II. IDENTITY OF PETITIONERS

Salt Lake City is the capital city of Utah and has intervened in numerous Commission proceedings as its interests have dictated. Salt Lake City and its consultants have entered into a partnership (MSR) with the Department of Energy and others to promote photovoltaic rooftop panels. The goal is to lower financial and regulatory barriers for this renewable resource.

III. INTEREST OF PETITIONERS

Salt Lake City, as a direct consumer of electricity from Utah Power and as a representative of its citizens, has a direct interest in the development of cost effective resources and the prudent cost recovery of such resources. Salt Lake City and MSR believe that the use of a future test year may help in the development of peak shaving measures such as solar energy that will reduce the overall cost of providing electric service to Utah Power's customers.

IV. NATURE OF INTERVENTION

The evidence to be presented by Salt Lake City and the MSR, if any, will be of material value to the Commission in its determination of the issues involved in this proceeding, and SLC and MSR's intervention will not broaden those issues or delay the proceedings.

Accordingly, SLC and MSR request permission to intervene as parties to this proceeding and to participate to the full extent permitted under the Commission's rules and Utah Law.
