**Subject:** Rate Increase for Pacific Corp.

We are totally apposed to any rate increase for Pacific Corp. In this time of deflation I just don't understand why they keep asking for rate increases, when the price of natural gas is getting cheaper. Perhaps they should be requested to decrease their rates and cut the pay to their top executives and review their pay scale to all of their employees. They should review all their practices. They are guaranteed a profit and when their costs are high they still get the profit. We have no such income.  
Jay and Sharon Hunt,
