

ELECTRIC SERVICE SCHEDULE NO. 110 - Continued

BUILDER INCENTIVES: Builder incentives are listed in Tables 1 and 2 and are available for qualifying equipment fully installed at the customer site by the 2008 Application Deadline.

Table 1. 2008 Builder Incentive Levels

Utah Single Family		
Tier/Measure	Equipment	2008 Incentive
Tier 1	Meet 2008 ENERGY STAR specifications including performance-based duct sealing, air conditioner equipment minimum standard of SEER 13, A/C performance testing, correct sizing, best practices installation and the thermal bypass checklist; Plus installation of five (5) CFLs	\$200
Tier 2	Meet 2008 ENERGY STAR specifications including performance-based duct sealing, air conditioner equipment minimum standard of SEER 13, A/C performance testing, correct sizing, best practices installation and the thermal bypass checklist; Plus installation of twenty (20) CFLs	\$300
Tier 3	Meet 2008 ENERGY STAR specifications including performance-based duct sealing, air conditioner equipment minimum standard of SEER 14, A/C performance testing, correct sizing, best practices installation and the thermal bypass checklist; Plus installation of twenty (20) CFLs and three (3) ENERGY STAR pin-based lighting fixtures	\$500
Plus Measure	14 SEER HVAC equipment with correct sizing and best practices installation (available for Tiers 1 & 2 only)	\$100
Plus Measure	Duct placement inside conditioned space	\$100
Plus Measure	Installation of a single vent evaporative cooling system	\$400
Plus Measure	Installation of a ducted high efficiency evaporative cooling system	\$750
Plus Measure	Installation of whole house fan system	\$100
Plus Measure	Installation of an Energy Star dishwasher	\$10
Plus Measure	Lighting upgrade to 15 additional ENERGY STAR CFLs (above those required in Tiers 1, 2 or 3)	\$50
Plus Measure	Lighting upgrade of an ENERGY STAR Fixture(s) (beyond those required for Tier 3).	\$20 per unit
Plus Measure	ENERGY STAR ceiling fan with "Gossamer" blade design	\$10
GSHP Option	Meet ENERGY STAR specification including well-based ground source heat pump	\$2,000
Tier 4	Meet Federal Tax Credit Home requirements including ENERGY STAR envelope, performance-based duct sealing; air conditioner equipment upgrade to a SEER 14; A/C performance testing, correct sizing	\$700

Notes for Table 1

1. Plus measures must be installed in conjunction with a qualifying Tier 1, 2 or 3 home to be eligible for incentives.
2. Tier 4 homes not eligible for Plus Measure incentives.
3. Any home that is certified as at least 50% more efficient than the current Utah energy code will be eligible for a maximum incentive of \$700.
4. Incentives for GSHP will only be available if natural gas is not available at the property line.
