy certified. Taking this step is just one more way we can assure you that choosing Blue Sky helps make a difference. Visit www.green-e.org for information.

Our commitment

Protecting and enhancing the environment is at the forefront of our business strategy. We believe in building an increasingly sustainable energy supply and delivery business. Our sustainable efforts include investments in renewable energy generation, energy efficiency, environmental education and service, and habitat protection. For information, visit rockymountainpower.net/environment.

Thanks to you, we're looking forward to Blue Sky's continued success in 2009 and beyond! Please feel free to contact us at **1-800-769-3717** if you have any questions about the program. Let's turn the answers on.

Sincerely,

Karen Gilmore
Vice President, Customer Services

The Spanish Fork Canyon wind farm can produce enough power for about 6,000 homes. Your support helped bring it on line in 2008.
