Steve,

I did not receive the information Tim Vetere was to provide. I tried calling him last week without success. Tim called me last night and indicated he did not have the information ready. I ask if we should have the company go ahead and provide the voltmeter results and he said yes. I notified Carole Rockney to go ahead and provide that information.

Tim also wanted me to let you know that his pumps are running great - he is checking the volts and it is staying right at 483. He has not had any problems. He has a meeting scheduled for Thursday, September 12 with the company and their outside firm to check the pressure gauges.

Rea
