

BEFORE THE PUBLIC SERVICE COMMISSION OF UTAH

In the Matter of the Application of Rocky Mountain Power for An Accounting Order Regarding Pension Curtailment and Pension Measurement Date Change Electric Service Schedules and Electric Service Regulations)	Docket No. 08-035-93
)	Pre-filed Direct
)	Testimony of
)	Donna Ramas
)	For the Committee of
)	Consumer Services

December 18, 2008

1 **Q. WHAT IS YOUR NAME, OCCUPATION AND BUSINESS ADDRESS?**

2 A. My name is Donna Ramas. I am a Certified Public Accountant licensed in
3 the State of Michigan and a senior regulatory analyst at Larkin &
4 Associates, PLLC, Certified Public Accountants, with offices at 15728
5 Farmington Road, Livonia, Michigan 48154.

6

7 **Q. HAVE YOU PREVIOUSLY FILED TESTIMONY BEFORE THE PUBLIC**
8 **SERVICE COMMISSION OF UTAH?**

9 A. Yes, I previously filed testimony in Utah on several occasions under the
10 name Donna DeRonne.

11

12 **Q. PLEASE DESCRIBE THE FIRM LARKIN & ASSOCIATES, PLLC.**

13 A. Larkin & Associates, PLLC, is a Certified Public Accounting Firm. The firm
14 performs independent regulatory consulting primarily for public
15 service/utility commission staffs and consumer interest groups (public
16 counsels, public advocates, consumer counsels, attorneys general, etc.).
17 Larkin & Associates, PLLC has extensive experience in the utility
18 regulatory field as expert witnesses in over 600 regulatory proceedings,
19 including numerous electric, water and wastewater, gas and telephone
20 utility cases.

21

22 **Q. HAVE YOU PREPARED AN EXHIBIT DESCRIBING YOUR**
23 **QUALIFICATIONS AND EXPERIENCE?**

24 A. Yes. I have attached Appendix I, which is a summary of my regulatory
25 experience and qualifications.

26

27 **Q. ON WHOSE BEHALF ARE YOU APPEARING?**

28 A. Larkin & Associates, PLLC was retained by the Utah Committee of
29 Consumer Services (Committee) to review Rocky Mountain Power's (the
30 Company or RMP) application for an accounting order regarding pension
31 curtailment and pension measurement date change in the State of Utah.
32 Rocky Mountain Power is a division of PacifiCorp. Accordingly, I am
33 appearing on behalf of the Committee.

34

35 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

36 A. I present the Committee's position regarding RMP's request for an
37 accounting order in this case. The Company's request addresses two
38 components, each of which will be separately addressed in my testimony.
39 The first component of the Company's request is for Commission
40 permission to allow the Company to record the impact of a pension
41 curtailment gain as an offset, or reduction, to the pension regulatory asset
42 on its books. The second component of the Company's request is for
43 Commission permission to record on its books the impact of a required
44 change in pension and OPEB plan asset and liability measurement date
45 as an increase to the regulatory asset. RMP is proposing to amortize the
46 net effect of these two separate items on the pension regulatory asset

47 over a ten-year period. In this testimony, I also address the amortization
48 period proposed by RMP.

49

50 **Q. WOULD YOU PLEASE PROVIDE A SUMMARY OF THE FIRST**
51 **COMPONENT OF RMP'S REQUEST?**

52 A. Yes. The first request made by RMP is for Commission permission to
53 allow the Company to record the impact of a pension curtailment gain as
54 an offset, or reduction, to the pension regulatory asset on its books. There
55 are two separate events which caused the curtailment gain. The first
56 event is the result of IBEW Local 659 agreeing to change its retirement
57 benefit approach to a 401(K) program only, which triggered a small
58 curtailment gain. The second event consists of many of PacifiCorp's non-
59 union employees choosing to accept an enhanced 401(k) retirement plan
60 option instead of continuing participation in the Company's cash balance
61 retirement plan, resulting in a substantial curtailment gain. The curtailment
62 gain occurred because of a resulting significant reduction to the accrual of
63 defined pension benefits. Absent the Commission's approval, the
64 curtailment gain would otherwise be charged to income in the current
65 fiscal year ending December 31, 2008. The combination of these two
66 items is a \$41 million curtailment gain. RMP has proposed to amortize the
67 curtailment gain over a period of ten years.

68

69 **Q. DO YOU AGREE WITH THE COMPANY'S PROPOSAL REGARDING**
70 **THE RECORDING OF THE CURTAILMENT GAINS AS AN OFFSET TO**
71 **THE PENSION REGULATORY ASSET?**

72 A. Yes, with a slight modification explained below. The Company's
73 ratepayers have been funding the Company's pension plan over time
74 through the inclusion of the net periodic benefit costs (or pension
75 expense) in rates. The historical net periodic benefit costs, or pension
76 expense amounts, included in rates in the past were determined based on
77 actuarial projections that factored in a certain level of future assumed
78 benefit payments. The curtailment gain is a result of significantly reducing
79 the obligation or liability which had previously been factored into the
80 determination of pension expense included in rates paid by ratepayers.
81 The Committee agrees with the Company's proposal that this curtailment
82 gain be flowed back to customers.

83

84 **Q. DO YOU AGREE WITH THE COMPANY'S PROPOSAL TO OFFSET**
85 **THE EXISTING PENSION AND OTHER POSTRETIREMENT WELFARE**
86 **REGULATORY ASSET FOR THE CURTAILMENT GAIN?**

87 A. I recommend that the Company set up a separate regulatory liability
88 account for the \$41 million curtailment gain. The existing pension and
89 OPEB regulatory asset is not amortized; rather it dissipates over time
90 based on actual pension and OPEB plan experience. The establishment
91 of a separate regulatory liability on the Company's books would allow for

92 more transparency, making it easier to ensure that the curtailment gain is
93 accounted for properly in rate case proceedings and to ensure that the full
94 curtailment gain is flowed back to ratepayers. There is no need to record
95 the curtailment gain as an offset to the regulatory asset as proposed by
96 RMP as opposed to setting up a separate regulatory liability.

97

98 **Q. DO YOU AGREE WITH RMP'S PROPOSAL TO AMORTIZE THE**
99 **CURTAILMENT GAIN OVER A PERIOD OF TEN YEARS?**

100 A. No, I do not. The Company is proposing a ten-year amortization period,
101 which RMP witness Steven McDougal indicates would closely
102 approximate "...the prior service amortizations that would have continued
103 if it were not for the accelerated recognition due to the curtailment."
104 However, over the period of remaining service of the employees who
105 opted to accept the enhanced 401(K) plan, ratepayers will now be paying
106 for the enhanced 401(K) costs in rates. There is no reason to tie the
107 curtailment gain amortization period to the remaining estimated
108 employment period for those employees. As ratepayers have funded the
109 pension plan in the past, I recommend that the curtailment gain be flowed
110 back to them over a four-year amortization period. This would result in an
111 annual reduction to expense of \$10.25 million on a total Company basis.

112

113 **Q. PLEASE PROVIDE A SUMMARY OF THE SECOND COMPONENT OF**
114 **RMP'S REQUEST.**

115 A. The second request by RMP pertains to the impact of the change in
116 measurement date for pensions and other postretirement benefits required
117 under FAS 158. The Company has historically used a September 30th
118 measurement date for its pension and other postretirement benefit
119 (OPEB) plans. FAS 158, which was issued in September 2006, requires
120 all entities, with certain very limited exceptions, to measure the pension
121 and OPEB plan assets and liabilities at the fiscal year end. For
122 PacifiCorp, the change in measurement date results in the requirement to
123 recognize fifteen (15) months of pension and OPEB expense in the
124 current fiscal year ending December 31, 2008. While FAS 158 included
125 provisions allowing for earlier adoption of the change in measurement
126 date, and encouraged entities to do so, PacifiCorp must make the change
127 by its current fiscal year end, being December 31, 2008.

128
129 Under the requirements of FAS 158, twelve months of pension and OPEB
130 expense, or 12/15ths of the total net periodic pension and OPEB costs,
131 would be recorded as has historically been done, and three months worth
132 (or 3/15ths) would be recorded as a charge to retained earnings on the
133 financial statements. The fifteen month period to which the net periodic
134 pension and OPEB costs pertain is October 1, 2007 through December
135 31, 2008. This is the gap between the last measurement date used in
136 determining pension and OPEB expense of September 30, 2007 to the
137 new measurement date of December 31 of 2008. This additional

138 adjustment to retained earnings is a transition adjustment that will not
139 recur in the future. Once the transition is made, PacifiCorp's annual
140 measurement of its pension and OPEB plan assets and obligations will
141 coincide with its fiscal year end.

142

143 As a result of the transition, absent an accounting order from the
144 Commission, RMP is required to record the impact of the change in
145 measurement date to retained earnings. RMP identified this
146 measurement date change transition adjustment as \$14 million. RMP
147 proposes that the \$14 million be accounted for as an increase to the
148 existing pension regulatory asset and be amortized over a period of ten
149 years.

150

151 **Q. DO YOU AGREE THAT RMP SHOULD BE PERMITTED TO RECORD**
152 **THE \$14 MILLION AS AN INCREASE IN REGULATORY ASSETS TO**
153 **BE RECOVERED FROM RATEPAYERS IN FUTURE PERIODS?**

154 A. Typically, this would be an allowable expense that the Committee would
155 not oppose, when requested in a timely manner.

156

157 **Q. DO YOU HAVE CONCERNS REGARDING THE TIMING OF RMP'S**
158 **REQUEST?**

159 A. I am greatly concerned with the fact that RMP did not make its request for
160 recording the measurement date change transition adjustment as a

161 regulatory asset instead of as a charge to retained earnings until
162 November 4th of this year. FAS 158 was issued in September 2006.
163 Since that time, the Company has been aware of the fact that it would
164 have to transition to a fiscal year end, or December 31st, measurement
165 date by the current fiscal year end at the very latest. The Company was
166 also fully aware of the accounting ramifications since September 2006
167 based on the clear guidance in FAS 158. It should have been apparent to
168 the Company since 2006 that a charge to retained earnings would result
169 from the transition absent an accounting order allowing for special
170 regulatory treatment of the transition cost.

171
172 Rocky Mountain Power Company's last rate case, Docket No. 07-035-93,
173 was filed on December 17, 2007 and included a proposed test period
174 ending June 30, 2009. The required charge to retained earnings resulting
175 from the measurement date change transition would fall within that
176 proposed test period. On February 14, 2008, the Commission issued an
177 order on test period in that case, requiring the Company to update its
178 application utilizing a test period consisting of the twelve-months ended
179 December 31, 2008. The revised filing incorporating the test period
180 ending December 31, 2008 was filed by RMP on March 6, 2008. The
181 required charge to retained earnings resulting from the measurement date
182 change transition fall within both the Company's proposed test period and
183 that required by the Commission in Docket No. 07-035-93.

184

185 Current rates being charged to RMP's Utah customers are based on the
186 Commission's Decision in Docket No. 07-035-93, which was premised on
187 the ordered test period ending December 31, 2008.

188

189 As indicated previously, RMP has been aware that the final deadline for
190 recording the impact of the change in measurement date would be the
191 current fiscal year ending December 31, 2008 since at least September of
192 2006. In fact, in response to CCS 1.12, RMP provided a copy of an
193 internal document prepared by PacifiCorp employee Jennifer Kahl
194 regarding the "Regulatory impact of change in measurement date." That
195 document was dated November 2, 2007, which is before the Company's
196 initial December 2007 filing in Docket No. 07-035-93 and well before the
197 Company's revised filing in March 2008.

198

199 The Committee is concerned that PacifiCorp has now come back and
200 raised this issue that would otherwise fall within the test period in Docket
201 No. 07-035-93 when the Company was fully aware of the issue prior to its
202 filing in that case and was fully aware that the impact would occur during
203 the test period in that case. RMP has an obligation in using a future test
204 year to raise all the pertinent issues impacting the future test period of
205 which it is aware. RMP was clearly aware of the change in measurement
206 date issue, yet it did not raise the issue or make a request for special

207 regulatory accounting treatment in that case. Therefore, PacifiCorp's
208 request is not timely.

209

210 **Q. IS THERE A REASON THAT THE COMPANY COULD NOT HAVE**
211 **INCLUDED A REQUEST FOR RECOVERY OF THE IMPACT OF THE**
212 **CHANGE IN MEASUREMENT DATE IN THE PRIOR RATE CASE?**

213 A. No, there is not. In fact, based on a Company document provided in
214 response to CCS 1.12, the Company had an estimated impact of the
215 change in measurement date back in early November of 2007. While an
216 exact impact would not have been known at that time, the Company could
217 have submitted an estimate or projection of the impact along with a
218 proposal for recovery of the impact. The Company apparently chose not
219 to submit a timely request as part of that case even though it was aware
220 the change in measurement date would be required to occur within the
221 test period. In using a future test year, many costs are based on
222 estimates, including the projected pension and OPEB costs.

223

224 **Q. IS THE SAME TIMING CONCERN AN ISSUE WITH THE PENSION**
225 **CURTAILMENT GAIN THAT WOULD ALSO BE RECORDED DURING**
226 **THE FISCAL YEAR ENDING DECEMBER 31, 2008 ABSENT SPECIAL**
227 **REGULATORY PROVISIONS?**

228 A. No, it is not. As previously discussed, the vast majority of the pension
229 curtailment gain resulted from many of PacifiCorp's non-union employees

230 choosing to accept an enhanced 401(k) retirement plan option instead of
231 continuing participation in the Company's cash balance retirement plan.
232 To the best of my knowledge, the Company had not planned on making
233 this option available to employees at the time of the last rate case filing in
234 Docket No. 07-035-93. The events triggering the curtailment gain did not
235 transpire until late in 2008. The choice period offered to the non-union
236 employees was from August 25, 2008 through October 3, 2008. This was
237 clearly after the Company's filings in the prior rate case.

238

239 **Q. DOES THIS COMPLETE YOUR PREFILED TESTIMONY?**

240 A. Yes.
