SPECIFICATIONS AND SERVICE: Each lamp will be operated from a series or multiple circuit, at the Company's option. Fixtures and supports will be in accordance with the Company's specifications. Service includes energy supplied from the Company's overhead circuits, maintenance, lamp and glassware renewals. Lamps will be controlled by the Company to burn each night from dusk to dawn or from dusk to midnight.

CONVERSIONS: The Company will, upon written request of Customer, convert existing street lighting facilities to other types of lamps (i.e., convert incandescent fixtures and lamps to sodium vapor fixtures and lamps, etc.). In such an event, Customer shall pay to Company an amount equal to the depreciated value of all facilities removed from service and replaced with new equipment plus the cost of removal less any salvage value. Priority in making conversions shall be determined by Company, guided by two principles:

- (1) the order in which requests are received by the Company; and
- (2) the degree by which Customers' lighting prices were affected by the pricing adjustments established by the Public Service Commission of Utah in its Report and Order issued March 7, 1983 in Case Nos. 79-035-12, 80-035-17 and 81-035-13.
