

Utah Public Service Commission

160 East 300 South

Salt Lake City, UT 84114

Dear Commission,

I am writing this note to express support in continuing the Rocky Mountain Power Solar Rebate program.

I installed a small solar system on my property this past year and can attest that these systems perform their duty of generating real, renewable and clean energy directly from the power of the sun. I also work in the solar industry and have seen a growth in quality jobs related to the manufacturing, distribution and installation of solar around the state and country. These jobs depend on the subsidy at this point, but with the cost of solar installation falling nearly every quarter it might not be long to where this industry will be 100% self-sustaining and viable.

Please continue the program!

- It is the right thing for the environment and the air we breath
- It is right for creating green jobs throughout the state
- It is right Utah to participate in the repowering of our Nation and World

Thank you.

Jay Miles
