Re: Docket No. 07-035-T14 Rocky Mountain Power Solar Incentive Program.

It is essential that we expand clean domestic alternatives to oil. Development of renewal energy sources is a wise investment, at any cost. We still subsidize oil in the billions. Alternative fuels are necessary to reduce the cost of gasoline in the future. The size of this program should be dramatically expanded! We should also be expanding natural gas until adequate renewable energy is developed.
