I would like to thank the commission for their time regarding the possible extension to the Rocky Mountain Power Solar Incentive Program. I live in West Valley City and would like to see this program expand if possible. With the program there is a better chance of more neighborhoods being able to participate. As it becomes more affordable and less complex to install and maintain it will in my opinion be more and more popular. RMP has a unique situation where they can look forward and either slow down acceptance or speed up these changes for the people of Utah.

Thank you,

Jim Jensen
