Docket No. 07-035-T14

To Whom It May Concern:

I strongly urge you to support the continuation of the above mentioned program. Alternative energies are the future and wouldn't it be nice if Utah could be a role model in that area since it is lacking in so many other environmental issues.

In fact, I encourage to look even further into alternative energies and implement an incentive for wind energy for households.

I've lived in Utah for two years and realized how much potential there is for such a program. When I called Rocky Mountain there was no information available.

Please, please, please invest in alternative energies and continue the programs!!!

Best regards,

Andrea Haugen
