Good morning,

Last summer, RMP was touting their Blue Sky initiative. Hawking alternative energy solutions and cleaner air in the valley. Consumers were asked to add an additional cost to our monthly energy bill to promote these alternative sources. This additional money looks like it is / was being used to fund the study. If this is so, I find it to be deceptive. Tragic to see that "Big Oil" gets un-realistic tax breaks and alternative energy providers and users get the shaft.

"Every morning in Africa, a Gazelle wakes up. It knows it must run faster than the fastest lion or it will be killed. Every morning a Lion wakes up. It knows it must outrun the slowest Gazelle or it will starve to death. It doesn't matter whether you are a Lion or a Gazelle... when the sun comes up, you'd better be running." (African Proverb)
