

March 30, 2009

I am addressing this letter to the Public Service Commission; as I am unable to attend the meeting. I am against this closed deal on the utility rates increase. It is important for the Commission to hear all the evidence not closed down negotiations! With the Economy sliding down-hill; people losing their jobs, other people trying to take care of themselves and inflation out of control and half of the people unemployed can't pay the rates on their utility bills now, its time to reconsider all the facts & listen to the Public.

Thank you,
Marjorie T. Larson
