I am resending this e-mail I sent earlier to an incorrect e-mail address. I hope it is still able to be included in your comments.

I am writing in support of a continuance of the Rocky Mountain Power Solar Incentive Program. As a very early participant I can tell you that my purchase of some 28 solar panels and a battery backup would not have been possible without the RMP Solar Incentive Program. I recognize this is a drop in the bucket in terms of "saved power" from the grid but our Salt Lake City based system now provides 80-100% of our power depending on the time of year.

I could not appreciate this program more and hope it continues to enjoy the support of the State of Utah and RMP as a way to encourage others to participate.

Sincerely,

Steve Boulay
