AARP Data Request 4.3

AARP Data Request 4.3

1. **Rate Design** Will the Customer Load Charge be treated in the same manner as other billing? Specifically,
 - a. Will the 1000 kWh be based on the billing cycle usage, regardless of the number of days between meter readings? If not, on what basis will the 1000 kWh be based?
 - b. Will the CLC ever be imposed based on estimated meter readings?
 - c. Will the CLC ever be imposed based on prorated energy usage?

Response to AARP Data Request 4.3

1. Yes, the Company proposes that the Customer Load Charge (CLC) will be treated in the same manner as other billings. Specifically,
2.
 - a. The 1,000 kWh will be based on the billing cycle usage during the summer billing months from May through September and it will be prorated if the numbers of days in the billing cycle is either less than 26 or greater than 34.
 - b. Yes, the CLC may be imposed based on estimated meter readings if any of the meter readings are estimated from billing months May through September.
 - c. Please refer to the Company's response to a. above.
