Complaint Description: Mr. McCurdy stated he is concened regarding the acquisition of Mr. Buffett taking over Pacificorp because it was reported that Mr. Buffett will put money into the system and will add a fosil fired steam generation facility which will be built in Montana. Mr. McCurdy is upset that this facility will not be build in Castledale and will not burn Utah coal. The PSC should make Buffett put the facility in Utah and the PSC should make this contingent upon any future generation assets being built in the service territory to creat jobs and industry for this area.

Mr. McCurdy would like this report investigated and would like a repsonse because the PSC needs to understand what this would do to the economy of this area.

Results: I advised Mr. McCurdy I would pass on this information.
