Re: Scheduling Order, Docket No. 05-035-01

In the Matter of the Formal Complaint of Pinnacle Engineering and Land Surveying Inc.

Below is PacifiCorp's response to the scheduling order request for a 2nd estimate due April 27, 2005:

The original job costs were \$57,502, which included the three phase upgrade and tree removal. The Company contribution was \$26,733 and the customer's portion of the job was \$30,769.

As per the Commission's scheduling order issued April 8, 2005, the Company prepared an estimate to reflect the "costs associated with upgrading from single phase to three phase capacity while relocating power lines as requested by Pinnacle." The estimate for the job using only single phase equipment, and not including the tree removal which was paid for by PacifiCorp, is \$28,814.

Thus, the cost differential between the customer's contribution for the three phase job of \$30,769 and the cost of the single phase job of \$28,814 is \$1,955.
