To Whom It May Concern:

I'm writing to convey my strong support for the continuation of the Rocky Mountain Power Solar Incentive program. This comment is in response to the article in the Salt Lake Tribune of 5-13-11. In today's climate of rising fuel costs, I believe the use of solar power can substantially improve our overall quality of life - in the generation of both clean and renewable energy. We greatly cherish our Utah sunshine - and I would endorse any program which encourages people to adapt solar power to contribute to the "grid".

Thank you for your assistance in conveying my comment to the appropriate individual(s).
